"Sargasso" To Be Archi-Arts Theme

New Dormitories To Be Built; Will House 200 Students

by Abraham Nad

It was revealed Thursday afternoon that the new dormitory building, the first to be constructed on the campus in over thirty years, will contain many conveniences which are almost unheard of in the present dorms. The plans for the new building, which will be located parallel to West Hall and close to the tennis courts, show a floor plan which will make the new quarters much more liveable than the present ones.

One of the prominent features of the new building is the planning for ventilation. The dorm will be in the shape of an E and will be only one room wide. There will be a corridor down the middle with rooms on both sides, as in the old dorms. Access to the rooms will be from an outside balcony extending the length of the structure. Thus there will be cross-ventilation in each room.

Another feature of the planned building is the lounge room, which will also have a fireplace. Telephone hook-up facilities will be in the lobby and mail keys will be obtained in the office.

The construction will be two and three stories high, with the three-story part to be completed for the football stadium. Externally, the same red brick and tile will be used as that on the other dormitories. However, the new building will not resemble any other dormitory.

Informal sources on the campus said that the architectural firm of Board of Trustees and the W. S. Bellows Construction Co. was being held for the signing of the contract. It was said that the only remaining question was the decision as to whether an attempt will be made to complete the new dorm in time for the opening of school in September; such plans would require overtime work, since at an ordinary pace, the building will not be finished until late in the fall or early winter. Official comment could not be obtained on these matters, either on the campus or from the Bellows Company.

Engines to Meet

There will be a special meeting of the Engineering Society at 7:30 p.m. next Tuesday, February 13th. This meeting will be of particular interest to sophomore and junior engineers.

NOTICE

There will be a special meeting, of the Senior class next Thursday noon, February 17, 1949—in the Engineering Auditorium. Bryan urges all seniors to attend.

Official Outlines Election Rules for Candidates' Study

by Ben Hammond

The Student Council recently proposed several rules for the upcoming election, which will apply to the Freshman, Sophomore, and Junior classes. All candidates should familiarize themselves with, and abide by, these rules.

Candidates must limit all expenses incurred for both primary and runoff elections to a maximum of $5.00. They must submit a detailed account of all expenses to a member of the Elective Committee before the runoff election. Candidates who fail to comply with this rule are automatically dropped from the ballot.

Candidate ads cannot mention the names of specific people who will attend the dance because of the many complaints of favoritism that have been received in the past. A speech must be given by a candidate to his group the day before the election. A buffet will be served just before midnight.

The profits of the Annual Art's Hall aid will be donated to the Rice Institute Traveling Fellowship in Architecture, which is awarded each year to a graduate student in formal competition.

The Student Council Thursday in room 110 of Anderson Hall, at least two days prior to the runoff election, will call meetings as they are required.

Junior Class Meeting To Be Held Wednesday

Wednesday the Junior Class will meet in room 206 with about fifty members in attendance. The program will begin at 8:00 p.m., L. W. Dyer of Army, Instructor in English, will be the speaker. Dr. J. E. F. Bond, head of the English department, will provide the music for the party. As is usual, a question and answer period will follow the formal part.

Placement Interviews

The following interviews have been arranged by the Placement Office for the week of Monday, February 21, 1949, through Saturday, February 25, 1949. If any one is interested in being interviewed by one or more of the following companies, it is necessary that he report to the Placement Office, Room 205, Lovett Hall, at least two days prior to the interview, in order for him to get his name put on the interview schedule.

Monday & Tuesday, February 19 & 20: The Inland Oil Company; Chemical, Mechanical, Civil, and Electrical engineers; also majors in Chemistry.

Thursday, February 24: Camp Fire Girls; group meeting for senior girls.

Friday, February 25: Humble Oil Company; Chemical, Civil and Mechanical engineers; also majors in Chemistry.

A wide variety of micrometer calipers are also in the collection. When the lab is opened to the public at 8 p.m., L. W. Dyer of Army Ordinaries will speak on "Outline of Engineering Drawing and a Gauging System for Interchangeable Methods." Many of these calipers demonstrate uses of the gauging instruments.

Faculty Members Will Discuss Rating Poll At Forum Next Week

The Rice campus will attempt to evaluate the nature and effect of the future of the Rating Poll at their next program, Thursday, February 24th, at 8:00, in A. H. 110. The speakers that night will attempt to treat the subject more thoroughly than has been the case in the past.

The equipment, which is hailed as one of the most useful tools of the engineer, has been placed in the test room in the Institute. The student must have a background of 68 degrees and a relative humidity of 50 per cent if he will be maintained in the test room. All the instruments that he has to send to the manufacturers, to be recalibrated and retared. This heat will not longer be necessary.

The lab has about $500 worth of equipment. At the usual time the lab is used to augment the linear measurement and retarding the other tests. It is the labor of two men. But, as in this case, the lab will not be sufficient to the job.

The measurements are all made in the lab. They are then evaluated by the Army personnel and the results are passed on to the Army.

Archi-Arts, 1949, will be an "Extensive," the organizers have stated. "49." The date has been changed, and it will be presented the evening of the Senior class next Thursday, February 13th at 7:45 p.m. in the Memorial Gymnasium.

The Architects will transform the Hall into the Undersea world. Johnny Sullivan and his orchestra will provide the music for the affair. Bears will be from 9 to 10 p.m.

As is the custom, ten Rice girls have been selected as Honorees. They will be presented in a pageant at 9:00 p.m. in the Memorial Gymnasium. The Archi-Arts promise that the show will be a symposium and more fabulous than the last year's pageant.

The Honorees will be announced at a reception which is being planned for the evening of Thursday, February 13th at 9:30 p.m. in the Memorial Gymnasium. Only 200 students will be sold this year, at a price as yet unannounced.

The Architectural Society has decided to limit the number of people who will attend the dance because of the many complaints of favoritism that have been received in the past. A speech must be given by a candidate to his group the day before the election. A buffet will be served just before midnight.

The profits of the Annual Art's Hall aid will be donated to the Rice Institute Traveling Fellowship in Architecture, which is awarded each year to a graduate student in formal competition.

Because of the limited number of tickets being sold, the girls will be sold on a first-come, first-serve basis. Student who intend to go to the dance must be sure to get their tickets. Sketches for costume must be made up in two or three prominent locations in the very near future, and proceed to the Student Council.

As has always been the rule, the exact nature of the note and decoration, along with the music, will not be revealed until the night of the dance. The architects are working in strictest secrecy, but they promise that the note and decorations will "carry you into an unknown, deep-sea world where reality gives way to fantasy, and, borrowing a line from William Shakespeare, 'all things suffer a sea-change into something rich and strange.'"

Choral Club Sponsorship

Drive for New Members

A membership drive is being started by the Choral Club. To facilitate the work, and to increase interest in the drive the club was divided into two groups led by Shadrack Ar- and Lilian Stubbs. The win- ning group will be that one which drafts the most new members; the other team will sponsor the next party which will decide whether the winner.

If enough new members are ob- tained within the week, the results will be announced at a meeting the following week, and the results will be announced at a meeting the following week.
Relevant Issues Are Basis of Wise Rule

The freshmen dorm students showed laudable enthusiasm Monday night by holding a meeting to discuss the impending freshman elections. But they made the common mistake of confusing political and non-political issues, and the sum total of their efforts may be far short of laudable.

By organizing a dorm "block" they follow the pattern of many other freshmen classes. Other freshmen dorm or dorm "blocks" have always fallen apart, usually at the sophomore elections, however. A true system of political division has been attempted only by the freshmen dorm, no other student group, in recent years in student government affairs.

There is a natural division among people that should form the ideal basis for all political parties. Disregarding political parties that have only the selfish interest of its own members at heart, people tend to divide into conservative or liberal groups. Even assuming that all politicians were suddenly to start a disinterested search for the common good there would be those who believe in representative government as opposed to a pure form of democracy. Along these natural lines should student political groups arise.

In campus affairs there are students who generally feel that it is the job of student voters to elect the best possible men, and turn over the affairs of student government to those as completely as possible. The President of the Students Association and the few who assist that student body and most other democratic political bodies, have enough potential leaders to enable the voters to choose men on platform that are willing to perform the job.

This latter group insists on retaining to themselves as much power as is reasonably consistent with efficiency. In campus politics the first group would oppose all sorts of referendums and student polls, and would insist that the Student Council is the best qualified to judge all actions, and that expressions of opinion or decisions by the whole Student Association should only be made by the Student Council, unqualified, and uninformed.

The latter group recognizes the necessity of allowing representatives to handle minor matters, but insists that in as small a group as the Rice Student Association it should be possible to practice a pure form of democracy, and that the more perfect approximation of the common good can be done by decisions in major matters by the Student Association as a whole.

This is not to exclude temporary groups demanding particular things of student government, such groups occasionally cutting across political party lines. Such a group might edmand that the Rice Student Association outlaw physical fasting, and represent members of both political parties.

These are the lines that student political parties should follow.

New Constitution Needs Consideration

The proposed new Student Association Constitution is proposed on page 4 as the result of this issue for consideration by all members of the Student Council. The Student Council has scheduled meetings on the campus Monday, Tuesday, Wednesday, and Thursday nights of next week, to consider possible changes members of the Association or of the Council may want to propose.

As a guiding rule of all Student affairs, the constitution demands the attention of all students. Besides the consideration and responsibility due the past three Student Councils for their work on the constitution, it is important to all students. Without a good constitution it is hard to realize a good student government.

The privilege of self-government should only demand a relatively small amount of serious consideration and work on the part of the great majority of that democracy's citizens. But unless that student body, and most other democratic political bodies, have enough potential leaders to enable the voters to choose men on platform that are willing to perform the job, it is necessary to retain to themselves as much power as is reasonably consistent with efficiency.

In campus politics the first group would oppose all sorts of referendums and student polls, and would insist that the Student Council is the best qualified to judge all actions, and that expressions of opinion or decisions by the whole Student Association should only be made by the Student Council, unqualified, and uninformed.

The latter group recognizes the necessity of allowing representatives to handle minor matters, but insists that in as small a group as the Rice Student Association it should be possible to practice a pure form of democracy, and that the more perfect approximation of the common good can be done by decisions in major matters by the Student Association as a whole.

This is not to exclude temporary groups demanding particular things of student government, such groups occasionally cutting across political party lines. Such a group might edmand that the Rice Student Association outlaw physical fasting, and represent members of both political parties.

These are the lines that student political parties should follow.
The End of Western Supremacy?

Theologian Pictures "Appalling Upheaval"

"The enormous challenge of the present historical situation has found the Western nations either morally or politically exhausted, or weakened or misguided as to right understanding both of the state of affairs and of the adequate remedies."  
- Josef L. Hromadka

Hromadka claimed that "By 1930... Gentile indisposition had passed the point where there could be anything superior to power; the attitude of the nation was one of being superior to power; the attitude of the nation was one of loathing for the old decaying order of politics and passions to the clarity of intellectual and spiritual values."

On August 24, 1948, he gave an address entitled "The End of Western Supremacy." It was one of the most controversial addresses of his career, which included leadership from almost every major Protestant church in the United States.

The End of Western Supremacy?  

Hromadka claimed that "By 1930... Gentile indisposition had passed the point where there could be anything superior to power; the attitude of the nation was one of being superior to power; the attitude of the nation was one of loathing for the old decaying order of politics and passions to the clarity of intellectual and spiritual values."

Hromadka claimed that "By 1930... Gentile indisposition had passed the point where there could be anything superior to power; the attitude of the nation was one of being superior to power; the attitude of the nation was one of loathing for the old decaying order of politics and passions to the clarity of intellectual and spiritual values."

The end of Western supremacy was always considered a possibility by Hromadka and other intellectual leaders, but his 1948 address was a significant moment in framing this idea for a broader audience.

In the face of growing political and economic challenges to Western dominance, Hromadka argued that the West had failed to understand the true nature of its power and the limitations of its values. He lamented the "appalling upheaval" that threatened Western civilization, warning that the West was facing a crisis of values.

His address was met with both praise and criticism, with some seeing it as a call to action for a renewed commitment to Western ideals, while others regarded it as an apologia for Western decline. Regardless, it remains a significant moment in the history of Western thought, highlighting the complexity of the issues facing the West at the time and the ongoing debates about the future of Western supremacy.
Proposed Student Association Constitution Presented For Consideration by Students; Vote Slated March 7th

Preamble
The students of The Rice Institute exercising the authority delegated to them by the Board of Trustees and the Administration of The Rice Institute, in order to organize the student body for the legitimate purposes of student affairs establish this as the Constitution of The Student Association of The Rice Institute.

Article I. Membership
All students of The Rice Institute who have paid the student blanket tax shall be members of this Association.

Article II. Legislative
Section 1. The legislative authority of this Association shall be vested in a Student Council.

Section 2. The Student Council shall be composed of 21 members: the president, the vice-president, the secretary, the treasurer, and the councilman-at-large of the Student Association; four representatives of the Junior Class, five representatives from Sophomore Class, and three representatives from the Freshman Class.

Section 3. The Student Council shall:
- a. Represent the student body in all relations with the faculty, trustees, alumni, and other bodies.
- b. Keep the minutes of the Student Association and Student Council meetings.
- c. Attend to the correspondence of the Student Association and Student Council.
- d. Perform any other duties appropriate to this office.
- e. Carry an insurance bond for the Student Association.

Section 4. The members of the Student Association may demand a referendum vote by written petition of 1/10 of the Association members.

Article III. Executive
Section 1. There shall be a president of the Student Association who shall be a senior from the Junior Class, four representatives from the Sophomore Class, and three representatives from the Freshman Class.

Section 2. There shall be a vice-president of the Student Association who shall:
- a. Keep all funds of the Student Association in an accredited bank or similar institution approved by the Student Council.
- b. Disburse funds of the Association upon the authorization of the Council.
- c. Make a complete financial report of the Association’s funds at the third regular meeting of the Student Council each academic year and a similar report at the close of each academic year. These reports shall be filed with the secretary of the Student Association. The books shall be subject to the approval of an accredited auditor at the close of each academic year.
- d. Furnish a surety bond of $1000.00 within 30 days of the time he assumes office. The premium of this bond shall be borne by the Student Association, and the bond shall be deposited with the Banker of the Institute.
- e. The treasurer shall have successfully completed A. 220 or its equivalent.

Section 3. There shall be a council-man-at-large who shall be a senior, who shall have charge of all student homecoming activities, and who shall be chairman of the Dance Committee as set up by the By-Laws.

Section 4. There shall be a Women’s Council which shall act only in matters pertaining solely to women’s interests. The Women’s Council shall operate under its own constitution being subject to the authority of the Student Council.

Article IV. Judicial
Section 1. There shall be an Honor Council that shall investigate and try all violations of student honor. The Honor Council shall try all impeachment cases brought by the Student Council. The Honor Council shall operate under its own Constitution which shall in no way be contradictory to the Constitution of the Student Association.

Section 2. The Parliamentarian of the Student Council shall interpret the Constitution and determine questions of parliamentary procedure not covered in the By-Laws by authority of Robert’s Rules of Order. Constitutional decisions of the Parliamentarian may be over-ridden by a 2/3 vote of the Student Council.

Section 3. The Dean for student activities may suspend, by written statement to the president of the Student Association for the grounds for his action any student taken by the council which he believes to be unconstitutional or contrary to the regulations of the Board of Trustees or the Administration. The action shall remain suspended until a decision by the Student Activities Committee either sustains or votes the action.

Article V. Elections
Section 1. All student elections at The Rice Institute shall be held by secret ballot.

Section 2. The president, vice-president, secretary, treasurer, councilman-at-large, and all other officers shall be elected yearly by the Student Association.

Section 3. All student elections at The Rice Institute shall be held by secret ballot.

Section 4. The Student Council shall:
- a. The president, vice-president, secretary, treasurer, councilman-at-large, and all other officers shall be elected yearly by the Student Association.
- b. The premium of this bond shall be borne by the Student Association, and the bond shall be deposited with the Banker of the Institute.

Section 5. The Student Council shall operate under its own Constitution which shall in no way be contradictory to the Constitution of the Student Association.

Section 6. The Student Council shall operate under its own Constitution which shall in no way be contradictory to the Constitution of the Student Association.

Article VI. Amendments and By-Laws
Section 1. Proposed amendments may be originated by any member of the Student Association.

Section 2. All proposed amendments must be approved by a 2/3 vote of the Student Council.

Section 3. Proposed amendments approved by the Student Council shall be posted on the bulletin boards at least ten days prior to vote.

Section 4. Proposed amendments must be approved by the Student Activities Committee before being submitted to the Student Association for vote.

Section 5. The By-Law of the Student Association may be passed by a 2/3 vote of the Student Council.

Section 6. The By-Law may be changed effective 30 days after adequate publicity of the By-Law has been made to the Student Association, unless contested by a written petition of Student Association members demanding a referendum vote as provided for in Article II, Section 4 of this constitution.
**Letters From Caen Faculty Members Show Need of Aid**

Last fall the committee appointed by the student council to administer the charity policy approved the general election, asked Mr. Pierre Girard, professor of French, to contact members of the faculty of the University of Caen and to determine what form of aid would do the most good for this war-devastated but great university. Recently Mr. Girard received answers from the dean of Caen and from the professor of organic chemistry.

University of Caen
Faculty of Science
Office of the Dean

December 10, 1948

My dear Colleague,

You will find herewith enclosed in this letter a list of what we need most, the instruments have been listed in order of importance. It is evident that if you cannot satisfy completely our requests, you all for the decision you have made of participating in the reconstruction of our laboratories which have been listed in order of importance. It is evident that the city in 1944. Will you please convey to those keen and well-meaning students, our strong and deep-felt gratitude for the very great favor which they are doing us.

You will find herewith enclosed in this letter a list of what we need most, the instruments have been listed in order of importance. It is evident that if you cannot satisfy completely our requests, you may stop at the point at which your funds are exhausted.

Yours sincerely,
M. CUNG,
Dean

December 10, 1948

My dear Colleague,

You need not tell us what we would like to receive as regards scientific equipment since we give you all the necessary information. We are extremely thankful to your students for showing interest in our poor school of science. You can tell them about our sad situation. Not one stone is left of the old university and we teach and study all cramped up in the teacher's college which fortunately had been buit too large for its own purpose. I had to start my own laboratory from scratch. It is a very small one, yet a little work can be done in it, and I now exchange some results of my research work with American chemists. My own field which is furane is very extensively studied in the U. S. A. In France I am the only professor of the faculty of the University of Caen and to determine what form of aid would do the most good for this war-devastated but great university. Recently Mr. Girard received answers from the dean of Caen and from the professor of organic chemistry.

J. NOEMANT
Professor of Organic Chemistry

Baylor Bears Defeat Owls; Game Fought Constantly

Last Tuesday night, Baylor Bears came to Boston and, in a basketball game that battled through six quarters, the Owls defeated the Rice Owls, 58-54. Oddly, Pontotoc's free shot, sunk with less than a minute left, was the deciding point of victory. It came after War-
ner Switzer's free shot and Bill Tom's first point had tied the score at 11-11. Rice missed two chances at winning, and after a second long shot by Wheatley.

Bill Poppel's was a very good game, and led the scorers with 21, 15 in the first half. Hawthorn hit for 13 for the Owls, Joe Mcintire, even though he had a slight off night, put in 16,12 in the second half. Pontotoc had 12 in the first half, but added only his game-winning free throw in the second.

Baylor jumped to an early lead, but, after the Owls tied it at 10-10, the widest margin any team enjoyed was three points. The score was fifteen at halftime, 14, 16, 18 in the third period, 14, 21, 23, 32, 34, 36, 37 in the fourth. The Owls continued to lead, but, after the Owls tied it at 56-56, in the last minute, the Owls turned the game to the Owls 58-54.

Bill Tom continues to lead Con-
ference scorers, now totaling 187 in 8 games. Doehring, of T. C. U., trails with 121 in 8 games. Prior, of S. M. U. (111), Brown of S. M. U. (112), Amber of Arizona (114), and Hawthorn of Baylor (107) all have scored over 100.

Golfers Requested

To Report to Plumber

John Elmston announced Wed-
nesday that all students who wish to play on the Rice Golf team re- 
port to the Field House at 12 noon on Saturday. A list of these names must be given to the Southwest Con- 
ference golf officials. Plumber's wishes to find out how many will go out for the golf team. Fresh- 
men are ineligible for the team but they are requested to request Plumber wishes to get their names.

Scrimmage Today

The first intrasquad scrimmage of spring football training has been set for this afternoon by Coach Jas. Nisly. The boys have been working on fundamentals and scrimmage, in all likelihood, will not be a competitive game. So far, the only major change has been the shifting of Speedy Roberts from right to left guard to fill the vac- 
ancy left when Tom Parsons with- 
drew from school to enter Austin College.

Last Tuesday night, Baylor Bears came to Boston and, in a basketball game that battled through six quarters, the Owls defeated the Rice Owls, 58-54. New S. L.'s Honored
By Senior Members

The new members of the Sarah Lawrence Literary Society were honored Thursday afternoon with a luncheon at the Justice League. The "big sisters" acted as hostesses for the occasion. Among the members ad-

Large Track Squad Reports; 
Brunson Welcomes Recruits

The mere size is encouraging. Brunson now has 29 men listed on his varsity squad and 23 on the freshman team, with more men coming out every day. This in comparison with the squads of 10 or 12 of the past couple of years. Apparent-
ly, interest in track is picking up in the school, and Brunson is greasing all candidates with open arms.

As with everything different in practically any sport, these back-
peddlings have advantages and dis-
advantages. The disadvantages were
plainly shown in the loosely called
same Tuesday night.

Number two: the players found
themselves out of position, in some
instances very badly, if the referees
tailed a foul. Do the abs and opposing fous

gainst compensate for the penalty
lost? It is difficult to say. Jamie
Owens fouled out Tuesday night, but
Don Hannahson hit for 18. Maybe
Owens would have scored more than
that had he not been laboring under
two fouls most of the night.

Don Hannahson hit for 18. Maybe
Owens would have scored more than
that had he not been laboring under
two fouls most of the night.

As with everything different in prac-
tically any sport, these back-
peddlings have advantages and dis-
advantages. The disadvantages were
plainly shown in the loosely called
same Tuesday night.

Number two: the players found
themselves out of position, in some
instances very badly, if the referees
tailed a foul. Do the abs and opposing fous

gainst compensate for the penalty
lost? It is difficult to say. Jamie
Owens fouled out Tuesday night, but
Don Hannahson hit for 18. Maybe

ELECTION RULES —
Continued from Page 1

Booth available on Foreign Study

Rice students now have an opportunity to investigate means for studying abroad according to Dr. W. S. Dix, The United Nations Educational Scientific and Cultural Organization (UNESCO) has published a handbook to promote international educational interchange. The means for this are fellowships, scholarships, travel or training grants, or bilateral exchanges. This handbook presents the names of these awards, the field of study, where they are tenable, their conditions and purposes, their value, duration, number available, where to send applications and time limit for receipt.

Any Rice student who is interested in studying abroad may investigate those awards which pertain to college students in the United States. Anyone who wishes to read this handbook should contact Dr. Dix, Box 355, Lovett Hall.

Election Committee, composed of Ben Hammond, Tempe Hawley, and Jim Kelley, will be glad to answer any questions that may arise concerning the rules of the election.

THE THRESHER

THE TOP MEN OF AMERICA'S SPORTS smoke CHESTERFIELD
LARRY JANSEN says… “It’s Chesterfield for me, they’re really Milder and have that clean, fresh, satisfying taste... It’s MY cigarette”
