

Mr R. J. Cummings.

Dear Mr Cummings -

The Fulwatt of your office promised a month  
to five weeks ago a detail of trusses at Miller Bldg with  
the relation of concrete columns to truss - both in center  
of building and at wall. You told me that this and  
relation of concrete columns to joint house would be  
promptly made when we let the job - I am  
sure there have had no attention from you due to  
stress of work - but they are now of immediate importance  
and the future relation of additional 3 stories requires  
that the arrangement as found in present contract  
have your exact design -

Please give us the detailed information on this  
subject that the building be not delayed. -

Very sincerely yours

A. Ward Walker
