Dear Glenna,

Well honey I sure hope that you are feeling alright again by now. You better get out and try running about two miles and see if it doesn’t make you feel better.

It sure has been cold down here and it still is. Has been trying to rain all afternoon, but so far hasn’t done much. I never knew it to be so cold this late in the spring but I don’t suppose a person has the right to be surprised at anything in
This day and time, at least for mot any more.

This has been an awful week for me. Just after I got thru writing you last Saturday night in walked Jack and said he was going home Monday night. I didn't believe him at first, but then he told me so much that I finally had to believe him. Went over to see him Sunday morning and there was his trunk. He left Monday night and believe me I certainly have missed him because he and I were together a whole lot and then he was my partner in lab etc. you know how it is.
We went to the Mayfield Monday night and then I went on out to the depot with him. He said that if he missed his train at Ennis he was going to go on up to Dallas. I haven't heard from him as yet, but hardly think that he went up there. He's coming to Dallas this summer, if everything goes alright, and I know he will.

Well we went on a picnic last Sunday and I'm not very anxious to go on another one very soon. It rained for all it was worth and we were way out in the woods and had to crawl under some trees. The wind started blowing and that didn't do us any good. There weren't very many of us and all of us boys had our uniforms so we didn't care but those girls sure were sick. They looked like drowned rats. When we finally did come in we went to one of the girls houses and stayed there the rest of the evening. Some caught a cold, haven't been trying to give it away, but no one around here seems to want it and I figured you don't, so I guess you'll have to keep it.
Who practically everybody that is going to training camp has left or is leaving tonight, you will some hand to report on the 8th and others on the 11th. It seems as though they are turning down quite a number when they get to San Antonio so it wouldn't surprise me if some of these corps didn't come back, but I doubt it, so far they have all "stuck" and I guess the rest can.

I hope that you were feeling
Well enough to go to the club 
mutiny Tuesday night. I 
know they couldn't get along 
without you, at least some of them. 
you know with all these boys leaving 
for training camp, and drilling 
going on all the time, you very, very 
 seldom hear any war talk. Whenever 
a bunch of boys get together they 
 either talk foolishness or nonsense 
 I know I haven't heard any heated 
 war talk. I wish Tom could have 
 heard Dr. Ayens' lecture on "The 
 Agitator." Gaimer he sure handed 
it to these fellows who are always 
talking about what should be done
and they themselves haven't found any
branches to survive.

Sorry I couldn't waste the banana
split, but I haven't had time to write before
carries, chief I haven't felt like writing anyway.
you know a person has just set to feel a
decent letter, at least that is me, I guess
you think that I have been feeling
something awful for about the last
month. I am going to write her Sunday
though, that is if nothing happens.

One month from tonight and I
suppose that I will be home in bed,
a month sounds like a long time
but it isn't, why I can remember just,
and it isn't just as well and I know if I
can remember back that far it certainly
hasn't been very long, I think that we
will finish chemistry in about two weeks
and there are only going to
be one hour exams, so that
leaves really fewer studies, and it certainly
sounds good to listen well to be able to say
that

I don't imagine that I would like for
them to give me chlorophyll, I would
lots rather have either. I have given it
for rabbit, rats, turtles, and flies, but never yet to
maggot. I hope dear that you are feeling

about again. One
