For two years we, the co-eds, have been lady-like and quiet. This year we are merely lady-like, but in the days of yore when Rice was young and girls were duteous, our immature critics realized but dimly that a Problem was only a problem in a position of strength.

As is the case with the majority of our grades, the women of Rice are in a state of flux, and the men are making the most of it.

LEAVES FOR CHINA

Slaughter Dickens Fluent Knowledge of Chinese Language

Dr. J. W. Slaughter left the middle of the week for San Francisco, from which place he sails for China for a six months' tour. Dr. Slaughter, accompanied by his wife, plans to return to Houston in September to resume his classes at Rice.

When interviewed by a local class, Dr. Slaughter expressed his appreciation of having a class for even a short a class.

No special apology is needed here in the contest open to any undergraduate and graduate work within the state. Although prominent for this and the Chinese language, the contest open to any undergraduate or graduate work within the state.

The World's Loudest Voice

On the selling plains of South Schenectady, in several scattered buildings, is a vast laboratory for studying radio broadcasting problems. Gathered here are many kinds and sizes of transmitters, from the short-wave and low-power sets to the giant super-power unit with a 50- to 250-kilowatt voice.

Super-power and simultaneous broadcasting on several wave lengths from the same station are among the startling later-day developments in radio. And even with hundreds of broadcasting stations daily on the air throughout the land, those latest developments stand for still better service to millions of listeners.

Only five years old, yet radio broadcasting has developed from a laboratory experiment into a mighty industry. And albeit, keen young men have reaped the rewards.

But history repeats itself. Other electrical developments will continue to appear. And it will be the college man, with broad vision and trained mind, who will be ready to serve and succeed.

RICKER TELLS ABOUT WORK SUNDAY
Salt Dome Exploration Done By New Method
by ANDREE FALLIGANT

A social event of the previous evening, perhaps the result of attending an entertainment, was the wedding of Miss Sidney Holland-Ford and Mr. MacGregor at the Presbyterian church on the evening of April 16th. Mr. Ricker, of the Rice Oil Syndicate, was present as a guest. A headline in the Houston Post read: "Mr. MacGregor was present as a guest."

The problem of finding new oil fields in the West is one of the most challenging tasks facing geologists. The recent work done by Mr. Ricker in the Salt Dome Exploration has been a significant contribution to the field of geology.

The process involves the use of seismic waves to determine the location of salt domes and other geological features. This method is particularly useful in areas where drilling is risky due to the presence of salt and other subsurface obstacles.

**PRESTON-WINN**

Miss Mary Jane Prestons, who has been married to Mr. Winn, has come back from a trip to Europe. Mrs. Winn, who is a member of the Rice Symphony Orchestra, is due to appear the first week in May. The concert will be held at the Rice Auditorium.

**HALLAND-FORD**

The wedding of Miss Virginia Hall and Mr. Ford, which took place last week, is a significant event in the lives of the couple. The couple is planning to move to California after the wedding.

**REINHART-PAWERS**

Miss Virginia Reinhart, a former student of Rice University, is now living in New York City. She is currently working on a project that she hopes will bring her recognition in the field of art.

Gym girls are trying many sports
Plan on footer for Monday. Training Regular Work starts Monday.

The girls' gym class is interesting something new at Rice in the way of tennis. Many of them are finding the game fun, though it has a little difficulty to overcome. A lot of them are using tennis shoes and the others are playing in their regular gym shoes. It is generally agreed that playing tennis is much better than roller skating. Some of the girls on the tennis team have learned they don't like tennis at all and have dropped out.

Indoor baseball is becoming popular. It is believed that it will attract many more girls to the gym. At present the girls are practicing everything from a bouncing ball to a baseball bat. There is much speculation as to what will the final result be. It may not be too safe to say whether the girls will be playing baseball or softball.

For Best All Around Girl

For Pictures; Beg For Action

I'm very happy to report that the Freshmen and Sophomores have come out on time and if the classes are to be represented, students must have their pictures taken as soon as possible.

The course, offers excellent opportunities for those interested in recreational activities. Registration is still open, and students should not put off registering until next semester.
