My dearest Sweetheart,

I sure was glad to get your letter this morning. I have been on pins and needles ever since Saturday, just wondering what was coming next. You should have had this Friday honey, did the other one ever get there. I can't imagine why it takes so long dear. I, too, will be awful glad when I come back home or at least when I am with you again. I will be perfectly happy then regardless whether I am home or not. Sweetheart I sure do miss you and just long for you so much.
It's just a few minutes
until dinner, but I have
been wanting to write you
all morning, but had to
work. So I'll write as much
as I can now. Darling
what have you got the
blues over? Tell me all about
it won't you. I sure hate
for you to have them, because
I know just how it makes
you feel and it doesn't
do one bit of good either. I
wish I could get along
without them, but I'm always
so lonesome for you the
least little thing will just
completely upset me, and
Especially don't know what
I am doing. (Denne)

Yesterday was the longest old day, and I worked all day in lab. at that. Usually the day doesn't seem so long when I do that, but yesterday did. About 11:30 yesterday morning Bob and Ethel came by and took me for a little ride. They came get me out of lab. and I know they were rather skeptical about my going because I had on my old clothes and wasn't fit to see anyone, but they insisted that I go so I did.

You know Mrs. Bolt has been here and she just left yesterday morning.
Their honeymine surprised
some paurus, just almost
an arm full. Honey I am
going to get a box and
put some of this Spanish
moss in it and wet it good
and then put some paurus
in it and send them to
you. They may be alright when
you get them and they may
not, but I think I’ll try it
anyway. Would you like for
me to sweetheart. Some
wish you could see them
the way they are growing
honey they are simply beautiful.
Have it you got that pass
yet, dear, you sure would
see everything if you
came now. The Cape Jasminis
or whatever you call them
will be blooming in June

though, so we will still
have something pretty to show
you darling. I can’t, honey,
just simply, cannot wait
until June. The time seems
to me to be getting longer
instead of shorter. How
did you like “Alarm Clock
Lady”? I thought it was
good. You know I saw
that here, way back about
the first or second week in
March here. I knew it was
during exams, and thought
on Sunday night with
Booth and the rest of
them.

Sweetheart, I have to go to
chemistry now, so will
write you as soon as I come back. I love you, dear.

Well here I am back from lab. already & and it is only four o’clock. But I went as far as I could. You know I sure feel good about that lab. now. We only have 31 experiments to do and I am already on 29. I think I will be able to finish all of them by the first of May, and we have until the end of May in which to do them. I surely will feel fine not to have any chem lab. for about one month. Why don’t you know what to do.
I can easily see that there is studying though and then the Thursdays that I have off I can put in in the Bug Lab helping the Freshman.

No, sweetheart I would lots rather have you tell me what your troubles are. May be I can be of some use to you. That may dear and nothing would please me more.

Honey I certainly do appreciate what you told me and if you won’t think me to awful I may have to call on you later on for a slight loan. I just feel though like I ought not to do it, you are so sweet about it.
yes I am still working with all sorts of germs dear,
but there isn't any very bad
danger, especially when we
wash with mercuric chloride
+ kill them all.

I am sending you some
threshers dear and also an
article I would like for you to
read in your spare time.
If you can't understand
it save it and I will explain
it if I can. You are not
supposed to see the misspelled
words and other forms of typo-
graphic (?) errors but just
read. The threshers are in the
four class issues as you
will see. The small one,
labeled freshmen issue.
was put out by the sophomores two days before the regular Freshman issue came out. Of course it was all on the quiet and no one knew about it. There is very little truth in it, but it is used as a sort of medium to "get back" at anyone you want to. You really have to know the people inside to appreciate all the fun, and it's just full of it. We'll go over there all this summer together, dear, and I'll tell you all about it.

Our rings are out now. That is the 1930 ones are and mine will be out this
They are real good-looking but not as distinctive as I would like for them to be. They seem to me to have a "High School" appearance. I like them anyway, and hope you will also.

I am going on a swimming party tonight at the "South End Junior High School" and know I am going to freeze because it turned cold again last night. Nash is going and neither one of us want to. I simply don't want to go to a thing alone unless I go with you. I hope your blues are gone and that you are feeling alright again, sweetheart. I love you with all my...
