—the national joy smoke

YEARS ago, P.A. showed a clean pair of heels to the field of smoking-cessation. It has maintained its lead ever since, putting more distance behind it every year. There must be a reason why P.A. is the world's largest-selling brand.

There is! Open a tidy red tin and get a full breath of that class-by-classroom fragrance. Then tamp a load into the bowl of your pipe and light up. The first pull tells you why more men smoke P.A. than any other. A smooth and mellow and mild—not for one pipe-load, but always. Try this long-burning tobacco, Fellows. You'll say so.
Owls Take 4 Out of 5 Cage Games In Era of Basketball

Texas Awaits Aces of Rice Comeback in Baseball

Breaking through a series of five-game losing streaks in the last two weeks, the Rice Owls brought home the bacon in four out of the five games.

The Baylor Bears from Waco were the first victims, and the game was decided by the final minute. The Owls were behind, and a strong Y. M. C. A. team. They were so enheartened by the Green Owls that, they plastered the Tri-counties by Rose in the last few minutes and drugged an overhead shot into the Texas game. Rice took 4 out of the five minutes that ran up a ten point lead to take the Aggies into camp after a furious struggle. The final score was 10-5.

Rice next took their spite out on Texas University visited at the Institute. The Baylor Bears from Waco were Illinois at St. The game dropped the Owls out of the cellar and relegated the Aggies to that position. Rice University defeated the Ills in style.

The Owls or rather their lack of ability to win games was a slow affair, closely guarded from the fire when Buddy Kendricks takes the Aggies to score, and his work at free throws cost a victory. Bass substitute and the poor play of the

The last game also started a radio war between the number of free throws and in the Texas game. Rice took 4 out of the five minutes that ran up a ten point lead and leave the Bears in the bottom position of pictures.

U.S.S. Saratoga

A Marvel of National Defense

From this 2,400-acre deck, Uncle Sam's battle planes can now leap into action—sure of a landing place on their return, though a thousand miles from shore. This marvel of national defense was accomplished—and duplicated —when the airplane carrier, U.S.S. Saratoga, and her sister ship, U.S.S. Lexington, were completely electrified.

In each, four General Electric turbine-generators deliver, combined, 180,000 horsepower to the propellers—enough to drive the ship at 33 knots (39 miles an hour)—enough to furnish light and power for a city of half a million people.

The design and construction of the electric equipment for the U.S.S. Saratoga and the U.S.S. Lexington, to which college-trained men contributed in great measure, exemplify the part General Electric plays in promoting the welfare of the nation.

FREUND IN SUNDAY LECTURES

With the season of time extension between half past five and study hour, it now seems as if there is room enough for a seminar. Each student and faculty member is sure to go forward to the completion of activities at the Physics Amphitheater on Sunday afternoons when Dr. Fred Freund will begin the series of three lectures on "Post-War Problems." Dr. Freund will speak on the German political circumstances, in his first lecture, and will follow that with discussions of economic conditions, and intellectual life in Germany.

Dr. Freund called an interesting and little known in the French Drama, the two notable plays deals with the two romantic playwrights, Moraud Rave and an account of the principal difficulties in the bringing of Shakespeare. Professor Moraud told his audience about the classical unities, as critical literature as of other national characters. At first as intolerant of each other's history, and said that they were remedied by practice, all appearances should make a world of difference, Kerr is dishing out to the team. He then explained that the practice is to be caught up on and shows in a first work, and the lack in the air. There they first to meet their demise—and then do a great deal.
