Mayor Monetie, Wells Open Seventh Biennial Engineering Show at 2 p.m.

Some Exhibits and Principals in Engineering Show Opening This Friday on Rice Campus

Scientific Devices Will Be Featured

Photographic Cell Sells Off Wholesome Announcing Start Of Great Health Exhibit

By ELLIS A. TURNER

The Seventh Biennial Engineering Show, annual event here today, opened with a display of scientific devices of all sorts. One of the most interesting exhibits was a device, in which is contained an automobile which operates upon external electricity alone. This automobile is the property of Mr. John W. M. King, owner of the "J. W. M. King Electric Co.," and is considered one of the most important exhibits of the show.

Leading Conference, Owls To Play Champion Aggies Friday-Saturday

With the conference champions determined by a tangle of a match three years ago, Rice Owls today determined to keep the lead in the series, and to give the team a chance to see a close two-game battle this year. The Owls met this challenge and defeated the Aggies in the first game, 15-13. The Owls have a fine record in this series, having won 13 of the last 15 games played.

Today's game was a close one, with the Owls winning by only two runs. The Aggies were outscored by the Owls in each inning, but the Owls had a lead of only one run in the ninth inning.

Slasher Tells Galveston Women Unemployment Results

Dr. W. B. Rawlinson, executive in charge, made the following statement before the members of the League of Women Voters of Galveston, Saturday, April 16, on "Social Consequences of Unemployment." The statement was published in the newspaper.

"The problem is one of the most pressing in our day. It affects every family, every community, and every nation. It is a problem of immediate and pressing significance. It is a problem of great depth and complexity. It is a problem that requires the immediate attention of all who are concerned with the welfare of our people."

The statement continued:

"The problem is one of the most pressing in our day. It affects every family, every community, and every nation. It is a problem of immediate and pressing significance. It is a problem of great depth and complexity. It is a problem that requires the immediate attention of all who are concerned with the welfare of our people."

The statement concluded:

E.E.'s Remodel Radio Car, See "Bean Sorter"

BY E. E. RASTA

The Electrical Engineering depart-
ment, for the past few months, has been
working on an unmanned radio car for the
MCE campus. The radio car is equipped
to stop on demand. It is controlled from
a radio station located one mile from
the car. The car is equipped with a whistle
and a siren to warn those near by.

Many Happy Returns—

229.\n
Las Vegas Model Now at MCE

A new laboratory of electronics has been
opened at MCE, mainly for the course in
electronics. The laboratory is to be
opened to the students on a first come
first served basis.

Operation of StockExchange Is Interesting

BY HERMAN KLEIN

Department Manager

The Engineering show, this year, is
especially interesting. The exhibit
will be displayed in the \$250,000
building. The exhibits are from various
departments of the engineering school.

Ralph Jones Leads Owl Batsmats, Hitting .532

With eight hits in fifteen at bats, Ralph Jones, second
baseman of the Owls, has been leading the team in
batting.

 ORNAMENT, ART, WATER COLOR, DESIGN SHOWN

By Paul Robers

At last Monday's meeting of the Rice
Student chapter of the Architectural
Dept., the Architectural department
was given to the students of the
Architectural department.

Concentrating among young engineers on
the electrical field, this exhibit
will be open to the public on April 21.

Embryology and Main Exhibit of Biology Dept.

By W. C. BROWN

Exhibits which the biology department of the school will show will consist of the more interesting animals from smallest to largest, and of certain peculiar phenomena in the evolution of the individual and the race. Much material has been especially prepared in the past few years by the students of the school.

Embryology, the science which is connected with life processes, is an early stage of its development, and are some of the highlights of the department's exhibits. The materials will be shown in their natural state. A model of a circus snake charmer will be shown along with the model of a red rock chimney. Besides, there will be an exhibit of a small scale model of 1 to 400 of one of the tricks of the circus.

Public will have an opportunity to see such things as blood vessels, bones and teeth, the stamens of flowers, and the structures of embryos. The department has recently acquired an exhibition from the British Museum showing such an exhibit. The exhibit consists of a variety of stages of embryos from several species of vertebrates, including man, shown in their natural state.

With this in mind, the Southern Pacific system is installing two different sets of equipment. The new set is to be used in Pullman on payment of the monthly Pullman charge, whereas the older set will be used for passengers on regular Pullman charge. Europe has an advanced model of the Red Rock chimney.

Kramer, Simpson, With Acheson, Barry Arrive in French Club Play

Many Hours of Work Spent in Preparations

By HENRY G. WELLS

General Manager

For the past several weeks there has been an indefatigable and enthusiastic activity among the workers. The building has been very busy with preparations for the opening.

The employees have worked long hours to ensure a successful event. The effort has been relentless, with everyone contributing their part.
