Saturday.

My dear sweetheart, I just came back from lab, so you see I didn't get my Saturday afternoon off as I usually do, of course I could have had it but I am going to town tonight anyway and I didn't want to this afternoon, and as I had a good chance to get caught up I thought I might as well take it.

I sure wish I could come home every weekend. (spelled week and not week as you spelled it, you aren't feeling that way are you dear?) I know the week does seem awful short when you work hard, but don't you try to do too much and get yourself
to feeling sad again.
you should have been
down here yesterday and gone
to the lab with me. Believe
me I had some time at a
bout three o'clock I gave
there; a lecture and demon-
stration of the Wasserman
blood test. If you don't know
what that is ask me some
time and I'll be only to
glad to tell you. I may be
wrong but it seems to me
to be little short of a crime
for a person to grow up in
utter ignorance of the things
that that test is made for.
you know I sure do have
lots of fun in that class even if it does require lots of work. I've got a rep now that I've been wanting to get and that is non-partial. I always feel complimented when a person tells me that.

Several of these 'debaters,' would be classified as 'mush slingers' as I call them wanted to know why they had been getting such low grades lately, and I simply told them that they weren't doing the work and leaving to early etc. It always tickles the doc. when some one comes to me like that. He says
give them H——. Now I know you think that I am real mean and that I ought not to do it, but honey I'm not at all unreasonable. I'm just making them all do the same thing.

I phoned Pete last night and she told me that they had a Scrappis-Booth and not a Ford. Boo told me a Ford but just to fool me, so he said, maybe he didn't know any better, for my part I would rather have a Ford.

I got a whole bunch of papers to grade again today.
but it is all 2 to 0 and not freshman. He gave me my choice and I took the one with only 60 papers instead of 150, foolish of me wasn't it. But I would rather grade the papers of my own class (get the point) honey I am going to give them an exam Monday, and I'm going to make out the questions myself. Oh I tell you I am getting to be some prof. (like a fish) I can't pass my own course but think I can teach others how to pass theirs
that's deductive logic isn't it darling. (supper) Gee, I ate to much again. Honey, I sure am glad that you have got a good appetite and I hope it keeps up.

Have you gained any more? I know good and well for never had such an appetite since I first started getting over the flu.(not influenza) Don't you feel funny though when you simply can't get enough to eat. I know I used to really feel ashamed of myself for eating as much as I did.
classes are just about
over now and everyone is
getting ready for the finals.
I sure will be glad when they
are over. I wish I could come
home between terms but it
surely can't be done honey. I'll
be crowded for time sure-
ough then. The freshmen
year doesn't come until a
week from next Thursday
that's one day after I am
through with my exams.
The 2nd year comes that
day also so you see I am
going to have lots of
grading to do.
I would like to go on a
canoe trip next Tuesday
with a bunch from the lab. but I'm simply get to study. Just think I found out today that I was making about a 2 in one of my courses, so far.

Honey I sure would take you out to lunch. I would like to run a race with you and see who could eat the most. It would be a big pleasure to me to see you eat a whole lot.

So now I've got another rival, a conductor. If it isn't an automobile salesman it's a conductor. Have I got any chance at all? Be sure I'll tell anything.
you have taught, especially
to the little girls. Oh yes I
almost forgot, a younglady
brought me a box of candy
yesterday, all unexpected to
me. I knew whether it was
good candy anyway.

Sweetchart I sure do agree
with you. I wouldn't want
to be in one town with my
wife in another, that is no
use in being married if you
are going to be that way. do
you think so?

My eyes are a whole lot
better now honey. I've been
washing them with some
dope and it seems to help
them get a bit. I think they
will get back to normal again before long. Just think. I went to bed at 10:15 last night and my bow I did sleep, but I woke up still sleepy. You know I think these old desk lamps hurt your eyes a whole lot too, not that they aren’t good lights but they are just hard to regulate.

Henry says he got back out quickly but he made the trip twice in order to do it. He said he frienly found the car line and then he knew it was only a few blocks from the end ythat so he followed it on out until he came to the place.
to turn. Not a day passes but what he doesn't say that he sure had a good time, of course I wouldn't think of saying such a thing. Goodness knows that I can't think about.

Well sweetheart, mine I must get ready to go to town and I've got to shave, bath and don't try to do too much dear, and I sure wish I was leaving again tonight like I did last Saturday, it surely doesn't seem like it has been that long.

I love you dearest -

With all my love,
