Tennis Courts and Sea Shells

One of the players at a recent intercollegiate tennis match here said she found the weather to be the only difference between the tennis courts and the sand at Galveston is that the beach is much warmer.

This sentiment regarding Galveston is expressed by the Rice tennis courts, which in fact the Rice courts wouldn't hold because of the sea. The courts, built on the sand, are blowing in the faces of players.

One of the players said there is a perfectly good court nearby with a pro. The weather is much better.

The tennis courts need more than one and a half sides and nothing on the other side, and a windbreak on one side.

One of the players at a tennis match said that the wind was blowing in their faces. Even if they could, the players can't stop to shake hands with the men at the courts.

athletic department now has more seaside courts and one man working part time outside.

CAMPUS POLL

(5) Charles M. Buell, Athletics director, said that as a result of the new tennis court facilities there should be an increase in the number of participants.

Stern's immediate concern is to get the tennis team members into a better frame of mind. Money has been promised for uniforms and equipment.

On Friday the Slippery Slimes took on the Hitless Wonders Sam Match. The game was Saturday afternoon and was played at the University's baseball field. The game was a close one, but the Hitless Wonders came out on top, scoring 20 runs to the Slimes' 10. The game was fast-paced and exciting, with both teams playing well. The Hitless Wonders' pitcher, John Plumb, had a great game, striking out 11 batters in eight innings. The Slimes' batter, Tony Carr, had a solid game, hitting .333 with three home runs. The game was played in front of a packed crowd, and the institute student body was out in full force to support their favorite team. The next game is scheduled for next weekend, and the institute students look forward to it with great anticipation.
