Spiro, Forte, Eustice, Washburn, Banta, and Kane. Dr. Mott-Smith is on the preparations for next year's season. The chronological order of the performers will be chosen from this number to have the highest ranking. The following performances are on the preliminary schedule: Burt Arrington, Louise Moore, Margaret Davis, Marjorie Dunn, Eddy Espy, Susan Fraker, Frances Bau Goudes, Mary Louise Glue, Blake Marston, Miss Dolores Johnson, Hermine Luda, Frances McDaniel, Helen Moore, Marion H上年, Yvonne, Victoria, Chris.

Flu is Raritan on Rice Campus

The flu will get you if you don't watch out. Shaking through the streets, the lecture halls and the dormitories, the virus is moving directly and invading even the homes of those who are not students. The influenza and the feverish are in its wake, frightening the students and the faculty. Disease on the campus is on the increase, and there is a definite indication that it is due to the epidemic. Old days from make up one of the desires of this disease. It comes like a thief in the night and puts its mark on the skin without notice. There's nothing like variety.

FAVOURABLE MEETING AT DALLAS SATURDAY

Rothgeb and Gaylord Johnson To Address Meeting

Dallas, November 30 (Texas) - A scene of oration and discussion was presented at the recent Rice campus.

Dr. M. A. Stewart, of the biology department, was the principal speaker, and Mr. Taylor, the business manager, presented the news of the meetings on the campus.

Phi Beta Kappa Is Temporarily Organized Now

After several meetings during the last month of the executive committee of Phi Beta Kappa, it was decided to organize the chapter of Phi Beta Kappa, and to elect a chapter president.

Rally Club Men to Cheer in Section At All-Camp

A plan was formulated at the meeting to organize Phi Beta Kappa in the United States, and the result of a suggestion based on the idea of a social organization, was a. social organization, called the Rally Club.

CONQUEST OF FEAR IS FORUM TOPIC

Scottish Rite Cathedral Is Chosen for Meeting

The first announcement of Dr. Brown's lecture was given to the University Club on November 8. The second announcement of Dr. Brown's lecture was given to the Scottish Rite Cathedral, and the third announcement of Dr. Brown's lecture was given to the Arch Arts Ball.

Labors Head Talks to Rice Eco Class

Unions Are Organized for Peaceful Purposes

Two aspects of our national labor problems were related to students at Rice by Mr. D. A. Runion, chairman of the Rice Intercollegiate Union, in an address delivered to the class last night. The first announcement of Mr. D. A. Runion's speech was Dr. Louis B. Ritter, who in a speech given to the University Club on November 7, 1938, said: "If we look at the problem in a righteous manner we will continue to change to the Scottish Rite Art Grand.

NEW FRAT PLANNED BY RICE ARCH-ARTS

Tentative Arrangements Are Made for a Recent Society

Plans for the chartering of another new fraternity at Rice are being pursued, and the organization, which will be known as the Rice Art-Scholarial Society, was announced in a recent society of the Rice Art-Scholarial Society.

The first announcement of Dr. Brown's lecture was given to the University Club on November 8. The second announcement of Dr. Brown's lecture was given to the Scottish Rite Cathedral, and the third announcement of Dr. Brown's lecture was given to the Arch Arts Ball.

Collegians Replace Letter Awards

The Collegians, who in conjunction with the Arch Arts Ball, were awarded the letter awards at the University Club. The Collegians, who in conjunction with the Arch Arts Ball, were awarded the letter awards at the University Club.

Mr. Williams Talks

Mr. George Williams, a member of the English faculty, has been appointed to the American Studies Center, at the University of Pennsylvania, and was awarded the letter awards at the University Club.

On October 11, 1938, Dr. Louis B. Ritter, who in a speech given to the University Club on November 7, 1938, said: "If we look at the problem in a righteous manner we will continue to change to the Scottish Rite Art Grand."

CO-ED CORA REMARKS

At the dance held Thursday night in the Student Union Building, the co-ed Cora remarks were made by an English faculty member who in a speech given to the University Club on November 7, 1938, said: "If we look at the problem in a righteous manner we will continue to change to the Scottish Rite Art Grand."

Rain, rumble seats, University Club, alumni, Rice-Strake field, good game, bold things — the setting for the four hundredth and last regular alumni dance.

Alumni Pledges Toward Building Total $26,870.50

The Alumni Endowment Fund and the Alumni Pledge Fund received the prominent place in the introductory remarks of the New Alumni Association at the recent meeting of the Rice Alumni Association.

Wellesley Gilbert, secretary of the association, pledged his forces as well as Paul and Phil.

Toward Building the new gymnasium, a meeting will be held in the University Club, Thursday, December 7, 7:30 p.m. Plans for the banquet, which will be held in the University Club, Friday, December 8, 7:30 p.m., and for inviting the letter men and coach- ers, will be discussed.

The Alumni Endowment Fund and the Alumni Pledge Fund are both under the same board of directors, with the same principal source of revenue. The board of directors is composed of the officers of the alumni association, the president of the university, and a representative from each of the principal cities from which students of the university come. The board of directors has the power to make and authorize loans to the university, to make gifts to the university, and to make contributions to any educational institution.

The alumni association is the oldest of the educational institutions in the United States, and it is the oldest of the educational institutions in the world. Its history goes back to the early days of the university, when a group of students, led by a man named Daniel Webster, decided to organize an educational institution.

The alumni association is the only educational institution in the United States that is exclusively for the benefit of alumni. It is a democratic institution, and it is governed by the alumni association.

The alumni association is the most important educational institution in the United States. It is the most important educational institution in the world. It is the most important educational institution in the history of the world.

GIFT SHOPPING

Is World Shopping at Levy's

You shop up and down the avenues of the world when you shop for gifts at Levy's. You return from a day of shopping at this store with more than just gold and more highly admired than many people have at the end of extended world tours. You can purchase gifts for a family reunion... from the remote island of far away China and India and you return with the treasure work of each country... with things whose formula have been family secret for generations whose artistry cannot be confounded with things created for this commercial world. It's smart to give gifts from Levy's.

High Pressure

The Thanksgiving game opened with Ed Fisher's pitching. But with a 2-2 tie, his day didn't last that long, however, because they were leading, 2-0, in the bottom of the fifth inning.

Football seemed to be heavy. It was said that the players were too busy to concentrate on the game.

Chemists Plan Schedule For Seminar Course

The Chemistry Seminar of the Mechanical Engineering Department will be held on Tuesday, March 9, in the Chemistry Building. It is open to the public, and all are welcome to attend.

Dr. Kerner Undergoes A Minor Operation

Dr. Kerner underwent a minor operation at the hospital. He is expected to recover quickly and resume his normal duties shortly.

Engineers With Cash And Courage Take All

Ernest Ross' flying party Saturday was a pleasant surprise. The group, consisting of six local men, decided to go on a short trip to the countryside.

The following schedule has been prepared for the Engineering Section.

Thursday night. Eight-thirty. Long, steady pace. We passed in the Amazon region to be used for insulation.

Friday—Mr. Richter: The Chemical Theory of Narcosis.

Saturday—Mr. J. L. Hartsook: Chemical Theory of Narcosis.

Sunday—Mr. M. L. Hartsook: The Chemical Theory of Narcosis.

Last Friday's conclusion was that sugar? The reason for this?

There are more independent talkers in the engineering courses, including Hodgson, who has a singular success, showing an excellent grasp of the subject, it is even possible to appoint the editor of Chemical Engineer.

Mr. R. J. Cummins Addresses

Mr. R. J. Cummins addresses the Engineering School.

He said two or three months ago he thought that a solid injection was being made in the direction of the engineers' view of the movie.

The picture shows that the engineers are becoming more and more interested in the subject.

"What is that sugar?" said Mr. J. L. Hartsook, wondering.

It was the earnest suggestion of Mr. J. L. Hartsook that sugar was the subject. "What is sugar?" he asked.

"It's the stuff that makes you hungry," replied Mr. J. L. Hartsook.

"I never knew there was such a thing," said Mr. J. L. Hartsook.

"It's the sugar in the tea," said Mr. J. L. Hartsook.

"Why do we put sugar in the tea?" asked Mr. J. L. Hartsook.

"To make it sweeter," said Mr. J. L. Hartsook.

"But what is sweetness?" asked Mr. J. L. Hartsook.

"Sweetness is a property of sugar," said Mr. J. L. Hartsook.

"What is a property?" asked Mr. J. L. Hartsook.

"A property is a characteristic of a substance," said Mr. J. L. Hartsook.

"What are the properties of sugar?" asked Mr. J. L. Hartsook.

"Sugar has the properties of being sweet, being brown, and being crystalline," said Mr. J. L. Hartsook.

"What is crystalline?" asked Mr. J. L. Hartsook.

"Crystalline means that sugar is made up of small, solid pieces," said Mr. J. L. Hartsook.

"Can we see these pieces?" asked Mr. J. L. Hartsook.

"Yes, we can see them," said Mr. J. L. Hartsook.

They were small, white, and shiny. They were called sugar crystals.

"What is the function of sugar?" asked Mr. J. L. Hartsook.

"Sugar is used in cooking," said Mr. J. L. Hartsook.

"Where do we get sugar?" asked Mr. J. L. Hartsook.

"We get sugar from the sugar beet," said Mr. J. L. Hartsook.

"What is a sugar beet?" asked Mr. J. L. Hartsook.

"A sugar beet is a large, green plant," said Mr. J. L. Hartsook.

"What does a sugar beet do?" asked Mr. J. L. Hartsook.

"A sugar beet produces sugar," said Mr. J. L. Hartsook.

"How do we get sugar from the sugar beet?" asked Mr. J. L. Hartsook.

"We extract the sugar from the sugar beet," said Mr. J. L. Hartsook.

"What is extraction?" asked Mr. J. L. Hartsook.

"Extraction is the process of removing sugar from the sugar beet," said Mr. J. L. Hartsook.

"What is the process of extracting sugar?" asked Mr. J. L. Hartsook.

"The process of extracting sugar is called "sugaring," said Mr. J. L. Hartsook.

"What is sugaring?" asked Mr. J. L. Hartsook.

"Sugaring is the process of separating sugar from the sugar beet," said Mr. J. L. Hartsook.

"How do we separate sugar from the sugar beet?" asked Mr. J. L. Hartsook.

"We separate sugar from the sugar beet by using a separator," said Mr. J. L. Hartsook.

"What is a separator?" asked Mr. J. L. Hartsook.

"A separator is a machine that separates sugar from the sugar beet," said Mr. J. L. Hartsook.

"How does a separator work?" asked Mr. J. L. Hartsook.

"A separator works by using centrifugal force," said Mr. J. L. Hartsook.

"What is centrifugal force?" asked Mr. J. L. Hartsook.

"Centrifugal force is the force that acts on an object when it is rotated," said Mr. J. L. Hartsook.

"How does centrifugal force separate sugar from the sugar beet?" asked Mr. J. L. Hartsook.

"Centrifugal force causes the sugar to be thrown out of the sugar beet," said Mr. J. L. Hartsook.

"What is held out of the sugar beet?" asked Mr. J. L. Hartsook.

"Sugar," said Mr. J. L. Hartsook.

"Where is sugar held?" asked Mr. J. L. Hartsook.

"Sugar is held in a container," said Mr. J. L. Hartsook.

"What is a container?" asked Mr. J. L. Hartsook.

"A container is a vessel that holds sugar," said Mr. J. L. Hartsook.

"What is the process of holding sugar?" asked Mr. J. L. Hartsook.

"The process of holding sugar is called "holding," said Mr. J. L. Hartsook.

"What is holding?" asked Mr. J. L. Hartsook.

"Holding is the process of storing sugar," said Mr. J. L. Hartsook.

"How do we store sugar?" asked Mr. J. L. Hartsook.

"We store sugar by using a storage tank," said Mr. J. L. Hartsook.

"What is a storage tank?" asked Mr. J. L. Hartsook.

"A storage tank is a vessel that holds sugar," said Mr. J. L. Hartsook.

"What is the process of storing sugar in a storage tank?" asked Mr. J. L. Hartsook.

"The process of storing sugar in a storage tank is called "storage," said Mr. J. L. Hartsook.

"What is storage?" asked Mr. J. L. Hartsook.

"Storage is the process of keeping sugar in a storage tank," said Mr. J. L. Hartsook.

"How do we keep sugar in a storage tank?" asked Mr. J. L. Hartsook.

"We keep sugar in a storage tank by using a storage tank," said Mr. J. L. Hartsook.

"What is a storage tank?" asked Mr. J. L. Hartsook.

"A storage tank is a vessel that holds sugar," said Mr. J. L. Hartsook.

"What is the process of keeping sugar in a storage tank?" asked Mr. J. L. Hartsook.

"The process of keeping sugar in a storage tank is called "storage," said Mr. J. L. Hartsook.

"What is storage?" asked Mr. J. L. Hartsook.

"Storage is the process of keeping sugar in a storage tank," said Mr. J. L. Hartsook.

"How do we keep sugar in a storage tank?" asked Mr. J. L. Hartsook.

"We keep sugar in a storage tank by using a storage tank," said Mr. J. L. Hartsook.

"What is a storage tank?" asked Mr. J. L. Hartsook.

"A storage tank is a vessel that holds sugar," said Mr. J. L. Hartsook.

"What is the process of keeping sugar in a storage tank?" asked Mr. J. L. Hartsook.

"The process of keeping sugar in a storage tank is called "storage," said Mr. J. L. Hartsook.

"What is storage?" asked Mr. J. L. Hartsook.

"Storage is the process of keeping sugar in a storage tank," said Mr. J. L. Hartsook.

"How do we keep sugar in a storage tank?" asked Mr. J. L. Hartsook.

"We keep sugar in a storage tank by using a storage tank," said Mr. J. L. Hartsook.

"What is a storage tank?" asked Mr. J. L. Hartsook.

"A storage tank is a vessel that holds sugar," said Mr. J. L. Hartsook.

"What is the process of keeping sugar in a storage tank?" asked Mr. J. L. Hartsook.

"The process of keeping sugar in a storage tank is called "storage," said Mr. J. L. Hartsook.

"What is storage?" asked Mr. J. L. Hartsook.

"Storage is the process of keeping sugar in a storage tank," said Mr. J. L. Hartsook.

"How do we keep sugar in a storage tank?" asked Mr. J. L. Hartsook.

"We keep sugar in a storage tank by using a storage tank," said Mr. J. L. Hartsook.
