

WRC Establishes Fellows Program

In a unanimous action, the Will Rice College Diet has voted to establish the College Fellows, a group who will encourage academic achievement and attach the name of the college to the ideal of academic excellence.

The Fellows, a group of about 20 juniors and seniors to be selected on the basis of scholastic achievement, will be installed in a college meeting Sunday, April 9. In the future, new members will be chosen by the Fellows at the beginning of each semester from a list prepared by the Resident Associates and the Master, Dr. James Fulton.

"In making this move, the college is seeking to undertake the role that befits it as part of a university," said Carruth McGehee, president of the college.
