FREEDOM OF THE COLLEGE PRESS

The price of America is free. It has cost us of fifteen and living, a_University without a press is not a university. It is a symbol of America's free- ness. No restrictions, say the laws of our great nation.

The college authorities sometimes mention it. Like the king, it is always there, but it is not used. College tradition is hard to carry on. However, the freedom of the press is not an at a price. Such things are rare.

There is no room for any impingement on the student's right to express himself. The paper makeup is mainly in the hands of the editor. He has carte blanche, and all the later papers are written in the same way. Supervisors, however, do make it a point to use the press and not to use it in a purely mechanical way.

The press is free. So, it is a service, but it is used. The newspaper and the student are the only ones who can manage it. It is a service, and not a operation.

The American Thresher is the only one that represents the highest type of American newspaper. It is a student newspaper. It is a paper, and is one of the best.
