Just Naturally Good

Good tobaccos... made good by Nature, not by "artificial
treatment." That's the secret of OLD GOLD's goodness

A chef may be able to make a doubtful snack taste good by artificial flavoring and season... But it's still dangerous to your stomach.

So it is with cigarette tobaccos. "Heat-treated" is useful for flavor and aroma... It works because the leaf machinery is programmed for a specific temperature and humidity and the leaf is held in that "state" for a minimum of 24 hours. But the "heat" is not dry heat... it is treated by artificial means.

BETTER TOBACCO makes them smoother and better... with "not a cough in a cornfield."
