In an article "The Invalid" addressed to the clique of invalids who are becoming as numerous as the population of the United States, there is a strong warning against the harmful effects of invalidism. The author states that invalidism is a disease of the mind, and that the cure lies not in rest, but in the active participation in the affairs of life. He advocates a program of exercise and activity, and suggests that the invalid should be encouraged to return to work and to engage in useful pursuits. The author concludes that the best way to combat invalidism is to treat it as a disease, and to provide the necessary care and treatment. He believes that the cure lies not in rest, but in the active participation in the affairs of life.
