Chevron Dance
The Rice Chevron is holding an informal dance after the TCU game. Those who plan to go to the Organized Reserve Army — 1943 GST. All members and their dates will be admitted free; nonmembers per couple. Music will be by Hi-Fi.

Management Jobs
Mr. Marvin Garrett, Jr., representative of the Civil Service Commission, will be on the campus next Monday between 1 and 3 p.m. in Fohn Library Lecture Lounges in order to discuss the federal government's program of Junior Management Careers.

Christmas Jobs
Jobs at the Post Office may be obtained at the Post Office (201 Lovett Hall). About 100 Boys from the school will be employed by the Post Office during the Christmas season.

Faculty Lecture
Dr. C. M. Class, Assistant Professor of Physics, will deliver the sixth lecture in the Sunday afternoon series today. "Recent Advances in Nuclear Physics" will be the topic. The discussion will begin at 3 p.m. in the Fondren Library.

Favorite Election
This Tuesday, one again the students of the Rice Institute will be called upon to choose the Freshman Football Captain for the upcoming football season. The polls will be set up at lunch and at 7:30 p.m. in Lovett Hall and in the Rice Faculty at 4 p.m. in the Lecture Lounges. He will speak on Recent Advances in Nuclear Science.

Thanksgiving Service
Tuesday at Emanu El
Rabbi Robert I. Kahn will be the main speaker of the all-school Thanksgiving Service which is to be held next Tuesday at 12:15 at Temple Emanu El (1850 Sunset Blvd.). Student participations on the program will be Bill Allen for the Invocation; DanDee Med, scripture reading; and Pauline Applebaum, solo.

Freshman Elections
To Be December 4
Petitions for six freshman offices (president, vice-president, secretary-treasurer, and three Student Activities Committee members) must be submitted by Wednesday, November 25, according to Clayton Blume, current Student Activities Committee member. Petitions will begin to be accepted on November 20 and will end on December 4 with an election rally at which all candidates may speak to the class. Expense accounts must have been submitted by that time.

The petitions must carry a statement naming the candidate and the office for which he is running, the signatures of 10 members of the freshman class, and a signed statement by the candidate that he has been a member of the freshman class since the first day of classes.

Engineer Magazine
Comes Out Today
The Rice Engineer goes on sale today, marking its fall debut in a "surprise" pink cover. But one feature is surprised at its arrival following the many advance notices made by Editor Tom Flynn.

The lead story, written by Dr. W. V. Houston, asks, "Does College Make an Engineer?" and then answers in an interesting article that gives an insight into the thinking that lies behind planning an educational program.

Dr. Houston's article is backed up with a detailed explanation of the engineering curriculum at Rice — of special interest to lower classmen who are just beginning the story from someone who has seen it first-hand. "What a Freshman can Expect from Engineering is explained in articles on each branch — Chemical, Civil, Electrical, Mechanical, and Chemical — Robert Stovall, Byron S. Applebaum, A. B. Howel, and Mauritz Patterson.

"Be sure to read "Fanny," a D-C Var cover story, which is an attempt to bring the love of life of a resistor who was too busy to think about it to the attention of the whole student body. There are other articles by Robert Robison, A. B. Howel, and H. A. Robison, Jr., which is a picture story of offshore drilling platforms. The magazine sells for 25c.
The Committee on Student Housing held its second meeting Monday, November 8, in Lovett Hall, and at that time discussed topics for committee consideration and the tentative order in which they will be scheduled for future meetings.

With the aim of housing 100 girls and 200 boys on campus, the committee began to think of some over-all plan which would meet the needs of these extra students, and perhaps at the same time strengthen all of Rice's student government. Not only do the purely physical problems, such as dorm locations, building designs, cafeterias, and so on, have to be worked out, but also some system of distributing the extra students among the various dorms. At this time boys apply for the rooms they want, and often get them, but the administration still does the placing.

The Housing Committee has been discussing the feasibility of some form of the College System. This system works differently in all colleges, and Rice would not attempt to follow any one existing pattern. Under this plan each dorm would be called a College and would include freshmen boys into its College. Each would have its own student government, could adopt its own rules, and have its own student lounge. Many problems must be met; if this system is to be carried out, such as the handling of incoming and graduated students, how to incorporate town boys into schools, and Rice would not attempt to initiate any one existent pattern.

The Rice Housing Committee met to discuss the College System most effective, but future meetings will be devoted to this problem. The Committee members would very much like to hear student body views and suggestions on the problem of housing while plans are still in the formative stage.

The student on the committee are: Kathy Hill, Martha Harris, Jim Thompson, Rex Martin, Joe Steele, Steve Miller, John Ryon, and Bob Wesley.

The committee is headed by Dean McBride, and the faculty members are: Dr. Dodson, Mr. Herman, Mr. Leslie, Mrs. Keck, Robert Lane, Mr. McKnight, Mr. Doyn, Dr. Parish, Mr. Ulrich, Mr. Ryon, and Mr. Wesley.

Honor System

(Continued from Page 1)

nothing morally wrong about the idea. The majority of the council members were of the opinion that if such advertising were allowed, it would be to the detriment of all-school organizations, as the body refused permission of such advertising.

Bill Allen announced that the council was sponsoring a program which would feature Israeli students next semester. He expressed his disappointment of the sparse attendance at the business forum. Another form of student government which would not be a student organization, would be the Delta City under the supervision of the Student Housing Committee.

The work mirrors the life of a town in three episodes: the dreams of night, the toils of day, and the recreations of evening.

The sixty-three roles in the piece will be played by about fifteen actors, cast from the regular company, with only one or two extras (usually girls) included only occasionally. The staging is to be illuminative and will include a large lighting scheme.

The director Michael Egan, was urged to conduct the Rice Players for three years and assisted him in the original production. Mr. Egan's timing and devotion to the art of life Mr. Thompson was highly interested and impressed by the present work in the poet's experience of creative self-expression in this medium.

Mr. Egan is currently appearing in the touring company of Luisa. Incidentally, he played the lead in the New York production of Sean O'Casey's Dead End Story, which is one of the Rice Players' current productions.

If this staging of Under Milkwood goes up on the stage, it should be one of the most encouraging Rice Players' productions. The present attempt to raise the level of drama in Houston. The Alley's stage producions are generally thought to be the most dramatic, and the Rice Players' performances have been much talked about.

Two EE's Attend National Meetings

Two fifth-year electrical engineering students who were introduced to the management of Rice University were allowed to attend the national meetings of the two major United States engineering societies recently.

Thomas A. Babson, president of the Gamma Chapter of Tau Beta Pi, traveled to Ames, Iowa, where his fraternity's national convention was held on October 21, 22, and 23. All of the association's 66 chapters were represented at the session.

Bill Haer, President of Alpha Beta Chapter of Sigma Tau attended the annual meeting of the fraternity's national convention November 10, 11, and 12 at the University of Nebraska, Lincoln, Nebraska, where the fraternity was founded in 1904.

**THE RICE ENGINEER**

**Religious Activities for Week Stated**

By JO-ANNE HICKMAN

The Newman Club has planned the Annual Retreat for Sunday, December 5, at St. Thomas University. Father McNutt, sponsor of the club from Holy Rosary, will be the retreat master. The day will begin with Mass at 9:30 and conclude with meetings until 4 p.m. Breakfast and lunch will be served. The next business meeting of the club will be Thursday, December 2, when Father McNutt will present more ideas for organizing a region of Mary on the campus.

Rev. Oliver Harris will speak on "Christian Victory" at the meeting of the L. R. A. on Thursday, December 2, at 3:30 in Fondren, at noon. The Metropolitan L. R. A. meets Sunday, November 28, at 5 p.m. at Zion Lutheran Church, 3530 Beauchamp. They will present a Thanksgiving Pageant titled "Give Thanks Unto the Lord."**

**AIR CONDITIONED APARTMENT**

New 2 room air conditioned and central heated apartments, across from Rice Stadium. Will be available for rent about Dec. 1.

**Photo JA-4105**

**Intimations of 'Hell Week' Come With Molasses Feed**

Monday night at 7:00 a group of holier-than-thou sophomores gathered in the hallways of Fondren Library, each boasting of his deeds—molasses on their clothes, feathers, etc., deposited upon the duly selected individual.

After about thirty seconds of incitingly dishonest activity, this was the common response to the challenge of the individual who had "the locker." The crowd immediately desisted; the majority ran to the library to take part in the proceedings, while the minority vanished from the scene. Indeed, the crowd had never been as such a crowd as it was that night. Dick Jergens played for a big crowd; we heard that he was a great one with terrific food.

**Milkweed**

(Continued on Page 3) Max was presented. A few weeks ago the Players' reading of Elliot's Murder in the Cathedral provoked favorable city-wide comment and raised the Players' inclusion (with the Alley and the Playhouse), by the nationwide radio program, Stage Struck, as an example of the increased interest in "grass roots" theater as it is in America.

Thus I feel it is not too much to hope that in the near future it will be impossible for one to say, "I love drama, so I don't attend the commercial theater in Houston." Now it remains for us to see what Mr. Egan and the Alley will do with Under Milkweed. Only if we support it can an attempt to establish drama as a legitimate art succeed. The admission to Under Milkweed is fifty cents, which will be contributed to the Alley's building fund.
Threshing It Out

Blacks Metal Monster

To the Editor:

I have been reflecting pro and con about the whole question of life in a dormitory environment. Let me, in a courtesy, explain. I cannot see how this abhored metal monster dormitory system has taken hold on our campus, but has also been allowed to take root at truly triumphantly on our campus. I believe this in the wild. To name it is the beginning of some of the things which cause your violent assertions. I think, in a restrained feeling, I seem to feel that this is the basis in front of the Mechanical Engineering Building. A great deal of objection and violent objections, however, are not enough to get the results down. In addition, we must have some constructive something in place. Specifically, we must have a definite limit of ten feet. We must also re-examine the honor system. We cannot preserve our privilege. Our purpose could be in danger in this case.

To my way of thinking, this is certainly the only way the honor system could work. In danger becomes a necessary factor. To we say, "If such a thing can exist, why should it be desirable to exist in the twentieth century? Machines and most are an inseparable part of our very lives so dreadfully much harm.

For the sake of our future (on edge of the edge of the edge, not theirs), fore the sake of the substitution of a mechanistic effective, system of traffic control, let us rid ourselves of this detested road chain.

MARY NUGENT ROBB

A Mad Parade

An Open Letter to the English Department

There are several things wrong with the English Department. The English 200 courses, in particular, is in the hands of sheer chance. Here why:

1. Each instructor in the quiet section has a different method of testing, a different method of grading.
2. Points that are taken off on tests are unaccounted for.
3. Certain instructors grade excessively, and others grade excessively.
4. Certain instructors grade syn- tax and spelling in the tests, while overall the policy of the English Department eminently in their own way, manuscripts written at homes must be accepted.

From number one above, I find this possible: the same student may receive a poor grade in one quiz section, a poor grade in another; the same amount of effort will result in the same amount of information, but the same grade — even though the same information be given on the same test in different circumstances.

From number two I conclude that the instructors are indulging in unimaginal things, perhaps for lack of understanding of our lives, while number three I conclude that the unaccountably missing students are being all the more likely to take the exam. From number four I conclude that the instructors annotate the tests with thoroughness, and, at best, meaning- less scribbles.

From number four I divine these general laws, which are the essence of the English Department:

1. When one is total nonsense and is not hurried for one, one must correct his human mistakes.
2. When one makes a mistake in a manuscript, one is only human.
3. When one is writing hurriedly on a test, one must not be human, for as a human one may dangle an inessential or forget to put an "i".
4. When one makes a mistake on one's test, one is careless.

C. Spellings before knowledge, ritualistic, and methodical before invention, freedom of the students before the education.
5. Submit.

Jim Walker asks:

Can a mechanical engineer make real progress in a chemical firm?

"Pick" Pickering answers:

Well, Jim, that's what the lawyers call a leading question, and the answer leads right into my bailiwick. I came to Du Pont in 1940, after taking a combined mechanical and electrical engineering course. So I had what you might call a double reason for wondering about my future with a chemical firm. I soon learned that the success of a large-scale chemical process is vitally dependent upon mechanical equipment—especially for a new process—depends on (1) Research, (2) Development, (3) Plant Engineering, being unable to bend his outstretched arm. Lo and behold; he couldn't bend it until Tractir gave his permission. There are only two sources of sleeplessness in your reporter's mind after a fascinating exhibition: (1) Did Tractir's statement that those with the highest I.Q. respond more quickly to hypnosis have any additional psychological effect? (2) Does it take a hypnotist to make Rice students sack out?"
**PREDICTIONS**

Only five of the conference teams have established a strong defense this season. No one has shown the ability to stop the passing game. The best defense is that of the University of Texas, but they continue to allow too many big plays. Arkansas is next, followed by LSU. The defense in both these states is not as strong as in Texas, but they are better than most.

Texas A&M's powerful freshman team, despite having some weak points, is a strong team. They have lost to Texas and Arkansas, but they are looking forward to their second meeting with LSU. The Aggies are likely to come out strong against the Tigers.

Texas Tech is another team that has shown some promise this season. They have lost to Oklahoma and Missouri, but they are capable of defeating either Texas or Oklahoma.

Oklahoma is a team that is always difficult to predict. They have lost to Texas and Missouri, but they are capable of defeating anyone on any given day.

Missouri is another team that is difficult to predict. They have lost to Oklahoma and Texas, but they are capable of defeating anyone on any given day.

Texas is a team that is always difficult to predict. They have lost to Oklahoma and Missouri, but they are capable of defeating anyone on any given day.

**QUARTZ CRYSTALS**

How a 1¼ hour "gem-cutting" operation became an 8-minute mechanized job

**PROBLEM:** Preparing quartz crystals can be done as electronic frequency controls calls for the highest degree of precision. So much so, that prior to World War II, skilled gem-cutters were employed to do the job.

But during the war, there were not enough skilled gem-cutters to keep up with the demand for crystals in radar, military communications and other applications.

Western Electric tackled the job of building into machines the skill and precision that had been provided for the most highly skilled operators.

**SOLUTION:** Here is how quartz crystals are made by semi-skilled laborer in a fraction of the time formerly required:

A quartz stone is sliced into wafers on a reciprocating diamond-edged saw, after determination of optical and electrical axes by means of an oil bath and an X-ray machine. Hairline accuracy is assured by an orienting fixture.

The wafers are cut into rectangles on machines equipped with diamond saws. The human element is practically eliminated by means of adjustable stops and other automatic devices.

The quartz rectangles are lapped successively to a thickness of 0.005 inch, or less. The orientation is practically eliminated by a high tolerance of plus or minus .0001". A timer prevents overlapping. Finally, edges are ground to specific length and width dimensions by a fully automatic micro-feed system.

Quartz stones are cut into wafers on this diamond-edged saw, with orientation to optical axes controlled by fixture. Various grades and types of wafers are cut into crystals of various types of machines designed and developed by Western Electric engineers to mechanize quartz cutting.

The quartz wafers are then cut into crystals for use in electronic devices. The quartz crystals are cut into wafers on this diamond-edged saw, with orientation to optical axes controlled by fixture. Various grades and types of wafers are cut into crystals of various types of machines designed and developed by Western Electric engineers to mechanize quartz cutting.

Plan To Take A Nice Novely Home This Thanksgiving

Manufacturing plants in Chicago, Los Angeles, New York, Dallas, St. Louis, Richmond, and New York City.
The Rice Owls added one to nine to make it ten years in a row that the Aggies have gone winless against the Owls. But since 1948, when Rice had to score two touchdowns in the last five minutes, aided by Hughey Keoney’s ninety-eight-yard punt, has a Rice team had such a day dominated the first half in statistics. They gained 14 first downs and Rice only two, both for touchdowns.

Dicky Maegle stopped the Farm’s first drive as he intercepted a Kettler pass on the Owl 40-yard line and returned 15 yards to the Aggie 50. The first Owl play was a touchdown pass from Proctor to Holland to Stowen. Holland tipped the pass on about the Aggie 20-yard line, but fortuitously Morris Stone was behind him and caught the bobbed ball on 13 yards to score without a hand touching him. If the play were rehearsed it could not have been executed any more perfectly. Three-knurnbork kicked the extra point and Rice went ahead 7-0. Immediately preceding the kickoff, the Aggies marched 70 yards to score six, and one minute later Kettler kicked the extra point to tie 7-7.

Rice couldn’t move the ball after the kickoff, for the first half Rice only managed 13 points to 47 for the Aggies. After the Aggies were unable to move, but a great 50-yard punt by Pinky Nisbet put the Aggies in a hole which cost them 6 points to get out of. Guday Jay Barile recovered a Kettler fumble on the Farmer 15-yard line to set up the TD. A Nis- bet to Holland pass tied the ball game 15-13 and ended the scoring for the first half.

In the first few moments of the second half Edwald Raphorn crashed through the Aggie tackle to block a punt which bumbled out of the zone, and Rice received a 2-point safety. The Owls now led by the closest margin of 15-13. The only other action in the third quarter was a far field goal attempt by Elwood Kettler, who is the Midwest leader in total offense. Finally, the thin blue line began to drive, and Rice showed its first intimations of greatness this afternoon by scoring 80 in 12 plays to take a lead 28-13. The backbone of this drive was a 23-yard pass from Nisbet to Atchley, one of the most adept pass combinations in the country. After Jerry Hall had made both the touchdown and the extra point for Rice, the miraculous Aggies marched 65 yards to score seven, all contributed by the fine quarter- back Elwood Kettler.

The Aggies, trying desperately to win their second game of the season, tried an endside kick, but the Owls was up to the tricker, but after beating tired Farmers

THE TESHER

Israeli Students To Give Program Next Tuesday Night

BY BILL ALLEN

Even more of the international scene will be brought to Rice than usual Tuesday evening at 8:00 when a group of four Israeli students will give a program for the Rice community.

The four students are Mr. Yaakov Saphir, Mr. Ephraim B. Magroll, Mr. Yehudah Menev, and Miss Rachel Hadas.

Mr. Saphir will give short talks on a non-political nature, subject, such as the Hebrew language, history, and culture.

Miss Hadas has attended the Institute of Music and will sing a few songs and dances.

Mr. Menev is an accomplished violinist and Miss Hadas has an extensive study of the folk songs and dances of Israel. They will each give a short musical program and will close the meeting with more music and dances if desired.

The speeches will be followed by a question and answer period, as is customary here at Rice.

These students from Israel have all had very interesting backgrounds. All four were active in either the regular army or the commando-underground units in the recent Israeli-Arab war. They have all taken work toward advanced degrees in various universities in the United States.

Mr. Saphir is a candidate for P.R.D. in Political Science at Columbia. Mr. Magroll is a graduate of the Yale Law School and is working on his doctorate in Law at the University of Pennsylvania.

Rice - A&M

(Continued from Page 7)

to the ball, Rice was unable to move once more, so Fitzh Neshlt was forced to pass from his 4 yard line. With only a few moments left in the game the lack of Apple reserve became more noticeable. They were unable to gain a yard from their 16, and on fourth down the kicke, Gene Henderson, was so badly rushed that his kick traveled only eight yards.

Three downs and the Rice machine ground out 27 yards to the Apple three on the next play, with only seven seconds remaining in the game, Dicky Moegle started for three around end to cross the goal line. Jerry Hall, a fine sophomore fullback, who will be playing four years or more, kicked the extra point and Rice led 19-19. The game ended on the kickoff play.

Outstanding was the defensive play of Don Wilson and Ray Ed Royleus. Next week the Owl followers will probably see two backfield specialists in the game who haven't been seen much this year; the improved Jerry Hall and the Brehm and Gonzales combination.

Threshing It Out

(Continued from Page 4)

Is the leadership in the English Department satisfied with the laws that Proctor-like came, and also like the department? Does the leadership in the English Department seem like Cadmus or reap like Joseph? Does the leadership in the English Department really lead, or does it shrink responsibility, and, like a general losing a battle, say, "This, such and such, do you please; I will remain in the rear and pray."?

With hopes for an improvement in the department,

TEACHERS OF TOMORROW

FESTIVAL AT COMMERCE

The Teachers of Tomorrow Festival will be held December 8 at East Texas State Teachers College in Commerce, Texas. Miss Jean Holland and Lamonie Holland will represent Rice at this program, and will compete in the contest for Mr. and Miss Teacher of Tomorrow. Contestants will be introduced in a preliminary round this afternoon, and finalists will be announced at 6:00 p.m.

The final round will then take place with all contestants present, and the program, which should be very interesting, will be televised.
