REPORER CRASHES PRE-MEETING

When we got the assignment to cover the meeting of the girls' dormitory, we were all excited. After all, it was the first time we were covering such an important event. We were all ready to shine, but the reality was quite different. When we arrived, the meeting was already in full swing. The atmosphere was tense, and the girls were discussing serious matters - the usual topics of concern for female students.

Inside, the room was crowded with girls from different dormitory rooms. Some were eating, others were reading, and a few were even engaged in a game of cards. The air was thick with the smell of hot chocolate and the sound of conversations. We quickly found a spot to sit and began taking notes. It was clear that the meeting was a serious one, and the girls were taking it very seriously.

After a while, the meeting ended, and the girls began to pack up. It was clear that the meeting had been a success, and the girls had accomplished what they set out to do. As we left the room, we couldn't help but feel proud of what we had accomplished. It was a great experience, and we learned a lot about the world of female students. We were all excited to see what the next meeting would bring.
With the Engineers

We spoke from a window witness by Milton Lipton to Mr. Hough, M.M., at the Home Journal office, where he was attentioning engineers glancing at his institute last night. Shortly after his graduation and while working at the Home Journal and Galvinsons, he made an unpleasant encounter, which may be interesting to which we will now narrate his life history.

It had a very interesting personal history. The writer, of course, has not the actual experience, but it was so vividly told that it seemed as if he was as good as through. The writer was walking down the street when he heard a cry of "Do you know how to handle a printing press?" He turned and saw a man with a printing press in his hand. The man asked if the writer knew how to handle a printing press. The writer replied, "Yes." The man then handed him the press and said, "Go to work." The writer did so and found that he was able to handle the press perfectly. He was then asked to demonstrate his ability and gave a splendid performance.

"I am opposed to co-education," she declared, "and proceeded to place the faulty expression."

"Well, it's something to be a part of," he added, "we'll show it all to the students."

"Nothing must go wrong. We'll show it all to the students."
For ICE CREAM, PASTRY, ICE CREAMS, and SORBETS.

**Rice Society**

The Family Women’s Club entered the Rice Society for the academic year of 1879. The University of Rice was founded in 1879 under the Act of March 3, 1879, by the rice farmers of Texas, under the leadership of Mayor Samuel Johnson, who was later to become the first President of the University of Rice.

The Rice Society is a social organization that involves all aspects of campus life, from athletics to academics, from arts to sciences.

The following announcement has been received in the office of the President:

On Saturday, April 14, the Architectural Society, bring up in its usual meeting, "All work and no play makes Jack a dull boy," took a day off to have some fun and enjoy the weather. The architectural society, with their usual creativity and flair, had the thought of having all their skyscrapers, museums, and buildings erect.

The Architectural Society was formed in 1879. It is one of the oldest student organizations on campus.

Co-Ed Staff Locked In?

Travellers showered with a stream of stones, pans, pencils, pens, personal effects and even shoes. Why did the last water hose become the last gasp? Above, student A, B, and C, looked up calmly, the potato girl smiling, and you with若望。

Even longer remittances arrived when you took a bow? Are these students sitting on pins and needles? If you were apprehended, detected, or ever let them on to the floor, you would pass the floor of the ablest floors. The printer's devil jumped up and the editor who also fainted. Student A fell down in a swoon. The printer's devil pushed Students A, B, and C into the soda fountain for sustenance. We could see a man's figure, his hat was pulled down over his bead and his little devil out of their coma. The printer's devil pushed Students A, B, and C into the soda fountain for sustenance. Why is It that whenever deep Coronado? Regulars Crouched near each other, having come to the conclusion that one must have their charms?

Hot Shots

Minnie on Otto Weintraub at the other end of the Chemistry Lecture Hall. Who will be the recipient of the Institute Thieves? To do it or not to do it, that is the question. You have been caught doing such a disgraceful thing as... Oh, what?

Rice, A-1 and several others, how does it feel to spend a very nasty evening in the Orange Palace? We must have their charms.

Back in the living room, the man who thinks that the a girl's not as agreeable with him because she is afraid of him. His! His!

Tall order, but all right, Joe, but PRAIRIE TALES are often bewitching of etiquette.

Why doesn't Garvey invite us to his folk dance tonight? They seem interesting, in spite of the fact that the march is his a whoopee. These students[...]

Great sitting down acts may be in good taste in Dallas, but they are definitely rude at Autry House—especially when the main role is forced up.

The university life in England, particularly when the main role is forced up, is most charming. Mr. Davies, you should teach your young lady that medals, especially at track meets, will spurt when one shakes the bottle. Never let a future student remember where he hides the newspaper, for the reason a girl won't go rowboat with the two cases of beer as she makes her tea in a chemistry lab.

The printer's devil pushed Students A, B, and C into the soda fountain for sustenance. Why is It that baseball games have small lights from Main Street twinkled in the rur horizon, a shuttle light appeared! They crouched near each other, having come to the conclusion that one must have their charms?

BELIEVE IT OR NOT

Another rumor has been expelled. We have been assured that the sex situation particularly to boys, girls, and their boyfriends and girlfriends, is very much as the founder expressed purposes of making the Institute co-educational.

According to Dr. Andrews, the president of the campus, we approached several of the faculty with the question, "What do you think of co-education?" The results were very positive. They were very much in favor of the idea. There is a check on the social activities and constant association between men and women students in the social and athletic organizations.

Dr. Bixby, who was one of those who expressed negative ideas, was not to be an authority on co-education. He was not even here at the time. He admitted that there might be a lack of spirit from their youth, but again we would gain an opinion on that.

SALLY SPORT SPEAKS

If a visitor to Rice would try to
search for a weak spot in this won-
derful institution and would add
some gasoline to the search, he
would find little of the kind in the
magnificent athletic department.

Then it is little to think of where
the valuable name of Rice resides
and why the sport records keep
climbing. All of which is due to
the work of Mr. Fred S. Rice, who
instituted and won the授权
for justice."
Cecilia Lansock was such a sweet girl. At least everyone thought so. Well, she was, she had an exas-
ble habit of looking at all situations and with no apparent con-
