The following letter was sent to Mr. Caleb Wilson, who is to give the lectures on food conservation in March and April. Full pay is offered for the lectures and there is also an additional prize for anyone who picks up the greatest number of points.

The lectures are scheduled to be given at 8 p.m. sharp on the first Wednesday of each month. The topics covered will include the importance of food conservation, ways to reduce food waste, and tips for saving money on groceries.

The lectures are open to the public and are free of charge. Refreshments will be served after each lecture. For more information, please contact the speaker at 555-1234.

$2.00

Underwear — $1.00, $1.50, $2.00

Military Stocks — $2.50, $3.50

Sailor Pants — $2.50 and $4.50

Men’s Hosey, 15c, 25c, 35c, 50c, 60c

Students are to form

ASSOCIATION

CO-OP. STORE, PUBLICATIONS AND ATHLETICS TO BE AMONG CHARITIES

Honor Council to Be Organized—Athletic Management to Lose Control—Constitution Compiled and Faculty to Appoint

In pursuance of the plan suggested by Captain Baker at the last meeting of the students and the trustees of the Institute, the first class president held a meeting with Mr. Lovett to discuss the formation of a students association at Rice. Prior to this meeting Dr. Lovett had obtained statistics on the students’ associations in the large universities of the country. In giving this Dr. Lovett showed that he was eager to cooperate with the students in the formation of an association at Rice.

In commenting on these statistics, Dr. Lovett stated that as a whole student associations are successful. The main function of such associations is to manage the affairs of the school, although Rice, in keeping with the general education of the student body, does not engage in the running of the school activities. It is true that student associations are successful when they are independent of the administration, but it is not the case that student associations are not successful in any way. In commenting on this, Dr. Lovett stated that it is necessary to have a good administration and a good student association. There is no necessity for a student association to be independent of the administration. In fact, it is necessary for a student association to be independent of the administration.

If the student association is independent of the administration, it is necessary for the student association to be independent of the administration. If the student association is independent of the administration, it is necessary for the student association to be independent of the administration. If the student association is independent of the administration, it is necessary for the student association to be independent of the administration. If the student association is independent of the administration, it is necessary for the student association to be independent of the administration.

Duty of the student association is to be independent of the administration. If the student association is independent of the administration, it is necessary for the student association to be independent of the administration. If the student association is independent of the administration, it is necessary for the student association to be independent of the administration. If the student association is independent of the administration, it is necessary for the student association to be independent of the administration.

WAR COURSES HAVE SPEEDY PROGRESS
PRAC'TICAL WORK NOW BEING GIVEN IN GAS ENGINES AND WIRELESS COURSES.

Owing to the approaching exams, the special war courses at the Institute have been put on a new level in the background.

A short time ago Mr. Aujard prepared a series of lectures on the "gas engine," which terminates this theoretical part of the course. The principles brought out in the lectures involved the fundamentals of gas engines such as are used in automobiles and airplanes, and prepared the class for actual laboratory work on various types of motors.

After some delay the engineering department has been able to obtain a few types of up-to-date motors, some of which have already been received. Practical work will commence the latter part of this week. Courses of three or four members each will be formed to work at these new conveniences for each member. A minimum of two hours per week is required, which should allow ample time for every one in the course to become proficient with gas engines before June. Additional types of motors will be procured for additional study from time to time, according to the present plan.

The Wireless Telegraphy Class, taught by Mr. Hamilton, is progressing rapidly. As "ciphertext" apparatus, a new machine designed and made for the signal corps of the United States army, has been installed for the use of the students. This machine is at the disposal of the students, and may be used at any time by members of the class, so that it is possible to practice "sending" and "receiving" at spare moments. Only one half hour of practice per week is required. A full understanding of the Morse code and the ability to send and receive messages rapidly is the main purpose of this training; it being necessary to acquire this before taking up the study of wireless apparatus.

Don’t forget the food conservation notice.

conflict between religion and science, recently published in these columns. Who takes issue with the article on the ence substitutes for the supernatural—it is a plain matter of fact. We say away with faith, love, play, fairy and slavery, democracy and autocracy—such a promise? Here is why: There are many Gods. Religion has a certain advantage over per without having one’s religion come too. That it is not in the actual world of fact that we truty live—or should it—I have married. We choose our friends, and help others to do the same. Gospel truth and electricity, evolution and slavery, democracy and autocracy—severe, pitiful figure, groping about—your own. As to honor, the big thing is to try to be worth some benefit of others less fortunate. It is on the work of the world till all is well. That is Christ—to fight the evil to the end and after the final victory. We choose our friends, and help others to do the same. Our pledge means that we shall strive to do “the thing that need be done” and help others to do the same. That is Christ—to fight the evil to the end and after the final victory. We choose our friends, and help others to do the same.
