ANATOLE FRANCE, 1844-1924,  
GREATEST CONTEMPORARY NOVELIST

With the death of Anatole Thibault, better known as Anatole France, the French republic sustained a loss which it cannot fail to feel not only in that country, but in the literary world at large.

France, gentle skeptic, humanitarian, socialist, but above all litterateur, was born on April 16, 1844, in Paris. Brought up among men, but in the literary world at large.

Jack Glenn

Geraldine Jennings

Duff, Katluvrine Thompson, John Rose, Murmaduke Wigglesworth.

Active career as a writer began. "The Book of My Friend," 1885, which consisted of the most charming pieces of nature, the average was thirty-five, while the highest grade was eighty.

Dr. Caldwell is helping us make a list of students we shall allow to take our course Astronomy 199, to get in the university.—The Daily Lariat.

We are solely concerned with the future of that school was done more or less at his own leisure, and when the two above mentioned, undoubtedly his best works.

No guards over you, except your own conscience.

But in the present war, in which we are all engaged, we have no right to think of the past. Cherish it now and for all time to come.

Rice University this year.

Sailing West to India

SINCE the days of Christoper Columbus men have felt the call to "sail due west to find India." In an organization like Westhinghouse, such pioneering spirits find happy haven as research engineers. Their every thought is a question—every energy bent to discover new and more effective answers to baffling problems.

Immediately Westhinghouse began to build alternating current machines of high voltages, for example, the problem of the ocean became acute. For thirty-five years high voltages and insulation have formed an endless chain of problems. As voltages have been increased, improved insulation has been demanded. As insulation has been bettered, voltages have been still further increased.

One striking contribution of Westhinghouse research engineers has been the perfection of an entirely new insulation material—Micarta. Possessing many of the qualities of metal, paper, fiber, mica, gum, rubber, Micarta differs in radical respect from all of these.

It serves industry indirectly as improved insulation material, and also directly because of superiorities when used for gears, propeller blades, and the like.

Only the imagination can set a limit on the field for the research engineer—or for an organization that cares around him.
The threat being made by the Christians at Fort Worth seems more menacing than was guessed in their preceding week.

The T. C. U. aggregation, as yet undefeated, and with one conference match to play, will meet the Rice Roughnecks at the Rice Club with the shutter opening conference game, on October 28.

Sewanee succumbed last Saturday to the attacks of LSU, 28-13, and the Aggies. Oh my! As yet there is no known of the plans for the year. However, it is believed that, the clashes thai) ever- before, and that the classes will stage a merry struggle for supremacy.

Football is holding the attention of all rice supporters at the present time, but nevertheless intramural activities for the coming year are claiming their share of the spotlight. Although it is rather early to even be thinking of intramural events, quite a number of students are already practicing for them.

One of the male students are already practicing for them. And Stancliff has no monopoly of game men's places, but when the time comes for them to do it, they do not disappoint. Stancliff, who acts as head waiter at the Sinclair Oil Company in Houston, will fly.

Daily menagers have served to this end to get ready, and it may have been accomplished in the week and the Rice eleven is shaping up finely. George will stage a merry struggle for supremacy.

End, Banish! The north Rice men, the cheer section, is coming around in a pretty fashion, under the tutelage of Charter Leader Edward Elizer, and his seniors, John Ross, and the band, under, University, Andor, and Company, will individually be ready to do their part in the line of march. A goodly crowd is assured this week, as the advance ticket sale has been heavy, and tickets are still running well. A front of L.S.U. boosters will not be on hand, it is reported, and the same should mark the greatest succes more than far in the cheering line.

This week's game—L.S.U. vs. Rice—will finish promptly at 3:30 p.m.
Two Green Owls Injured in Harding Returns;

The past week saw little change in the lineup of the Owls football team, with only one man being reported for practice. Coach Nicholson has a good first team for the game against Rice, and a lack of competent substitutes will be the least of his worries, since six men can be counted on to act as capable replacements.

Rice Tennis Team to Meet Oklahoma Here

Rice Institute is getting away to an early start in its season, and will play its first match on Thursday, October 22, against the Oklahoma Netmen in a double-bill program. Coach Nicholson has a good first team with a little help from the Freshmen, but a lack of competent substitutes will be the least of his worries, since six men can be counted on to act as capable substitutes.

Broken Thumb

Injuries will more than likely keep two valuable men out of the first game. Bob Storey, versatile end, re- signed with the team, and Sloan, a sophomore, as his replacement. Sloan was chosen yell master for the Freshmen, and will play against the Owls in the first game against Terrell.

Rice Men To Play Varsity Football Squad

This is what Coach John W. Heisman means to send his warriors out on the football field. The Owls are getting away to an early start in their season, and will play their first match on Thursday, October 22, against the Oklahoma Netmen in a double-bill program. Coach Nicholson has a good first team with a little help from the Freshmen, but a lack of competent substitutes will be the least of his worries, since six men can be counted on to act as capable substitutes.

Houston, Texas

Here's the L. S. U. bunch in their famous divided line formation, Coach Donovan's favorite trio. It may make the Owls sweet blooded. It may make the Owls sweet blooded.
