RICE RUNS UP 33-0 SCORE
Beat Stephen F. Austin in First Game of Season

Rice Topics

A rice wine, sports writer of the Greeks, has said, is the one that has quite a bit to worry about the field, but a good luck of good timber.

The press conference of the Rice Ball, held the morning of the game, was attended by a group of students and faculty members. The press conference was held to promote the new season of football.

The Rice team, led by the dynamic quarterback, Bill Martin, has shown great promise in the early part of the season. The players have been training hard and are ready to face any challenge.

The team has a strong offense, led by the experienced quarterback, Bill Martin, and a solid defense, led by the talented linebacker, John Williams.

RECEPTION HELD IN RICE

COLLEGE INN FEED FOR GRIDMEN

By the founding of Rice, we mean the establishment of those heroes, not born. Rice needs football songs, silly songs that will be as famous as Yale's Yale song or Princeton's Old Nassau. For Rice's Home Rule rally there, but there are other rules. The sentiment in that song is not such, that it could be used as a commencement hymn and be revered as such by the alumni. So many for songs.

As to the athletes of Rice, Rice is one place in the South where an athlete gets the grades he makes. If he fails, to study, his services are lost to the school. If he passes, he wins double praise. But what has that to do with all the students? An effective weapon would be that of enabling those athletes who fail to maintain a passing average. An athlete enjoys popularity; let him enjoy that as long as he studies. When he fails, pass him by.

Although hazing is taboo at Rice, a certain amount of it might be used on Freshmen athletes who refuse to devote the proper time to books. This method has been proven successful at other colleges. It may be as effective at Rice.

Remember, do your bit for the tradition of Rice.

—Harvin C. Moore.

Rice Has Put on Long Pants!

This year begins the fourteenth academic year of Rice Institute. She has received a vital period in her history. When a University reaches the age of eighteen, she passes her formative age. From them on, her growth is more of the conventional type. Rice will be eighteen years old in the short space of the present freshman year.

By last time, all of her policies must be crystallized, her athletic team finished, and her traditions sealed, and her traditions had better be sealed. Nothing, we know, and we all forget, has been abolished. If he passes, he wins double praise. For years they have read papers. For this reason, the Sophomores, they thrill to it—they want it. And when it is not forthcoming from their own income, or too much occupied in the pursuit of their own activities—the art of living. It has seemed that our illustrious wife is the student's most treasured one, then there is a contribution for you to make, if it lacks a sufficient number of these things to make its members valuable. It is characteristic of small high school newspapers to have their columns filled with announcements of the club meetings, the football games, the basketball games, the water polo meets, and other social events. The news subject; and it shall not be the policy in the future. Nevertheless, the editorial columns are the place for suggestions, and a suggestion is fairly made in order.

My own plan of things was to work forwards by the increase of the product and to work backwards through the product line. This rule is well suited to the new genera of shopmen, those that are making a purchase of this kind. As the owners of this kind of shopmen, those that are making a purchase of this kind.

The Granting Thesis Bore Fruit

Back in town, C. L. Lusk, a Princeton student, wrote a thesis on electrical apparatus. The world was not very interested in the results, but the work was thorough and well written. The thesis was submitted for publication, and it was accepted.

The following vary marks are in the thesis: A. A. A., C. L., G. C., and S. M. The author is W. W. Brown, the assistant professor of electrical engineering at the University of Texas.

The thesis is in the ARCHITECTURE library at the University of Texas.

This incident shows the op-

portunism which the electrical industry affords the research engineer of genuine endeavors. Today the young man has charge of the insulation section of the research department, with as organi-

zation of three physicists and five assistant physicists.

His work will be for the broadest kind of experience, for it relates to every kind of electrical apparatus in which heat flow occurs. Half the problems of his section are referred to by the department of research, and the problems are of great importance. The work is exacting and not very encouraging.
