Scott Talks To Engineers

Humble Company Production Engineer Discusses Many Problems of His Field

In a recent lecture, Humble Company production engineer Scott discussed the various challenges faced by engineers in the oil industry. From the practical aspects of drilling and production to the more theoretical aspects of petroleum engineering, Scott's presentation covered a wide range of topics. The audience was particularly interested in the engineer's insights on the impact of technology on the industry, as well as his views on the future of oil exploration.

Sophomore Shovels Coal, Stows Away To See World

A sophomore at the University of Texas recently discovered a new way to see the world. By shaving his head and stowing away on a freight train, he was able to travel across the country and experience a different perspective on life. The student's daring act has sparked a debate among students and faculty about the role of creativity and risk-taking in the educational experience.

Methodist Youth Join War Strike

New York, Feb 9 (Globe)—Monthly meeting in New York City, the Executive Committee of the National Council of Methodist Youth, which legislates for the Methodist churches in the United States, today declared its support for the Methodist Strike. The committee, which represents the Methodist churches in the United States, passed a resolution in support of the Strike, which is expected to last for six months.

Choral Club Will Give Program Soon

The New Junior Choir Club will be presented for the first time on February 28, 1945. The program will be held in the chapel of the school, and will feature the choir's rendition of "Shenandoah," "The Battle Hymn of the Republic," and "The Star-Spangled Banner." The choir will be conducted by Mrs. A. J. Borders, the choir director.

Ruby Brown (Mrs. A. J. Borders) spoke to the choir earlier this week, and the choir members have been practicing diligently to prepare for the upcoming performance.
The Telephone "can take it!"

Your telephone must work 24 hours a day. It must be immune to try blasters of the frosty north—dry burning heat of the desert—heavy, humid atmosphere of swamp lands.

And it is, for Western Electric—manufacturing unit of the Bell System—sees to it that telephones, switchboards and cable are prepared for life anywhere. Through long experience and rigorous testing, telephone engineers have learned how to make apparatus which is not adversely affected by the whims of climate.

Through planning and producing such improved apparatus, Western Electric contributes to the year-round reliability of your Bell Telephone service.

UNCLE SAMMY... "We're No Daisy, We Tell"

Whether we again assume the title of critic on our recent subject, we are happy to announce that we will do so again.

The first thing that comes to mind is that we are not going to talk about anything that has to do with our recent subject. Instead, we will talk about something else.
