Fourth Out-of-Town Trip Sends Owls Against Horn Frogs

Institute Gridder's Will Seek Second Conference Win Of Season In Fort Worth

By Mildred McCall

The Rice football squad's fourth out-of-town expedition of the season will take them to Fort Worth for a game against the Texas Christian University squad. It will be a battle to stay out of the cellar for the Owls, and one which they are rated as favorites.

The Horned Frogs, comparatively high on the conference ladder, are by no means the team which climbed to that position. Loss of almost the entire first string a few weeks ago cost Coach Drew Hyneman in talking about the season, and the recent addition of 12 men from the Fort player further complicate the picture.

TCU Acquires Pass-Name Thief

A student of the Frogs is believed to be a real find. Floyd Chronister, football and basketball star, will probably be a very much overworked young man as a receiver in Mayor Hyneman's passing game, but he will be severely handicapped by lack of experience with TCU plays. He will be...

Drill To Replace Physical Training Next Monday

In preparation for the Navy parade at the Rice-Southwestern game November 12, the Rice intramural activities will drill next Monday afternoon, and there will be no physical training that day.

It is anticipated that this will not interfere with the regular schedule of activities.

Brainy Tutor

Dr. Craig Initiates Lecture Series Next Month

Dr. Craig will deliver a series of three public lectures as a part of the University's celebration of the 20th anniversary of the Rice Institute, coming here>

Rice Graduates Outstanding At California U.

President Lovett has just received a letter from J. W. Beery, Chairman of the Department of Physics of the University of California, in which he says:

"Dear Dr. Lovett:

Frost Petitions To Be Submitted

By November 19

Petition candidates for class officers of president, vice-president, and secretary-treasurer must submit nominations before Friday, November 19. Petitions may be turned in to Dr. Hyland at the north side of the stadium at 7:45 p.m.

Thanksgiving Day To Be Celebrated By All Students

A Thanksgiving holiday has been declared for this year. As a result, the Rice National Union will be given the day off and the students will not have school.

The Rice National Union will be given the day off and the students will not have school.

Next Thresher Will Be Issued On November 26

(Continued on page 4)
The Navy Dance turned out to be quite a success with a large crowd dancing and doing without trampling people underfoot every other step. Jim Hill, George Treman, Wayne, and Jimmy Read were all high as kitchen chimneys chemically. Wolf Glenn Rose divided his attention between Murano and George Ann. Lawrence Cook exchanged glowing glances even when not dancing with each other. Mary Jane arrived looking screaming “I’ve been to San Jacinto I, I taxi.”] They all went home, then went home; the war was coming to an end in the Ship’s Store When the New Year...
By Mildred McCall
Saturday afternoon Rice Institute was playing an annual demonstration of Aggie sportsmanship which we all know means nothing more than very vociferous support of their team, especially when it is on the defensive. The so-called twelfth man, however, seemed somehow short of wind at times, or maybe it was just speechless with amazement at the sterling defensive play of the Owls. Another possibility is that the cadet corps was trying to figure out what kind of instructions to yell at the kiddle keepers the next time Rice handled the ball. The Owl student section’s answer to that sort of business was the best ever given A & M anywhere. Even the referee commented that it was the first time he could remember fine calling enough noises to make A & M mad.

Sammy
Really, I am surprised that the College Station farmers have not heard, after all these years, that stealing Sammy is not profitable. This year they did not even get him out of town. Next year they will not even get him.

Headquarters
And while I am on the subject of Sammy, let me point out the advantages and disadvantages of being Sammy. Those who have seen Sammy in action have come to realize that Sammy is a force to be reckoned with. His howls and songs are a constant reminder to our opponents that they are not alone. Sammy is a true blue aggie who never forgets that he is playing for his team. His presence on the field is a sign that the fight is on and that the Aggies are ready to do battle. So if you see Sammy, give him a cheer and let him know you are with him.

Owls Laugh Last At Cadet Corps In Yell Contest

By Preston Frater
For the first time this season the student body, naval and civilian cadet corps, all went out and backed their team to the limit. With a stomping, shouting, clapping, and ringing in new bells, the Rice backers let the team know that they were pulling for them. Nor did this spirit lag as the team put up a fight of their own. Sammy Escapes—(Continued from page 1)

Girls’ Basketball Practice Commences

The annual girls’ basketball tournament will be under way soon. Practice games have been held by the OWLs, PALs, and ERLs. The OWL team is coached by Bill Hennessy, Mike Robinson and John Lique coach the PALs and ERLs respectively. Practice games will be held on Wednesday evenings in the Field House gym.

BUY WAR BONDS AND STAMPS

Intramural News, Notices, Schedules

The intramural touch football tournament will get underway this Saturday with 12 teams fighting it out for the championship. Three games will be played at 2 p.m., and three at 3 p.m. The teams playing at 2 p.m. are the Fighting Forth vs. Downtowners; the Soph. Engineers vs. Rally Club 2; the Rally Club 1 vs. Eagercisers. At 3 the Slippery Slims vs. Mighty Fort; the TNR vs. Area; the Rice Wave vs. Grangers.

The tournament will be a double elimination affair with the second round being scheduled for the afternoon of December 4.

The round robin intramural volley ball schedule finds the Slippery Slims playing The Owlshots at 2 p.m. on Saturday, and at 3 the Rally Club playing East Hall.

Over 100 Report As Owl Cagers Open Practice

Basketball is getting off to a fine start here with well over 100 boys reporting for practice. Although the first game is several weeks off, the boys are working hard in order to be ready when the season really comes in.

No transorders to Rice with any previous college cage experience have been discovered to date, but several members of the Owl squad from last year are among those present. Lettermen Rusty Durling and Bill Henry are very much on hand, along with Chil Richards, who lettered in the sport at Lamar, Tommy Bench, Grover Nunnally, and J. D. Thomas. Coach Joe Davis will, therefore, have a few men with whose style of play he is familiar.

Coach Davis himself has not been very much in evidence around the courts because his duties as line coach of the football team have kept him hard at work on the gridiron, but Enos Joe Smith is holding a helpful hand in the cagers.
Music

By Rosemary King

In the early nineteenth century, the piano was a significant instrument in music. Chopin, a composer of nationalistic melodies, is known for his contribution to the art of the piano. His compositions are characterized by a unique style that reflects his own personality and the spiritual current of his time.

Chopin is known for his works that are characterized by a particular technique which he himself invented. This technique is evident in his mazurkas and polonaises, which require a peculiar kind of technique. Chopin himself was known for his remarkable flexible hands and a technique of remarkable flexibility and a particularly flexible kind of tone. His pianism is characterized by his ability to move from one type of Chopin's polonaise to another, and by his ability to fill the space with a peculiar kind of music, the F sharp minor, that is clearly and distinctly his own; no other composer has so fully caught the spirit of this music.

Chopin was known as the piano virtuoso of his time, and his works are characterized by a technique which he himself invented. His technique was so advanced that it was said that there were times when it was said that there were no more pianists than in the rest of the world.

Chopin was also known for his keen sense of language and style. His works are characterized by a particular technique which he himself invented. He was known for his remarkable flexible hands, and his technique was so advanced that it was said that there were no more pianists than in the rest of the world.
