There's not much to say about the Owls this week. They are still reeling from the loss of last week. The Owls have not been able to get their act together in recent games. The defense has been their biggest problem, allowing too many points in recent games. The offense has been inconsistent, with some good performances and some poor outings.

There is a good chance that the Owls could be the underdog in this game. The other team has been on a tear recently, winning several games in a row. They have a strong defense and an experienced quarterback. The Owls will need to play well on both sides of the ball to have a chance at winning.

The Round-Up

News:  Texas, Kansas, and Notre Dame went unopposed. The Owls' championship hopes are still alive, as they can clinch the title with a win this week. The Owls' defense has shown improvement in recent games, holding the opposition to under 300 yards in each of the last two games.

Coach Ollie Griggs has issued a final warning: any player who does not show up for practice will be dropped from the team. The team is currently 5-4-1 in conference play and will need to win both games this week to have a chance at the championship.
