Paul Advocates Strengthening of Pure Food and
Drug Act

The question of the proposed
amendment to the Pure Food and Drug Act
was discussed by Paul McKenney,
recently appointed to the Pure Food and
Drug Act by President Roosevelt.

The amendment is to strengthen the
act by making it possible for the government to
interdict the selling of fraudulent
articles.

Late Petitions

An indication that the fall term has been well to attention relative the handling of the petitions in the Student Assembly for the members of the Student Association. The deadline for receiving petitions of students seeking office was announced at the Student Assembly in October, November, May 30. On Thursday, May 1 a report on THE THRESHOLD's efforts to get the list of candidates for office and from the amount of the reports it appears that there are students for office during the last term. These petitions were turned over to the Student Assembly.

For the office of Secretary Representative of the Student Assembly, Mr.草地 had a great deal of interest to the members of the Student Association that would be automatically changed into his position. The names that are listed below are the names of the candidates for the office of Secretary. The only complaint that has been heard is that another petition was accepted after Thursday, when it should not have been accepted. It seems that the Student Assembly has no idea of making any further efforts to get the list of candidates for office.

We believe that the purpose of THE THRESHOLD's efforts to get the list of candidates for office was justified by the fact that if THE THRESHOLD's efforts were not made, the list of candidates would have been smaller.

What is a College?

What is the function of a college? What is its purpose? What are the students of a college supposed to learn? These are the questions that we are trying to answer in this article. It seems that the term "college" is used interchangeably with the term "university." There is no true difference between the two terms. The term "college" is used to refer to a school that is composed primarily of students who are interested in a particular field of study. The term "university," on the other hand, is used to refer to a school that is composed of students who are interested in a variety of fields of study.

The purpose of a college is to provide a broad education to its students. This education is intended to help students develop critical thinking skills, analytical skills, and problem-solving skills. The education is also intended to help students learn how to work together as a team and to develop leadership skills. The education is also intended to help students learn how to communicate effectively and to develop effective communication skills.

**"WHEN WILL NUD BE DONE?"**

"When will nud be done?"

**There is no need for a lot of whangdoodle talk about cigarettes**

**- JUST Plain COMMON-SENSE**

When you stop to think about your cigarette—what it means to you—here's about the way you look at it. Smoking a cigarette gives a lot of pleasure—it always has. People have been smoking and enjoying tobacco in some form or another for over 400 years. Of course you want a cigarette to be made right. And naturally you want it to be mild. Yet you want it to have the right taste—and plenty of it.

In other words—you want it to Satisfy.

Scientific methods and ripe mild tobaccos make Cheetham a mild and better-tasting cigarette. We believe you will enjoy them.
