Wed.

My dearest Gainor:

I should say that it does seem natural to be writing letters. Will finish this later, first call forms just coming, must go to formation. Well here I am back again. Gainor dear you know it's just like being in the penitentiary sure enough, as to be here. Why just think of getting up at 5:45 every morning. You see at 5:45 we have reveille, and in 15 minutes we have to be down for roll call, at 6:15 inspection of quarters. 6:25 first call for breakfast and then at 6:30 breakfast. That's two formations already, and then when we drill in the morning we have sick call at 7:15 and first call for drill at 7:25 and drill at 7:30. Then recall at 8:30. First call for dinner at 12:45 dinner at 12:45. You see we have to march to and from meals and the whole is seated at once. We
sit in company formation, of course.
Then at 6:15 we have first call for
supper and supper at 6:30. We are
allowed 30 min. for supper, and
20 minutes liberty after supper
when it is sounded. We have to
keep our rooms from this time on
unless we have special permission
to leave. We are allowed the minutes
absence from rooms. Then at 9:30
we have fatigues and lights at 11:00.
every body has to be in bed then.
Call to quarters is just sounding.
A freshman is detailed to distribute
mail for each company, and also
to collect it, but I am going to mail
this one myself. sweetheart just one
week ago tonight I was talking over
the phone with you and you
remember we went over to Martha's,
every night that goes by, I have to
think about what we were doing.
that time last week. Gaiyor
home I sure hope that you
can come down here Thanksgiving
and I know that you will try to
want you? Goodness knows
when I will crawl out of this
Khole again, I wish I never
had brought any suits down here
they are just in the way and they
make me want to break rules.
(Inspection was just blown, I for
got to tell you about that, that comes
at 7:30 p.m. now they will come
around to see if I am in my room)
I know I won’t be able to wear any
thing but this until Xmas and I
may have to wear it there. We have
to salute all those officers (army
only not cops) and whenever
you go down town your hand
is continually going up and
down. I have gotten now so I don’t
see them any more.

I phoned Ethel again Sunday afternoon, and then met Ethel, Boo and town Sunday night and we went to a picture show. She looks real well, and Boo looks about 10 times better than he did the last time I saw him. I showed Ethel those pictures we took that Sunday and Gainer's they made her cry. She wants to see you awful bad. You remember the one where you are laughing and I look as though I am scratching dirt off my hands, well she sure wanted to keep that one but goodness me nothing doing, if you will, please send me that negative and I will give it to her. She doesn't want me on there she just wants you, that's what she told me now. I sure think she
has good judgement because that is what I want also, but sometimes I feel awful doubtful. When you come down here I sure want you to meet this roommate of mine, you may not like him because you really have to know him before he can be understood but I guarantee you that if he wants to be can keep you laughing all the time.

Many thanks for the standups I sure will be able to use them. Books for Biology are going to cost me 11.50. Three of us are going in together though so it won't be so bad. Went to my first French class this morning, I don't know whether you are going to like French or not. Also had our first Chemistry Biology class or rather lab this
afternoon. It was pretty easy because the Med. section wasn't very big, to-morrow's class will be flooded and I expect that quite a # are going to have to be changed. You see, dear, that work certainly is interesting to me, but it's awful to get them started, as a rule boys are much easier to "pick things up" and help themselves" than girls, now this evening we had 26 girls + 2 boys and some of them were fierce. Well I don't guess that this is very interesting to you and I can't blame you at all.

I knew just as soon as I got away from up there things would pick up, I guess that there will be something doing all the time now, well I'm here and can't help it; wait until you come down here.

Don't ever think that you will
have to get an education to tell time, you have a better one now than I have, honey. True knowledge isn't worth a cent if you can't apply it, and you, why you know you don't know how much you do know.

Well as far as the sermon went last Sunday I guess it was alright, but I really didn't get to hear very much of it, I just kept thinking about the Sunday before, well might as well say that I want in the C. C. Christian Church, because I thought about it so much.

Many thanks for the clipping that is about the best one I've read.

I have to go to lab at 7:30 in the morning, you see we don't have drill until 9:40 on Thursday, and finish a stencil I started this afternoon. I would give you some of this.
Orange I am eating but I am afraid you wouldn't like it.

You know it's real funny to go downtown and have these privates salute you, we are not supposed to leave the campus unless we have on a blouse (coat) and when we go downtown we look just like officers and just lots of the privates will salute you.

Answer With love
