

Pitzer Announces New Series On Recent Research

The University will initiate a new series of lectures on recent research in the humanities, science and engineering for 1963-64, President Pitzer announced Monday.

The lectures, to be known as the President's Lecture Series, will deal with recent developments in some field of inquiry which transcends traditional lines between disciplines.

Professor W. B. Lehmann, Chairman of the Department of Germanic languages at the University of Texas, will be the first lecturer in the series. He will discuss "Towards Machine Translation" at 4 pm on Wednesday, October 2, in the Fondren Library Lecture Lounge.
