Institute Gets 90 Days
Release From Classes,
But Not in the Cooler

Faculty Disapproves But Trustees Are Jubilant at News, Students Pained and Very Shocked

By Kung Foo 'Tu
At last we have an official announcement that Rice Institute is soon to return to the normal academic program--two semesters and a three months summer vacation. Genial S. G. McCann, tipping (we did not joyfully) that summer vacation will begin immediately after exams, which are to be cut to fifteen minutes each.

The news was greeted by the Washington Office of the Navy because high-soups-fee students here are working entirely too hard, and consequently prefer to allow a short ninety-day rest period rather than provide hospitalization for cases of nervous breakdowns among overly-committed cadets.

Very few details are known about the long conferences between trustees and faculty members as a result of the Washington dictum. It seems that some faculty members objected to vacations with pay. "There is nowhere to go, and stages just don't do it," stated the leader of the convivial objectors.

Trustees, however, were jubilant.

Strange Bird
Identified By Illustrious Prof

The noted scientists, Dr. A. C. Chandler and Dr. Joseph I. Davies have at last noticed the mystery of the strange and startling bird that has been amusing faculty and students on the campus for quite some time.

The bird, identified as Avis Weis, originated, appeared some years ago, and since has been engaging himself about the grounds in a sprightly manner, to the delight of all. It is an appealing white color, trimmed with a delicate brown around the head, and is easily identified by its characteristic trill of "an-duh—an-duh—an-duh."
It seems very trite to explain carefully that this issue of the Thresher is intended with malice toward none and a good will to all, in the true spirit of April Fool. But we want to poke at all, in the true spirit of April Fool. But we want to indicate with a long-standing Rice tradition, but also to indicate an ironic and satiric way the fads and fancies, and the rules and regulations that are the by-product of this year, in the eyes of a pretty representative group of students, the Thresher staff.

By Wm. Mesh-Waw!

Of vital interest to all their friends are theupal plans of Ann Cathleen Martin and Robert Blackman Manning. Flower girls and groomsmen will be: Louise Lunt, Nancy Wren, and Louise Lunt Russell with the ring. "The Rock" but that doesn't know why yet.

Thomas McLaughlin and Schiamplume report on their divorce. It seems that he has lost his complexion. They are coming leaving for the fashionable spring state reform school. Mrs. D. C. Dean is evidently becoming a lunchy at the Greasy Spoon next Monday for her piano recital on the 21st. A resolution was introduced at the height of the revolts to support the unparalleled press.

The Houston Chaperie Society proudly presents a concert given by the famous baritone, Monsieur O'callar. He will give you with such odd conditions as "Speak Sprightly, Gentle Spring." It is a charity performance, and towels will be furnished as well. All proceeds will go to the Houston Fire Fight Dept. The Partie Association Society entertained lavishly last night with a nice man. A resolution was introduced at the height of the revolts to support the unparalleled press.

VACATION—(Continued from page 1) about the prospect. They believe the vacation will give them time to begin to get ready to start to consider thinking about the possibilities of the building program. Among other parts of this plan that may be too early is the decision to build a joint man and women's building—for married couples of course.

Students, meanwhile, were rather skeptical about the whole thing. Some girls were tarred as the prospect of not being able to show off their lovely new angora sweaters during July July days. Boys expressed fear that the engineering equipment would get out of hand. The weather wore away so long, and began forming a very nice temperature by the afternoon in every day work.

The Thresher Office's reaction was: characteristic: exactly three and one-half hours after the announcement was made, the role sound of gentle noises, usually represented in the comic strip—namely:

tent as cheer-leader next season at the football games. The next meeting will be the usual mid-winter meeting party held in Chen Lecture Hall.

EXTRAVAGANZA—(Continued from page 1) "Barnes' "(Come and go to the Houston Fire Control Dept. A resolution was introduced at the height of the revolts to support the unparalleled press.

Tennis Squad Wins From Very Unusual Opponents Here

The Owls' varisty tennis team were visitors in a smashing match with the Little Men's Fairies', and Gnomeous Crawler and Marching the first time, but have overcome the doubles competition, which lasted until 2 1/2 hours as the latest game. However, when you think of how strong the Owls' team is, you would have to rate them pretty high in the conference, you realize that this condition is only fair and square.

The batting of the team this year has fallen off considerably. Last season, a player was dropped from the title in Ellington Field team last season. We wish to be humiliated by having to play them. They felt that they were one of the best teams in the second place. They felt that they were so strong that they had no competition in the conference, and they realized that this condition is only fair and square.

As usual, the team was on its best form during the last game. A great scare was thrown into Brown Shipyards yesterday when the Owls were thrown into the ship channel and thus not interested in the game. The Owls' batting this year has fallen off considerably. Last year, the team had a good batting average. This year, the team has fallen behind the competition. The Owls are keeping in shape by pushing a baseball and a basketball. As Chief Executive in the Corporation of Henry, Goodwin, and McElree, he is very consistent and ambitious. But real- ly, Jaugus, it isn't necessary to drag the listeners all the way. The Owls' batting just doesn't grow there!

The Owls' team would be worth quite a lot for its poor showing in the 440-yard race. Shelton had a terrific cold this week. It is rumored that Grogg is keeping in shape by pushing a baseball and a basketball. As Chief Executive in the Corporation of Henry, Goodwin, and McElree, he is very consistent and ambitious. But really, Jaugus, it isn't necessary to drag the listeners all the way. The Owls' batting just doesn't grow there!

As soon as the senior graduation ceremonies are completed this June, a storm of repercussions, demands, and engineers will invade the campus to begin the work of erecting some of the buildings Rice has always wanted. The workers are taking advantage of the summer vacation to start this project, and by fall four construction jobs will be finished, ready for occupancy.

First of all, the most important additions will be to the Chemistry building to take care of the overflow of new students and instructors in September. Also, an aeronautical engineering will be added to the curriculum, one of those floors will be needed for this study, with the laboratory situated in the west wing and existing various floors will be needed for this study, parts of airplanes for study. Negra Consentida — the Personnel Employment Counselors Association of U.S. is about to start this project, and by the end of the summer vacations, the large main floor will be finished, ready for occupancy.

The Campanile Tower is the third job, and after it is finished, it will be higher than the Sam Houston monument. At the top will be located the observation tower and instruments room for guiding the air operations, gathering data on the winds, etc. Probably when Professor Smultz brings his astronomy course here next year, it will serve for astrometrical studies, and the A. E. Tower will be added on the Chim building. Last, but not least, the long wished-for Student Union building will be erected behind Rice's stadium and an underground passageway will lead from its basement to the gymnasium. The large main room will be finished for dancing in a room on the right will be a small bar with booths and soda fountain. Billiards, ping-pong and shuffleboard will be in a den to the left. At the back of the dance floor a platform will be built for the orchestra, and the stage will be on hand for daily and intermediate use.

With our institution thus growing, by leaps and bounds, we shall undoubtedly expand progressively, but we shall not fall in the bayou as has a certain "happily inadequate grade school on the other side of the intellectual tracks."
