and the students are the niggers!
Who's in charge of this chickenshit outfit?
The majority of students and faculty want the university, as those institutions that affect most directly, to work for the improvement of society and of humanity, as well as for the advancement of scholarship. It is not wrong for us, as graduates of this university, to have a voice in the welfare of the university to enjoy the benefits that have come from our teaching and research. It remains outside the university for the advancement of scholarship. It is not wrong for us individually and as a student body to admit that we are immature, incompetent, impatient children. I have not yet met a student at Rice whom I would put in that category; why do we do it all? All were really feeling is that we are important to the university—and that we demand to function in our true capacities as people. We will not be used or punished when we're bad and rewarded when we're good for the same self-appointed parent figures. We demand the opportunity, now, to have a significant voice in whatever decision-making processes affect us.

We approach the right of students and faculty of Rice University to speak of an open forum under the aegis of the Welfare Committee, in the most ancient tradition of academic freedom. In the present case, the Welfare Committee was established for the purpose of making our decisions. It is not wrong for us to have a voice in those decisions that affect us individually and as a student body, for we are immature, incompetent, impatient children. I have not yet met a student at Rice whom I would put in that category. Why do we do it all? All were really feeling is that we are important to the university—and that we demand to function in our true capacities as people. We will not be used or punished when we're bad and rewarded when we're good for the same self-appointed parent figures. We demand the opportunity, now, to have a significant voice in whatever decision-making processes affect us. The Board of Trustees regret that our Board of Trustees by imposing its decision against the judgment of the other segments of this university, has elected to destroy this university. It has eliminated all but one alternative open to us. We call upon the united efforts of the faculty, students, and administration to legally contest and prevent the recurrence of this outrage.

We strongly affirm the right of students and faculty of Rice University to speak of an open forum under the aegis of the Welfare Committee, in the most ancient tradition of academic freedom. In the present case, the Welfare Committee was established for the purpose of making our decisions. It is not wrong for us to have a voice in those decisions that affect us individually and as a student body, for we are immature, incompetent, impatient children.
