RAREST BRIDGE HAND
DEALD RICE STUDENT

THAT rare feat of building a bridge hand was accomplished yesterday by student James T. Lang, who holds the hand. The bridge was played with Mr. Lang and three other students, all of whom were members of the Student Congress. The bridge was played on the east side of campus, and the students were seated at a table in the Student Union.

“Rice” was the name of the production, which was written by Pro Fames A. H. and William Hart.

Y. W. Play Is Polled For Presentation

“Right You Are” will be the theme chosen for next year’s San Jacinto Tournament. The selection was made by the students of the Y. W. C. A. at a meeting held in the Student Union.

Pallas Athene Affair April 29 Is Outstanding

An annual dance of the Pallas Athene Library Society will be held at the University Club on April 29. The dance is open to all members of the society.

Approach of Spring Elections Brings Rumors of Mischief

Mischief MNELL FOR PRESIDENT

The approach of spring elections, as is so the case in the spring, has brought an increase in the number of students who are interested in the election. The present president, J. E. Smith, is expected to run for re-election, but at the time of this writing, there are no firm decisions as to the nominees for the various offices.

Outstanding play in the production was given by Mrs. James Healey, who has been appointed as the director of the play. Mrs. Healey is known for her skill as an actress and her ability to gain the decision.

BECKENBACH'S VICTORY OVER LEE. Tack Potter defeated Tom Barr and all the way. he being able to hold a tie, for Jack Norton who was unable to make a fast match.

Carlton's at the net. Schwartz managed to win the first set fought a little harder the C-S, 6-1 and 7-5.

Burke defeated Charles Puhler of Rice in a hard fought match by scores of 5-7, 6-2 and 6-1.

Beckenbach after dropping the first defeat Charles Puhler of Rice in straight sets.

The radio car, described last month, is now finished, or nearly so. There will be ample space for the backwardly inclined drivers, and most of these have already been ordered. There will be considerable interest in it.

The peppiest crowd of student engineers is to be shown, such as is used to have been present at a Rice Engineer's meeting. The Engineers have taken a special interest in the Society and many of these have already been ordered. There will be ample space for the backwardly inclined drivers, and most of these have already been ordered. There will be considerable interest in it.

Of course, we realize that very few of the fellows have any interest in smoking or in the discovery of a great social evil. We are convinced that the vast majority of the students will be shown, such as is used to have been present at a Rice Engineer's meeting. The Engineers have taken a special interest in the Society and many of these have already been ordered. There will be ample space for the backwardly inclined drivers, and most of these have already been ordered. There will be considerable interest in it.

What Shakespeare says about Coca-Cola

"Ever precise in promise keeping"
The point of Leo's remark is not what he said in itself, but what he said. It neatly describes Coca-Cola, for consider these facts
Pure as Sunlight
And the proof of its purity is in the testing. Twenty-two scientific tests, covering every step in its testing. Twenty-two scientific facts:

- Ever precise in promise keeping
- Drink Coca-Cola Delicious and Refreshing

You'll always feel your feet are well dressed—neat.... trim.... with style.

DOC BLINKUS SAVES HONOR OF SENIOR

By Dr. Theo Bald Blinkus

CLASS WITH TIMELY AID ON THRESHER

It is really quite incommunicadible to me how the farrier gets along during my absence. Just last Tuesday, as usual Wednesday morning, I was utterly impressed upon me just how indispensable my example and advice are to all the activities just how indispensable my example and advice are to all the activities.

My telescope has recently been returned to me for repairs by the unfortunate Myers. I cannot explain to you how this came about, but I am now sitting in my room without the telescope for the first time in several years. The repair was in connection with a mount which has been in my possession for several years and which I plan to use in my observatory.

On the other hand, there is nothing more difficult, as I prove to you, than to explain the nature of the telescope. It is a device for magnifying the image of objects. It is placed in the path of light so that the light will pass through it and be directed to a screen or paper. The image is formed on the screen by the light which has passed through the telescope.

In the case of my telescope, I have been able to work out the details of its construction. It is a refracting telescope, the light passing through the glass of the objective lens and being focused by the eyepiece. The magnifying power of the telescope is determined by the focal lengths of the objective and the eyepiece.

1 was finally recalled from the instance to my duties at the observatory. Being a gentleman of science, I am always occupied with the study of the stars and the planets. I have observed the positions of the planets as they pass through the constellations on my telescope. My observations are quite accurate and I have been able to make some interesting discoveries.
