Dear Gainor,

I sure thought that you were observing me or had forgot that I was down here, I didn’t exactly know which to think. It seemed like a year from one Thursday to the next. I suppose you could go for six weeks without getting a letter from me. But I was not very, very, much whether I could. Honey, I sure would be down on the world at the end of that time any way.

You asked me if the exams were hard, they have passed that stage long ago. These are are undoubtedly the worst that I have ever had. Questions range from 7 with 2 or 3 parts under each to 30 straight questions. German had 90 - Biology had 15 - English only 8 but they were awful long. Chemistry & which were impossible to answer and Math is yet to come. That is what I studied yesterday and am going to study
some more today. I don't think that we will have over 2 problems.

May you think I won't be glad when tomorrow 12 clock rolls around.

We have been playing Pussy in the corner. This morning and had just started playing drop the lid if when the mail came. So I guess that broke everything up. I don't believe that never did have so much fun playing those games as I did this morning. I think everybody in the dormitories was watching us.

Oh! Squirrel. I had the best Aus to ride last night. You know I told you that every evening after supper we generally go walking down the boulevard. Well last night three guys were out walking and some kid headed down and his wife (I think) asked us if we didn't want to take a little ride. Of course we did. We rode 4 rode. I thought sure we would come to Dallas before long.

Howis Gib getting along with his maconline lessons. You ought to hear me play. I mean play a tune. I think I'll go have a bottle.
as a bugler.

I had the funniest dream about you and somebody last night. I woke up and I didn't know at first when I was sure we were glad though that I don't exactly believe in dreams. Do you?

Gaines came over and I could see you, because you just bubbling over with something and I couldn't write it. I am afraid though that if you were to see me now you wouldn't know me, because you've got an awful black eye. Yesterday afternoon Fred and I went out to the club house to take a little exercise. We were wrestling for fun and we were worthy and he happened to hit me in the eye with his elbow. First saw diamonds and then I saw stars, and then I didn't see much of anything. It isn't my foot it's my eye.

I think that the freshmen are going to have a boat ride Saturday.
either that or both military companies are going on a little and stay out over Sunday.

If you knew what that Spanish was that I wrote, your answer submet to a T, but could you think that you are telling that to the wrong person? you needn't be scared to write any Spanish, I read it. So you preparing to go to South America, you never did say whether you wanted to go along or not.

The baseball season opens here next week with AM. I guess its up to us to beat them in that too. Dick and AM have so far both played at the same teams. you know I bet next year when we play AM on Thanksgiving day that the game ends up in a fight. These two schools hate each other more every day, and I know if we beat them next year something is bound to happen.

Well if you will please for me thest
\[
\frac{d}{dx} \log x = \frac{1}{x}
\]

or that suble - law - suble
a\[n\]thed \( x = \frac{x^n}{m^n} \) why do just do something awful nice for you - with lots of love. Otto
