Balloting Till Noon In Bi-Partisan Primary

RICE

Entered as second class mailing matter, October 17, 1958, at the Post Office, Houston, under the act of March 3, 1879.

SC PLEASED

Rice, Chosen Site of 1952 TISA State Convention

Rice was chosen at the TISA state convention in El Paso last week as site of the state convention next year, winning out over a bid by S. M. U.

Some 200 delegates from 34 Texas colleges and universities met in El Paso to discuss and consider the various aspects of student government in Texas schools. In a 2 1/2 hour session, the group made a great improvement in student life.

Rice, chairman of the TISA Resolutions Committee, made a motion calling for closer relations between students and faculty. The motion passed unanimously. The motion was adopted to help check the increasing trend toward impersonal-...
The need for an additional parking lot is still unfulfilled this year as plans for the lot would have to be made by March. Since the school has to be constructed real soon, it is crucial to find a convenient place to park.

A solution to the problem of convenient parking is to extend the dorm lot toward the chemistry building. "What about the planned extension of the library on that space?"

The library will need this space within twenty years. Twenty years from now our children and their children will be attending Rice and see the addition to the library building. No so-called permanent parking lot will be enough. The library itself will be an extension of the parking lot.

By this time the space is needed for extending Fondren, other buildings will have been built; the center of campus will be altered and the lot will be dynamically changed. The lot built this spring or in the summer would have long, since been used to disuse.

In other words, looking at twenty years might well find bifocals. Too much too far sightedness is as serious as too much near sightedness. In the plans for the future of Rice, it would seem that the planners should not jeopardize the future, but building a new student parking lot in back of the library will jeopardize nothing and alleviate the present parking problem completely. When half the physics lot is reopened, allowance will have to be made for growth in student cars, which is increasing yearly.

The members of the Building and Grounds Planning Committee must be given the job of making the final decision. But we must also recommend that a lot be created for the students.

Furious Battle Splits Campus

By BETTY McGEEVER

Heath had no fury like a freshman woman scorned. The unhappily sedate upperclassmen (Junior and Senior, that is) have had much evidence of this in the last few days. Chaos rules the campus. The campus roads are taken over by jam-packed, swerving, screeching cars and the lounge has taken the atmospheres of an O'Shaughnessy Clubhouse. Plans are now in process to tap the Thresher phone.

It all started Monday morning when Ann Acker was escorted out of her Chemistry 220 class by spine-chilling screams as twelve sophomore boys made their getaway with Chibolee Ford, Sarah Frances Arv, Jane Wunsh, and June Johnston.

In the meantime, little known to the industrious Sophomores, Ann Acker was at her dreammaker's house having a fitting for her form for Saturday. It was a brief visit and she was soon spirited away again back to the unknown hideaway.

Things were not, however, complicated enough at this point. On Tuesday, Ann got in touch with the Sophomores and they rescued her early in the afternoon.

From then on, it was cat and mouse with both sides playing both parts. The uncertainty of who is going to be in possession of the blonde vice-president by the dance is still strong and the reign of terror continues. Everybody who is anybody has been kidnapped at least once by now and it looks like the fun is just beginning.

Advertise Rule

For Candidates

Restated

Candidates may begin to advertise on the campus on Monday, March 24. Candidates must get prior approval of the election committee before using any form of printed campaign matter other than signs, posters, or leaflets.

Posters must not exceed 12 square feet and must be placed within the boundaries determined by the election committee. Posters may be tied on trees but must not be nailed on. Posters cannot be put on the walls or bulletin boards of any building.

Signs and posters may be left up until after the political rally to be held at noon Saturday, March 29. If a candidate's signs are not removed from the building after the rally, the candidate will be disqualified for his name not being removed from the ballot.

Candidates of the Student Association Constitution and By-Laws shall be on reserve at the Circulation Desk in the Library for the use of interested students and nominees.

Ray Shoots Oysters Fungus Triple Whammy

Great news for the oyster industry and biological research is in the making on the Rice campus. Mr. Sammy Ray, who arrived on the campus in September, 1950, to do research for his doctorate, is the chief figure in this news.

Mr. Ray is doing research on a parasitic fungus which may be causing the death of large numbers of Gulf coast oysters. His immediate goal is to determine the life-cycle of the fungus, so that some way may be found to combat it.

To accomplish this, Mr. Ray has developed a technique of diagnosing the fungus in cultured tissue. This technique is entirely new, and greatly simplifies the work. This makes it possible to prove positively that the parasite is a fungus. Until this time the fungus diagnosis was only a guess. The technique will prove useful to biologists investigating oyster mortalities.

In these experiments, much has been learned about the conditions necessary for the growth of the fungus in its natural element. The main problem now is to raise it in a culture that will let us see and handle this fungus, which is necessary to infect the oyster. Once this is found, the life-cycle will be known. This will be a great boon to the oyster industry because the fungus, which is completely harmless to human beings, may be wiped out before it can be of harm to valuable oysters.

Mr. Ray, originally from Rosedale, Mississippi, did his undergraduate work at L. S. U. He is now conducting his research at Rice under the direction of Dr. A. C. Chandler, head of the Biology Department. His interest in the problem arose from work with stream and bay pollution, and the effects of such pollution on organisms in the water.

Campus Interviews on Cigarette Tests

No. 35.

THE LARGEMOUTH BASS

I'm a sucker for a left hook!

I've tried Camel for 30 days and... well, it's true.

Always a sucker for attractive bait, our aquatic brother went off the deep end and got caught on the quick-trick cigarette hook! But he warned his way out when he suddenly realized that cigarette mildness went off too real lighty.

Millions of smokers have found, too, there's only one true test of cigarette mildness.

It's the sensible test—the 30-Day Camel Mildness Test, which simply asks you to try Camel as your steady smoke on a day-after-day, pack-after-pack basis. No map judgments!

Once you've tried Camel for 30 days in your "T-Zone" (T for Throat, T for Taste), you'll say why...

After all the Mildness Tests...

Camel leads all other brands by billions

* Made in U.S.A. * Aromatic System includes: Original, Mild, Menthol, Filtered, Old Fashioned, and Filtered Regular. * Smokes the same as original 12 mg. test brands.

Angostura is a registered trademark of Barrow & Company, Inc., New York, U. S. A.

Camel is the American leader in mildness tests.

Camel leads all other brands in mildness by billions.

How to take advantage of the 30-Day Camel Mildness Test.

1. You order your Camel cigarettes from a tobacconist. A pack will be on you in less than a week.

2. You smoke Camel daily, three packs a day, at least one pack an hour.

3. After 30 days, you return for a prize.
The Presbyterian young people surveyed three avenues of the city for the Dallas Presbyterian Church. They will complete their survey this Saturday. All members of the PFW meet at 1:00 at the First Presbyterian Church on Saturday. Dr. Neilson will talk on "Life's True Value—Faith" at the meeting of the PFW next Thursday at 11 in 305 Fondren Library.

During Lent, members of the Newman Club will say the Rosary at noon on Mondays and Fridays in Room 305 Fondren Library. Joan Hickman has been elected recording secretary of the Newman Club. At the meeting of the Newman Club next Wednesday, Parker Counselor will show a film in the projection room of the library.

TO ENGINEERING STUDENTS

Graduating Engineers are offered a great future, in a great place to live by Lockheed Aircraft Corporation in Southern California.

They will discuss:
Your salary at Lockheed.
Your field of engineering at Lockheed.
Your training opportunities at Lockheed—and at major universities in the Los Angeles area.
Your chance for quick advancement at Lockheed.
The better living conditions for you in Southern California.
The vast range of recreational opportunities in Southern California.

Your Lockheed Counselors will be on the campus to talk with you on...

Wednesday March 12

Contact your Placement Officer at your Lockheed Counselor today for an appointment with the counselors.

COP'S VIEWPOINT

Stephenson Expresses Ideas On Rice Parking Tangle

By JONCE JOHNSON

Mr. Stephenson, proctor of Rice Institute, is very well known by those students who drive their cars to school. He is always courteous and helpful about the student and his parking problems, and he is also just as polite and firm when it comes to violations of parking rules.

Mr. Stephenson is a retired elementary educator who is well known in his field. He has attended Sam Houston Teachers College, North East Texas Teachers College, University of Texas, and the University of Houston.

In his forty-nine years as an educator, Mr. Stephenson has held many posts of importance in his field. He organized the Northeast Texas Teachers Association, served on the executive committee of the Texas State Teachers Association, and was twice asked by the State Department of Education to serve on Correction Committee. For the past twenty-five years, up until last spring, he has been principal of Travis Elementary School here in Houston.

Mr. Stephenson was asked to give his thoughts and opinions on the parking problem that is now facing Rice. From his first-hand observations, Mr. Stephenson had this to say, "The general opinion expressed by instructors, students, and other workers is that we need more parking space. The problem has reached the point where many people are actually sacrificing by leaving their cars at home, while others are forming car pools rather than face the problem of finding a place to park."

"At first I saw students and instructors who had difficulty finding a parking place having to make a mad dash back to the classroom before the instructor or class walked out. When it rains, I particularly think that facilities should be available.

"There are other vital questions relating to the parking problem facing us such as the location of a parking lot where it will do the most good. In past years, the route of traffic on the campus has shifted from Stable Port to the west end of the Chemistry Building and Anderson Hall as demonstrated by the overflow of parking."

"Two other things those parking on the campus need are numbers stickers and registration of cars they bring on the Campus."

STUDENT COUNCIL

Students Asked To Vote Today On Lounge TV Set

By JERRY WIENER

A motion was put before the SC to buy a 21 in. television set for the student lounge, to be placed in the corner next to the Thresher office. The pros and cons of the motion were discussed, and the motion was tabled until next week, so that student opinion could be canvassed. A ballot was placed at the end of this article allowing you to vote on this matter.

The purchase of a television set seems to this writer to be a good idea, if only from the viewpoint of providing relaxing entertainment for those people who come to the lounge for that purpose. The card tables will be placed in another part of the lounge, so that bridge players will not be disturbed by this other form of entertainment. The set will be paid for from the excess funds now on hand in the Students' Properties Committee, and will not come out of the SC funds or from the students' pockets. Also, and this may be a superficial reason to some, the NRI Elections of 1952 will be directly televised to Houston, and this will be of interest to a large percentage of the student body who would not otherwise get to see this event of vital importance.

The University of Houston has finally realized that they cannot possibly win the blood drive contest under the rules as they now stand, no matter how much blood they donate. They are trying to get the rules changed so that they will, at least have a fighting chance to win, and the question is right now hanging in the air, with some members of the SC reluctant to change the present rule, because, after all, the U. of H. did agree to the rule at the beginning.

Hermance Elected President of Health Group

G. L. Hermance, Professor of Physical Education was elected President Elect of the Southern District of the American Association for Health, Physical Education, and Recreation at the annual convention held in Atlanta, Georgia, February 26-28. Over 600 delegates from the thirteen states comprising the Southern District of the American Association for Health, Physical Education, and Recreation were in attendance.

The annual convention of the American Association is to be held in Los Angeles April 7-10.

Air Officers Pay Offered To Select Trainsees By Navy

Two members of the Naval Aviation Cadet Procurement Office at the Naval Air Station, Dallas, B. C. Davidson, aviation machinist mate first and J. W. Vessey, gunner's mate third stopped here this week on their coast-to-coast tour of Texas and Oklahoma. Young men capable of passing the rigid physical examination and having at least 60 hours of college credit and who want to fly on navy officer pay are urged to talk with the procurement officer at the Dallas Air Station, or contact Mr. Zander at Rice's Phenomenons office. Successful applicants will receive 11 months training, part at Pensacola, Fla., and part at Corpus Christi, and upon graduation will receive their wings and a commission.

SC Ruling

(Continued from Page 1) and the matter no way seems to be settled.

It was moved to send Ann Coe to Ft. Worth to be Rice's representaive to T.C.U. Ranch Week for the week-end of March 14, 15. The motion carried.

HOT SCRUMBLE

Seconds after a telephone alert to a nearby Air Force base to "scramble," pilots hustle to their jets. In minutes, the sturdy, sweep-back interceptors thunder skyward.

This is the real thing. Pilots call it a "hot scramble." Live ammo riders in their guns. It starts when an Air Force radar station detects an aircraft which cannot be identified. A telephone call by direct wire galvanizes the jet crews into action.

Modern air defense requires lightning-fast, dependable communication. That's why the military defense system is interlinked by a web of direct telephone lines.

Some of today's college graduates will be piloting Air Force jets. Others will be welcomed into the Bell System where they can help, in peace or war, in the tremendous job of meeting the communications needs of our nation.

BELL TELEPHONE SYSTEM

Former Professor Begins Lecture Series Tomorrow

Dr. Harry A. Scott, formerly chairman of the Department of Physical Education at Rice, and now Professor of Physical Education at Teachers College, Columbia University, will visit in Houston on March 14, 16, and 17.

Dr. Scott, author of the recently published book, "Competitive Sports in Schools and Colleges," will present a lecture on "Mid-Century Trends in Health, Physical Education, and Recreation" at the Lecture Lounge in the Fondren Library on Sunday, March 16, at 4 p.m. All students are invited to attend.

TISA

(Continued from Page 1)

The officers chosen for next year are: Pres.—Louise Ellsworth, Hardin Simmons; V.P.—E.G. Wells, North Texas State; Secretary—Julie Berg, Tarleton State; Bulletin—Bill Hunter, Texas University; Parliamentarian, Don Young, Texas A. and M, and a Cultural Committee was set-up whereby top flight entertainers and top entertainers might be brought to Texas upon request of a sufficiently large number of TISA members to entertain at schools or colleges or at schools in a reduced manner. The committee will negotiate with entertainment chosen as to dates and rates.

First Triangular Track Contests Slated For Saturday

By DICK KARIG

The Rice track and field team will attempt a comeback in a triangular meet with Texas and Texas A&M at College Station tomorrow after a spotty showing in the Border Olympics last week. This will be the first of three triangular contests between the schools, with meets at Austin and Houston slated for later in the season.

The outstanding feature of the meet will probably be the performances of A&M's Darrel Hooper in the discus and the shot put. Hooper has been consistently establishing new marks with the shot and was the NCAA champion in that event last year. He set the conference record with a 58-5 5/8 throw last year and broke the Border Olympics record with a throw of 58-5 9/16 Saturday. His discus toss at the '51 Conference Meet was only six inches better than his Conference Meet record with a 53-8 5/8 heave last year. He set the conference record with a 54-7 1/2 heave last year. He set the NCAA champion in that event.

Rondelet (Continued from Page 1)

The freshmen fencer from Brooklyn, N. Y., placed third and fourth in the conference discus record for several years during the late 1920's. Other weight men are Austin Blount of Lamar's Fred Stancliff, who was ineligible last season. Jackson and Stancliff are both excellent varsity prospects and are improving every week. Stancliff has been well by Lamar's Fred Stancliff, who was ineligible last season. Jackson and Stancliff are both excellent varsity prospects and are improving every week. Stancliff has been well

In a cigarette, taste makes the difference—and Luckies taste better!

The difference between "just smoking" and really enjoying your smoke is the taste of a cigarette. You can taste the difference in the smoothness, the flavor, the enjoyable taste of a Lucky...for two important reasons. First, L.S./M.F.T.—Lucky Strike means fine tobacco...fine, mild tobacco that tastes better. Second, Luckies are made to taste better...proved best -made of all our principal brands. So reach for a Lucky. Enjoy the cigarette that tastes best. Be Happy—Go Lucky! Buy a carton today!

A visitor on the Rice Institute campus Thursday was John Parks, a member of the Class of 1939 and a former student of Cornell University. Mr. Parks also attended the recent annual meeting and grounds committee at the famous Ithaca, New York school. Mr. Parks visit at Rice was to make an inspection of the new gymnasium and the new training room and to pick up some old classmates. Carrell Martin of Rice's ath- letics office, conducted Mr. Parks on the tour. The Owls, incidentally, play a football game with Cornell in Dallas this year.
