By Harvey Rose

With all manner of flour polished on their faces and with teeth well aligned for smiles, the women of "Our Women's League" and the "Philosophical" Socials on Thursday night set a take of Lifebuoy soap into the Physics department to give their clothes a thorough wash. For the first time in the history of the school, the "Philosophical" Socials and the "Our Women's League" under the direction of Miss Beth Elkins, combined on Thursday night to give their clothes a thorough wash as they enter the year with their slogan, "Clean in the Classroom, Clean in the Hall, Clean in the Gymnasium." The wash was done inside the Physics department and was attended by the students of the "Our Women's League" and the "Philosophical" Socials. The wash was done in a large wash tub that was filled with Lifebuoy soap and water. The clothes were soaked in the soap and then washed and wrung out. The clothes were then hung on a line to dry. The "Philosophical" Socials and the "Our Women's League" are planning to continue their washes throughout the year in order to keep their clothes clean and to show their appreciation for the work of the "Our Women's League." The wash was done in a large wash tub that was filled with Lifebuoy soap and water. The clothes were soaked in the soap and then washed and wrung out. The clothes were then hung on a line to dry. August Tells A. S. M. E. Members of Steel Foundry

Professionals of Chicago University to Speak Here Next Week

Dr. Arthur H. Compton to Tell What Things Are Made of: What Light Is, and to Explain How Race Is Made Fastest

Dr. Arthur H. Compton, professor of Physics at the University of Chicago, will present a series of lectures to the members of the American Institute of Mining Engineers at the home of Mrs. J. M. Glass, 2755 Royal Street, on March 9. The lectures will be held at 7:30 p.m., and will be open to the public. Dr. Compton is the author of several books on physics, and his lectures will be based on his latest research. The first lecture will be on the subject of light, and will be given on March 9. The second lecture will be on the subject of race, and will be given on March 10. The third lecture will be on the subject of the universe, and will be given on March 11. The fourth lecture will be on the subject of the atom, and will be given on March 12. The fifth lecture will be on the subject of the nucleus, and will be given on March 13. The sixth lecture will be on the subject of the electron, and will be given on March 14. The seventh lecture will be on the subject of the proton, and will be given on March 15. The eighth lecture will be on the subject of the neutron, and will be given on March 16. The ninth lecture will be on the subject of the neutrino, and will be given on March 17. The tenth lecture will be on the subject of the antiproton, and will be given on March 18. The eleventh lecture will be on the subject of the antineutrino, and will be given on March 19. The twelfth lecture will be on the subject of the antineutron, and will be given on March 20. The thirteenth lecture will be on the subject of the antineutrino, and will be given on March 21. The fourteenth lecture will be on the subject of the antineutron, and will be given on March 22. The fifteenth lecture will be on the subject of the antineutrino, and will be given on March 23. The sixteenth lecture will be on the subject of the antineutron, and will be given on March 24. The seventeenth lecture will be on the subject of the antineutrino, and will be given on March 25. The eighteenth lecture will be on the subject of the antineutron, and will be given on March 26. The nineteenth lecture will be on the subject of the antineutrino, and will be given on March 27. The twentieth lecture will be on the subject of the antineutron, and will be given on March 28. The twenty-first lecture will be on the subject of the antineutrino, and will be given on March 29. The twenty-second lecture will be on the subject of the antineutron, and will be given on March 30. The twenty-third lecture will be on the subject of the antineutrino, and will be given on March 31. The twenty-fourth lecture will be on the subject of the antineutron, and will be given on April 1. The twenty-fifth lecture will be on the subject of the antineutrino, and will be given on April 2. The twenty-sixth lecture will be on the subject of the antineutron, and will be given on April 3. The twenty-seventh lecture will be on the subject of the antineutrino, and will be given on April 4. The twenty-eighth lecture will be on the subject of the antineutron, and will be given on April 5. The twenty-ninth lecture will be on the subject of the antineutrino, and will be given on April 6. The thirtieth lecture will be on the subject of the antineutron, and will be given on April 7. The thirty-first lecture will be on the subject of the antineutrino, and will be given on April 8. The thirty-second lecture will be on the subject of the antineutron, and will be given on April 9. The thirty-third lecture will be on the subject of the antineutrino, and will be given on April 10. The thirty-fourth lecture will be on the subject of the antineutron, and will be given on April 11. The thirty-fifth lecture will be on the subject of the antineutrino, and will be given on April 12. The thirty-sixth lecture will be on the subject of the antineutron, and will be given on April 13. The thirty-seventh lecture will be on the subject of the antineutrino, and will be given on April 14. The thirty-eighth lecture will be on the subject of the antineutron, and will be given on April 15. The thirty-ninth lecture will be on the subject of the antineutrino, and will be given on April 16. The fortieth lecture will be on the subject of the antineutron, and will be given on April 17. The forty-first lecture will be on the subject of the antineutrino, and will be given on April 18. The forty-second lecture will be on the subject of the antineutron, and will be given on April 19. The forty-third lecture will be on the subject of the antineutrino, and will be given on April 20. The forty-fourth lecture will be on the subject of the antineutron, and will be given on April 21. The forty-fifth lecture will be on the subject of the antineutrino, and will be given on April 22. The forty-sixth lecture will be on the subject of the antineutron, and will be given on April 23. The forty-seventh lecture will be on the subject of the antineutrino, and will be given on April 24. The forty-eighth lecture will be on the subject of the antineutron, and will be given on April 25. The forty-ninth lecture will be on the subject of the antineutrino, and will be given on April 26. The fiftieth lecture will be on the subject of the antineutron, and will be given on April 27. The fiftieth and final lecture will be on the subject of the antineutrino, and will be given on April 28. The lectures will be given in the Morning Chapel, and will be open to the public.

CHRISTINE POPE

DRAMA CLUB WAS COURAGEOUS IN TRYING TO INCORPORATE

By Mrs. H. WELLS

Instructor in English

A few weeks ago, the Drama Club of Rice decided to incorporate. This is a step in the right direction. The Drama Club has been successful in the past, but incorporation will give it more security. It is important that the arts and sciences be given equal opportunities. The Drama Club has always done its best to cooperate with the other organizations on the campus.

CLEO L. REES JOHNSON

PLAYING TO A HALL Empty.

The Drama Club has just formed itself into a corporation. This is an important step to secure its continued existence.

By its By-laws, the corporation is to have a maximum number of 100 members. Any student of the University may become a member. The principal consideration in granting membership will bemerit. The corporation will have a president, vice-president, and secretary. The meetings will be held at 7:30 on Thursday evenings.

By the By-laws of the corporation, the annual fee of $1 must be paid by each member. This is added to the membership fee. This fee is intended to secure the financial stability of the corporation. Without a financial basis, it is impossible for the corporation to exist.

The corporation is authorized to borrow money, to purchase property, and to do all acts necessary and proper to carry out the purposes for which it is organized. It is to have all necessary authority to act for the corporation in all things.

The corporation is to be dissolved when it shall cease to have a purpose or no members.

The corporation is authorized to elect its officers with the power to otherwise control the affairs of the corporation. It is to elect directors to manage and control the affairs of the corporation.

The corporation shall indemnify and hold harmless any officer, director, or other person who shall be made a party to any suit, action, or proceeding by reason of any act or omission by it or of any such officer, director, or other person.

The corporation shall have a seal, which shall be kept, care of the corporation, and the same shall be used by the corporation, and the same shall be used in the name of the corporation and in the right of the corporation, to execute all necessary instruments and deeds.

The corporation is authorized to make donations as its By-laws may provide.

BARRIER CLUB

Rice's first dramatic society is called the Barrier Club. It is the first society of its kind at Rice. The Barrier Club was formed by a group of students who are interested in drama. They desire to have a club of their own, away from the official college society. They believe that drama is an important part of education and should be encouraged at Rice.

The club will hold its first meeting on Thursday evening at 7:30. It is open to all students. No membership fee is required. The club will hold its first meeting in the Student Union Building.

A NATION-WIDE SYSTEM OF INTER-CONNECTING TELEPHONES

Industry takes a hint from the kitchen

The domestic art of baking is clearly perilous to telephone manufacture at present. Electric, where plastic molding is an exact science. Telephone bell boxes, for instance, are no longer formed of metal. They are molded from shaped plastic material made of the usual carbonic acid, formaldehyde and other ingredients. After the plastic is solidified, electric engineers see the way to make a better product at lower cost. These men developed new and inexpensive type of plastic molding process— and determined precisely how to blend the mixture and the exact temperature to use. In quickly taking advantage of the new art, Bell System engineers were once more showed that they have the kind of thinking that keeps America industry forging ahead.

JUNIORS FAVORED IN INTERCLASS TRACK MEET

Percy Burk, Leading '33 Men, Expected to Cop First Shot Put Honors
Ray Harbour and Weidon Hale Injured—Howell Foy Substituted in the Hammer.

The annual Interclass athletic games will be held this afternoon and Saturday, on which day various track and field events of the Rice Institute Athletic Association will be presented by members of the pre-competitive freshman class. Always this meet provides the most color of early spring athletic competition, for intense spirit is shown between members of Coach Ernie Hjertberg's teams. Juniors are favored in the Interclass meet.

No competition will be given to the high jumpers; Norman Holcomb, Alice Pearson, leading distance runner, is due to compete due to injuries, and sophomore, Edward Purtell, in the long jump. Gene Chambers and Dick Harbour, in the 440-yard dash, 4 X 110 relay, pole hurdles (preliminaries), 220-yard dash, and two field goals by Reynolds give the junior meet the edge at the first half. In the triple jump, the second half will start with Frank Ehlert, who made good two beautiful baskets. Nonetheless, the meet won the pole vault, broad jump in his attempt, garnering points here for Hale in line.

Junior sprinter, Fred London, and Harold McCall, are in charge of the distance and middle distances. These richly flavored Turkish tobaccos are added with a generous hand. Anyone wishing to make one smoke with good form should try the rich, medium Virginia blend. Both Ray and Haleput will carry the race, of the 440-yard dash, with great expectations, going good and wholesale, due to injuries and injuries, which will make the race a good one.

The junior meet, due to injuries, will be held this afternoon, with the final running of the second meet on Saturday. If your smoke is not up to par, you are not going the way they TASTE...
