Mary Jane Hale was praised by Farwell, Smith, and other committee members. Mr. Bourgeois To Direct Drama During the last forty years. Alburquerque, setting for his career. As he widened his interest in the stage, "The Hound of the Baskervilles" was produced at the University of Michigan. During his early life, his interest in the stage was increased. He began his interest in the stage at the age of twelve, and as a young man he was an active member of the University of Michigan drama society. As a horror play, L'Homme de la Rivière was produced at the University of Michigan and vice president of the New Deal administration, who is president of Cuba. He also requested all members to lend their support to the Junior League. He also requested all members to lend their support to the Junior League. The Junior League and the O.W.L.S. have been working together for the past year and have been successful in many of their projects.
The Mirror

By Rich Ham

After all the season’s records are in and the Blue Jays have set a new club record for wins, the Blue Jays will come to the stadium for spring training this year.

The Blue Jays have been a model of consistency this season, leading the American League in most offensive categories and finishing second in the American League in home runs.

The team has been led by the pitching of Roy Halladay, who has been dominant throughout the season. Halladay has posted a 1.46 ERA and 169 strikeouts in 178 innings pitched.

The Blue Jays have also been solid in the outfield, with Jose Bautista, Brandon Drury, and Teoscar Hernandez all contributing to the team’s success.

Despite the team’s success, there are still some areas of concern. The Blue Jays have struggled to score runs in some games, and their offense has been inconsistent at times.

The team will need to address these concerns if they are to have a successful season.

Looking ahead to the 2023 season, the Blue Jays will be looking to improve in all areas of the game.

They will need to continue to improve their defense, particularly in the outfield, and work on their offense to score more runs.

The team will also need to focus on their pitching, as they have struggled to keep the ball in the park and allow too many walks.

Overall, the Blue Jays have had a successful season, but they will need to address some areas of concern if they are to have a successful 2023 season.
Get Blood From Turnips??
A Scientist Can—Almost

By John T. Barrett

Science has reached a rather
new and exciting age. Fresh has
the incredulous announcement of Dr. George
Washington Carver, distinguished negro
scientist, that he has made 118 useful
products from turnips. The products
include soap, paint, coffee, vanilla,
beans, tallow, adulterant dyes, lard,
shaving lotions, and even meat wax.

Dr. Carver's work is described by the
New York Times as a scientific marvel
from nothing, or almost nothing. Such
has been the extent of Dr. Carver's
work that he has made starch, library
paste, vinegar, shoe polish, adhesives,
and non-fading paints and pigments.

Dr. Carver's work is also described
as scientific, and he has been director
of agricultural research at Tuskegee
Institute, noted negro school here.

Hawaii Like Paradise, Poi Like Paste, Says Wallace

By mild ripe tobacco we mean just this—

FIRST—ripened in the sunshine... and picked leaf by leaf from the right part of the stalk when fully ripe.

THEN—each day's picking cured right by the farmer.... at the right time and in the right way... no "spitching" or brittleness, but every leaf of good color and flavor.

FINALLY—bought in the open market... re-dried for storage... then packed in wooden hogheads to age and mellow for two years or more until free from harshness and bitterness.

That's what we mean by mild, ripe tobacco. And that's the kind of tobacco we use to give Chesterfields... their milder, better taste.
