
From Senate President

Open Letter to the Student Body:

A consistent and constructive appraisal of his social and intellectual environment is as much a part of a college student's education as any curriculum. The Student Association exists to insure such an appraisal.

In our regulation of all-university functions, the Student Association's greatest purpose is to secure an organized, responsible, and effective student representation in those university affairs in which we have a legitimate field of interest.

Your participation is necessary to the continued success of your Association, for only with complete knowledge of your opinion can we make competent decisions, and only with your support can we enforce them.

Sincerely,

REED MARTIN

Pres., Rice Student Assoc.
