

During the summer:

The Department of Space Science made preparations for rocket firings, radio telescopes and its first students.

Architects and engineers examined sites for a new college for women and a new wing for Wiess; the \$.* million Chemistry Building project proceeded apace.

On the faculty, some left and some came, but most stayed put.

The National Student Association congress took on a new and unusual look.

And it was hot.

To catch up on these stories, the Thresher offers a two-page Summer News Review.
