Dr. Chandler D. Dolinar first of a series of extension lectures on protection of animals and humans from diseases caused by insects to Houston Health.

Wednesday afternoon at 4:30 in the Rice Institute auditorium, the first of a series of extension lectures was given by Dr. Chandler Dolinar, director of the Bureau of Entomology at the University of Texas. The title of the lecture was "Mosquitoes as Carriers of Disease." It is possible that the better classes of mosquitoes are capable of transmitting, the organisms continued, first pierces the skin with its needle-shaped proboscis. The wound to prevent the coagulation of the blood is then made.

The ignorance of some of the students of the Freshman Class has be-
come quite noticeable, and needs to be enlightened. In one particular thing
have these students shown themselves exceedingly ignorant; i.e., the laws
of decorous conduct and usage of polite society.
It is known, that continuous conversation, either verbal or written, in
the class-room is made in the extreme, and certain Freshman girls have
caused themselves to be much commented upon because they persist in this
undesirable custom. Particularly is this true in some classes in Educa-
tion, English and Mathematics.
Rice Institute is not High School; it is a University. In a University
no professor should find it necessary to mention discipline in his class-room.
None of our professors will stoop to the level of calling down a student in
class because of conduct, unless it is absolutely necessary in order to make
himself heard. Men and women who make it necessary are unfitted for the
name of college students. You students who indulge in this rudeness—Rice
is adapted to you! Ignorance can no longer protect you. It is to be hoped
that when the hat fits will wear it. However, if he doesn't claim it, a
more specific article will appear shortly. Don't make it necessary to call
upon—Written by request.

THE SPRING ELECTION.

The time is not far off when the officers of the Student Association are
to be elected for next year. Who are your candidates? Pick out men
and women whom you think are the best qualified for the various positions.
Don't wait to see what others are going to say or when they are going to
seem to favor a particular one. Who is to be president? Are the fore-
ters of The Thresher and Campanile going to be? It's up to you. Keep
your eyes and ears open. Now some school spirit; don't wait for the other
fellows. Rice is far too short of "other fellows" already.
