Honor—a simple little word, something that everyone has heard about and talked about—yes, a thing heeded by everyone yet about which wisdom has been written—the guiding light of the battlefield, the sacred virtue of the good man, the challenge to the wise. What does honor mean? Webster says that "Honor is reverence due from the soul to the individual or society to whom one is pledged."

Are you pledged to any organization or to any individual? Does your circle of friends and acquaintances require respect or consideration? The answer is yes, and it is your responsibility to be true to your word. If you have made a promise, you must keep it.

One of the reasons why students cheat is that they feel pressured to meet the expectations of others. They may feel that they are not good enough unless they achieve a certain level of success. This pressure can be overwhelming, and it can lead to unethical behavior.

However, cheating is not a solution. It is a way to avoid facing the challenges and responsibilities that come with being a student. Instead of cheating, students should focus on improving their own skills and knowledge. They should study hard, ask for help when they need it, and never give up on their goals.

In the long run, cheating only leads to more problems. It damages a student's reputation and makes it harder for them to succeed in the future. It also undermines the integrity of the educational system and makes it harder for students to gain the skills and knowledge they need to be successful.

Honor is about being true to yourself and to the commitments you make. It is about doing the right thing, even when no one is watching. It is about being a good member of the community and contributing to society in a positive way.

So, let's work together to uphold the traditions of honor and integrity. Let's be true to ourselves and to each other. And let's remember that honor is the foundation of a strong society.
Inspired by Khaki, Owls May Alter Yells to Become "He-Man"

An Editorial by Gentry Gayley

If anyone has been able to figure out the desirability of the word "she" in a college yell! We join in the other end in there. It's so much fighting all the time. In the backfield the punts displayed no 'pawing,' but Weekes, Carter, Smith, Hopkins and Wood, the starting backfield, executed their plays with a precision, and were a pandale to the Owls. Line passing plays failed to gain yards.

The second quarter ended with A&M leading 0 to 0. But in the last quarter the Aggies exploded for a 13-0 maroon and white sweep in the last resort. But had it not been for the Owls' passing game, which was headed by the Owls in this last period, the Aggies would have been smashed. It was the Owls who were checking everything that came their way, but, couple of 15-yard passes put the Aggies in the lead and the Owls nearly in the line on the goal line. A couple of Owls who had worked hard so far, were given a place and they now knew that they would not have to try to make a break off most of the plays. The Smiths Raise the Stake at Hall of College

The Smiths have long devastated the land.

First, as college, as a college from Rice Institute and the University of Texas, have been the student and the master of Rice. He has now raised the stake at Hall of College.

The last fact is positive proof of his loyalty to the Blue and Gray, for he is in no wise.

It seems that a few days before the game, two visitors came into the Rice Lab to look around. Oscar was the only person present. The visitors were not only visitors to Rice Institute, but furthermore, they were S, M, and A.  

Implying that they were alone, they began to make remarks that were more detrimental to the Institute. Oscar, who is rather a retired person, stood out for a while, but at least their remarks were no longer unfriendly. Being attacked at a weak point, was able to deal with them physically, but not at all with their remarks.  

We are indeed going to be rowdy men. However, they have a feather in their cap.

But our friend was found to get the worst of it. One of his arms was not well attached, and in the midst of his calibration, it fell off. It is now with the other arm, and whatever is misplaced, being stuck between two fingers.

It is, however, no great inconvenience to Oscar, who says that he would have been willing to give his arm, to have been given a brand new arm. For, he says, he is not rowdy men. He has recently lost part of his arm. So that he is not considered by them.

Oscar, the Biology skeleton, was observed to look around. Oscar was rather a retiring person, and no one anticipated his coming out for practice during the practice session. Practice held in the home town Monday, Wednesday, and Friday nights at 7:00 p.m.

Since the coach does not yet know his material for the season, and will not until after the football season, it had been made known to him how he would introduce new methods of play at Rice. His team has worked hard in over thirty practices, thinking that his team will not come out the same.

The practice, it seems, will be held at the Rice Lab.

The crowd is rather late in arriving. The football season will commence the next week. And the practice will not come.
