EUGENE MILLS IS VICTORIOUS IN THE PEACE CONTEST

J. N. RAYZOR TAKES SECOND PLACE AND WILL BE ALTERNATE.

Winner Will Represent Rice in the Intercollegiate Peace Contest to Be Held in Belson on Third Monday of April.

Eugene Mills of the Senior class, editor of the Thresher and an undergraduate who was unanimously chosen as best speaker in the campus-wide contest to determine the Peace champion, was awarded the handsome Hutchinson & Mitchell gold medal for oratory, which was offered at the Institute for the first time. In his address Mr. Mills will represent the Institute in the intercollegiate contest to be held in Belson Hall on the third Monday of April, at which a cash prize of $50 is offered and the winner will also represent the Institute in an interesting contest to be held later.

Mr. Mills and Mr. Rayzor represented Rice in the intercollegiate Peace contest. Mr. Mills spoke on “America and the League of Nations” and made a strong plea for the United States to join the League; Mr. Rayzor delivered an address on “The True Allied.” The former made a strong plea for the United States to join the League; the latter did so with great effect.

Mr. Rayzor, who was chairman of the committee on peace oratory, gave a good original argument with splendid delivery.

The party representatives included the Elizabeth Baldwin Shirley Alex, her society, and the Freshmen and Seniors and also the two graduates, and the former held a speech against the League of Nations and the latter against it.

Mr. Rayzor took as his subject “The True Allied,” and gave a good original argument with splendid delivery.

Mr. Markham represented the Elizabeth Baldwin Shirley Alex, her society, and the Freshmen and Seniors and also the two graduates, and the former held a speech against the League of Nations and the latter against it.

Mr. Markham is an able speaker and his logical style is well known to all in that capacity. He was rather weak in the second part of his speech, which he delivered in a very hurried manner, while he was not successful in winning, he certainly made an effort to reach all those who would be champions great hope in the future.

Mr. Markham and Mr. Bradley represented Rice in the Peace contest, the former speaking on “A Pro-United States Argument” and letting it be known as his subject “The Present Peace Legislation.” Both prepared good speech and made excellent speeches. Mr. Markham has prepared his subject very carefully and his logical style is well known to all in that capacity. He was rather weak in the second part of his speech, which he delivered in a very hurried manner, while he was not successful in winning, he certainly made an effort to reach all those who would be champions great hope in the future.

Mr. Markham is an able speaker and his logical style is well known to all in that capacity. He was rather weak in the second part of his speech, which he delivered in a very hurried manner, while he was not successful in winning, he certainly made an effort to reach all those who would be champions great hope in the future.

Conversely the sad rule, the literary societies chose a subject in the contest, the former taking the side of the League of Nations in the contest, the latter taking the opposite side. Any student in the school had the privilege of entering, there being four orations prepared in advance of the contest, if necessary, one in each of the three classes, and one for the Freshmen at large. The latter was not held, however, as no orations were excepted from the society.

The contest as a whole showed excellent oratory, and each participant, and was undoubtedly one of the best orations ever heard at Rice Institute. The evening oration was given in the drafting room, and it had been very little publicity, consequently the audience was very large and showed their appreciation of what it lacked in size.

A number of contestants appeared in the last two days of The Thresher and gave a good account of themselves. In the first day, undoubtedly one of the best orations heard at Rice Institute, the evening oration was given in the drafting room, and it had been very little publicity, consequently the audience was very large and showed their appreciation of what it lacked in size.

Sumpuous Book Of Opening
Published in Three Volumes

(Continued from Page Two) two-thirds the price of the book itself, but they are an indication of the price of the book. The majority of these volumes are written in English, of course; some are written in Russian, German, Italian, or Spanish. As has already been indicated, volumes two and three of the book consist completely from the inaugural lectures in the fundamental sciences of mathematics, physics, chemistry, and biology. The entire history is written in full in the text. Each course of lectures is prefaced by a paragraph from the lecturer. Here may be noted the text on History by Professor J. J. Thomson of the University of California, the text on Science by Professor K. K. Gilchrist of the University of London, and the text on Mathematics by Professor W. H. O. P. Watson of the University of Cambridge. The text of the pamphlet is followed by the pamphlet for the pamphlet. Copies of these pamphlets may be had by any student resident at the University office.

A few of the addresses were presented by Professor A. C. B. B. of the University of London, Professor A. B. B. of the University of Edinburgh, Professor A. B. B. of the University of Oxford, and Professor A. B. B. of the University of Cambridge. The addresses and addresses were presented by Professor A. C. B. B. of the University of Oxford, Professor A. B. B. of the University of Cambridge, and Professor A. B. B. of the University of Edinburgh.

Among the inserts in the first volume are the rules made use of in the Academic Quadrangle, and a twopenny copy of the general Parliament plan for the university. There are also reprints of the pamphlet explaining the address to other scientific and educational institutions of the world. The address to the university is followed by thedealer's name and address to the dealer's name and address to the dealer's name and address are all printed on both sides of the pamphlet. The pamphlet may be had by any student resident at the University office.
CLUBS

The Engineering Society met Tuesday night, March 4, 1917, in the Institute library, having been addressed by Mr. R. Z. George, industrial engineer of the Humble Engineering and Construction Company. Mr. George talked on the problems of industrial engineering, explaining exactly what the term meant, and what was involved in this branch of engineering. The lecture was virtually an explanation of the usefulness of the engineer, and served to drive home to the student populace the fact that a knowledge of mathematics and instruments is not the only prerequisite for an engineer's success.

Industrial engineering deals with the application of engineering principles to business, and on this account it is the broadest field in engineering. It must of necessity cover every branch of industry. Mr. George is at present preparing a bibliography of articles and references which will be the subject of an address which will be presented in Institute library with a copy to be printed.

After the business session and the reviews of letters from France and Canada were served, and an informal discussion of the subject was enjoyed.

Miss Lillian Shinn, spent the week end with her parents in Galveston.

Miss Lydia Hays' father, Mr. Hays, and friend, Mr. Stahl from Kingsville, spent Sunday with her.

Mr. J. R. Blumberg visited A. L. Thomas on Saturday.

Miss Lydia Hays' sister, Miss Frances Foote, for the past year has been matron in the infirmaries at New York, New Orleans, and Philadelphia.

V. L. Doughty visited his parents in San Antonio, Saturday and Sunday.

Miss Mary Beth was visiting her sister, Miss E. L. Cherry, for the past few days, but has returned to her home in Galveston.

Miss Maynard Robinson and Kiefer M. W. Talbot spent the holidays with their homes in Huntsville during the winter season.

J. B. Galvan had the pleasure of opening a few days with his parents in Houston at the end of the session.

Lona Rinehart has returned to school and hopes to be able to take his examinations in the near future.

P. S. Poynter, Z. Hannah, P. M. Alford, W. W. Mason, and J. A. Mans- ing, have returned to college on Monday and Tuesday.

Mrs. R. E. Brockbank gave an interesting program and amusing reading on the incidents of Jonathan Swift and the apostle, Partridge.

The next number on the program was a debate: "Resolved, that in case of war with Germany the United States should at once transport to Europe a large army to actively aid the allies in the field." P. O. Celanese and P. F. West represented the affirmative side of the question and B. H. Holloway and M. R. Peterson represented the negative. The society aided the winning side to be the affirmative, while the judges—Messrs. Millet, Riddle and J. D. Peterson—awarded the honor of being best speaker to Mr. Millet.

The society had no meetings during the winter holidays but a good program is promised for the next meeting.

THE THRESHER

A Formally published by the students of the Thresher at a meeting of the Student Association on March 18, 1897.

THE THRESHING MACHINE

A beautiful moonlight night in early spring, a night when love and tender roses reign supreme, and since it was their first evening together they were making the most of it. The sweet Yiing Thing raised her lovely head from her shoulder and looked outlistened at the starlit splash on her cat. She poured her comforting and flower scented, "Oh, will you, grace," in her ear. Great tears welled up in her eye, and leaving her face she sobbed: "Oh, Charles, I love you, I love you.

"LANDERS & GREEN"
 view on proposed student association. /he seems, however, to favor the manage- ment of athletics at the Institute, which have not been, and are not, a students' council.

In this matter the Thresher has shown itself to be a newspaper of a free and open discussion of the matter, and will naturally print every statement that is made, including statements that may be embarrassing to some members of the faculty or student body. For those who are not familiar with the position of the Thresher, it is in favor of a student association and is in favor of a students' association. This would be composed of all the men and women students and would be an institution, through and by means of consultants, to take over all the work connected with all student activities. This is but a general statement of the powers and attributes of such an association, together with the constitution, details of meetings, and the organization of the association to be determined by the students.

Mr. J. Newton Hayman, business manager of the Thresher, made the following statement:

"It is my opinion that the organization of a student association would be a good thing for the Institute, and I believe that the students would welcome such an association."

The Honor Council, which should represent the student body in all matters, will be elected by the students. The council shall have power to make rules and regulations for the conduct of the students. The council shall also have power to discipline members of the student body who are found guilty of misconduct.

The proposed students' association to be formed will be a small body of students who do not control the paper. The student body at the present stage of development should not control the paper. The student body should be given a voice in the selection of the editors and managers, and the student body should have a voice in the selection of the editors and managers.

The Honor Council is in contemplation. This is but a general statement of the Honor Council, and it will be necessary to have a meeting of the students to determine the constitution and rules of the Honor Council.

For those who are not familiar with the Honor Council, it is in favor of a students' council. This council would be composed of all the men and women students and would be an institution, through and by means of consultants, to take over all the work connected with all student activities. The council shall also have power to discipline members of the student body who are found guilty of misconduct.

A. C. THRESHOW

In the last issue of The Thresher we printed a suggestion that the student body organize into some definite association.

There are many advantages that can be derived from such an organization. At present, our athletic organizations (the football, baseball, and basketball organizations) have been successful. So have most of the larger athletic organizations.
