TISA District To Hold Conference Tomorrow At U of F

Sophomore Dance Tonight Night At Crystal Ballroom

By Walt Silvus

Sophomore Dance At Rice Hotel Tomorrow

The Crystal Ballroom of the Rice Hotel was too big to decorate, but if it could be done, the sophomores who have shown an inclination to decorate everything in sight would have all it decked out for the annual sophomore dance to take place there tomorrow night at nine o'clock.

The affair, which climaxed Hill week (referred to as Freshman-sophomore Week in official publications) and ends the red glove of the decorated lounge, will feature an outstanding floor show, the height and light of which could possibly be the presentation of Wes Pittman, sophomore president by the class of '56.

Even if Wes makes it to the dance in a more conventional costume than the fresh are likely to find a trio of Sharran Jones, Sally Baim, and Anne Westerdale, and rendition playing by Ken Goodner will entertain the capacity 500 couple crowd along with Paul Shain- man and Mary Lou Clark. Jim Aber- nathy will emcee the show.

Tickets to the dance are on sale in the lounge, and the privilege of dancing to the music of Maynard Gimbel and his orchestra can be purchased through a devil's mouth of only $1.00 per couple. Enjoy. Everyone is urged to obtain their tickets in advance, though tickets will also be available at the door to the semi-formal dance.

PALS Buriesque On Women" Monday And Tuesday Nights

Women "tie tie's" the life and theme of the year's Burlesque Week. March 14 and 15, 5 P.M. Where: Avery House. Price: Only 75 cents for an entertaining evening of sight and joy.

A check, a bra, a frill, a quill, a poodle skirt, and a cat will all be represented in this show. This group will sing and dance to much well known tunes as "Beware, Beware, Will Protect The Working Girl," "This Old Man Has A Golden Rule," and "Nobody Loves A Fat Girl."

Renee Armstrong of the Delta Chi sorority has been chosen for dramatic honors in the production. Lynn Koehler represents the sweet little innocent farm girl and various other chores associated with the production "Tsk Tsk"—which tells All About Women (for only 25c).

S L S County Fair

Three sessions ofojication groups will endeavor to find ways to successfully perform job of leadership which studies may hold for them.

The conference will meet on the campus, all day, and will consider the problems of leadership as a whole. Discussion groups will consider such problems as: What qualities does a good leader need? How can one develop those qualities for himself? and To whom should a leader be responsible and how may he fulfill those responsibilities?

The conference is designed to meet the needs of all students and any student who wishes to participate, interested students are urged to contact their student council member. Allen or any sti高额 council member.

Two Seniors Elected To Phi Beta Kappa

Dr. William B. Masterson, presi- dent of the Beta Chapter of Texas Alpha Phi Beta Kappa announced today that Alive Hart, Allen, and Jack Wade Iawkins have been selected to the Honorary Fraternity this year.

Dr. Masterson also announced that a fall-finding committee was to be set up by Phi Beta Kappa to study the eligibility of Bulldogs. Administration-Economics majors and En- gineers will remain in the list of "eligible majors" for the years junior class.

The eligibility of others in those majors who are presently below the junior level will be decided on the basis of the committee's report.

JUNIOR WEEKEND

Tomorrow night is the dead- line before which any student must be admitted to Phi Beta Kappa. No student who has not yet turned in the required are is eligible.

In 1955, Rice will sponsor their TISA district project, a Leadership Try- ing Conference, which will be held on the University of Houston Campus.

The Conference will feature Bob Casey, County Judge of Harris County, who will deliver their "Orientation for Leadership Training in Student Work," as well as a few from the schools participating the various Texas high schools.

MARCH 11, 1955

Scott Middlehan and James E. Ebanks were elected to the Sophomore Dance at the Rice Hotel next Friday night. Petitions for all elections are due next Friday, March 18. Petitions may be turned in at the office of the Student Government Association, which will serve as (airman of the final evaluation committee.

The Rice Hotel Tomorrow Night At Crystal Ballroom

Hil fled To Sponsor Jewish Music Sun.

In honor of Jewish Music Month this year, the Rice chapter of Hillel will present a program March 14 at 5 P.M. in the Lecture Lounge, to acquaint the audience with Jewish music. The program will include "Nigun" by Ernest Bloch. This will be followed by explanatory material and singing the first time. A sample of Jewish life will be given by presenters who will come from various Jewish groups. They will acquaint themselves, that's nerve!

Are women satirical? Come and judge for yourself on March 14 and 15, 8 P.M. Where: Autry House. Price: Only 35c. This will be a burlesque production "Tsk Tsk"—which tells All About Women (for only 25c).

Women "tsk tsk" is the title and theme of the year's Burlesque Week. March 14 and 15, 5 P.M. Price: Only 75 cents. Where: Avery House. **Choice of Parents**

**Choice of Wife**

**IMPORTANT DECISIONS**

**Choice of Job**

You don’t have any choice on the first and very little on the second . . .

On the third however, it’s strictly up to you — a poor choice can throw you years behind your classmates and a good choice can put you years ahead.

At Chance Vought, young engineers (Aeronautical, Mechanical, Civil and Electrical) have every opportunity to make a mark for themselves in the industry that places the greatest value on engineering skill and ingenuity.

The very nature of the modern aircraft — its immense complexity and its never-ending development — presents technical problems that are unparalleled in any other field of engineering.

The chart illustrates two things: first, the extent to which our work involves the various engineering and scientific specialties and second, the scope of the opportunities that exist for the young engineer.

For more information regarding these employment opportunities please contact your placement office in order to arrange for an interview with our representative when he is on campus, or write for a copy of “Your Career With Chance Vought Aircraft”.

Mr. W. Alvis Parish, President of the Houston Lighting and Power Company, and Mr. Jack C. Pollard, partner in the Robert H. Ray Company, have been elected members of the Institute's Board of Governors, Mr. George R. Brown, chairman, announced Saturday.

"Mr. Parish will bring to the Board a wealth of legal and business experience which will prove invaluable in handling the business affairs of the Institute. Mr. Pollard's wide knowledge of the oil industry will be especially helpful in view of the various oil interests of the school," resulted Whittinghill and Lackwood.

Mr. Parish and Mr. Pollard will succeed Mr. Harmon Whittington and Mr. Mason Lockwood, whose four-year terms have expired. They will continue to serve on the board as emeritus members.

Mr. Parish is a former partner in the Houston law firm of Baker, Botts, Andrews, and Parish. He first became the light company's legal counsel in 1914.

Born and reared in Huntsville, Texas, Mr. Parish attended Winchester Normal College (Winchester, Tennessee), Texas A&M College, and the University of Texas, from which he received his law degree in 1916.

He is a director of the Houston Terminal Warehouse and Cold Storage Company and the Southwestern Drug Corporation of Dallas. He is also a member of the American Bar Association, State Bar of Texas, Houston Bar Association, and Phi Delta Theta Fraternity. He is an elder of Houston's First Presbyterian Church.

Mr. Pollard graduated from Rice in 1925 with a degree in electrical engineering. He worked for Humble Oil and Refining Company until he established the Coastal Oil Finding Company in 1928.

He sold that company in 1933 and became head of the geological department of the Magnolia Petroleum Company in Dallas, where he remained until 1942, when he became a partner in Robert H. Ray Company.

Well-known as a geophysicist, Mr. Pollard is a member of the Society of Exploration Geophysicists, the American Society of Petroleum Geologists, the American Institute of Mining and Metallurgical Engineers, and an elder of the Episcopal Church of Saint John the Divine.

Both Mr. Parish and Mr. Pollard are members of the Rice Institute Associates.

APO BEGINS OPEN MEETINGS NEXT WEEK

Theta Lambda Chapter of Alpha Phi Omega next week begins its open meetings for the second semester for the admission of new pledges. The first meeting will be held on Thursday, March 17, at 7:45 PM in room 106, Anderson Hall. Another meeting will be held one week later, same time and same place.

The purpose of these meetings is to give non-members an insight into the workings of A. P. O., the only fraternity in existence devoted 100 percent to service. It is composed of former Boy Scouts who want to continue their scouting while in college.

A. P. O. is planning a stepped-up service program on the campus for the Spring semester, and new members will find a place waiting for them. The program will be worked out with the co-operation and counsel of Dr. Masterson, Faculty Advisor.

The best ball for your game
has the exclusive
DURA-THIN COVER

Here's amazing new durability in a high-compression ball. Spalding Dots* with real soft resistance keeps the DOT uniform and true, even on rugged high-iron shots. The new DOT has a greater compactness for truer, more uniform flight. It's actually an economical ball for you to play.

And, with all this new durability, new DOTs still offer the long, long carry every hard-hitter wants.

At school, or on your home course, make your next round a better one with this greatest of all golf balls, Spalding DURA-THIN DOTS.

COLLEGE TO COLLEGE, COAST TO COAST—WINSTON

is really going to town!

WINSTON tastes good — like a cigarette should!

No wonder so many college men and women are getting together on Winston! It's the filter cigarette with real flavor — full, rich, tobacco flavor! And Winston also brings you a finer filter. It works so effectively, yet doesn't "thin" the taste. Winstons are easy-drawing, too — there's no effort to puff!
Rice And The Symphony

The high-priced Houston Symphony Society has alienated several conductors this season by putting business ahead of artistry. On the other hand, it has put business first and alienated the Rice Student Body. Entrance to the Student Se-
con is for some inexplicable reason denied to us. Surely we have less money to spend on the arts than the typical Houston high school student!

That there is an interest in serious music at Rice is evi-
denced by the Rice attendance at the Symphony's Pops Con-
certs. However, we do have a chance to hear the works discussed in the reading rooms.

With this in mind, we would like to ask all the students to
please hold their noisy study sessions upstairs, and thus make
the reading rooms quieter.

The entire subject of the noise in the library is really almost a shame. Most of us on the Thresher practically live in the
library. We work here, we eat here, we play here; in short, we do so much here that it is possible to sit at eat a meal. It
is, of course, to work at the library, it is possible to carry
on social relations at the library, to hear the latest jokes and
local news, but it's usually impossible to study at the library.

There are little nooks and corners on the upper floors in
which groups of students do study, but the reading rooms are
merely extensions of the lounge. When one really has any
studying to do, he is never seen in those rooms, but if one
goes to the library to be "seen" the rooms become crowded.

It's nice to have a social club on campus, and our library is
as nice an almost any student center, but it does seem a shame
to waste all those books.
The personal collections for the 1944-45 Chaity Drive are finished and, although we could have done a lot better, I feel that the results were fairly good. It is now up to the organizations of the campus. If their contributions do not put us over the goal, then we will try something else.

With the completion of personal collections, I want to give recognition to some people who did some mighty fine jobs. I want to credit Jean Smith and Al Boersman for dependability they show during their planning and execution of the Drive. Credit must also go to Ben Brewer, Bob Lyon, and Ann Miller for unsanily giving their time to work at almost every hour when collections were made. Both also organized the collections from Daily Club, as did Bonnie Flink with DuMoyer, and the Drive Committee put in valuable time making the collections. I wish I could recognize all of them here.

I also want to praise all of you in the student body, faculty of Rice who gave freely to help make the Drive a success. If you saw any of the boys and girls who worked on the first day of collections, you know that your contributions will serve a great purpose. I think that you will have just as much satisfaction in helping to make good people of these children as we have been warned at this age by their tragic environment.

Sincerely,

Bill Garrett

The answer to that is easy, Don, if you mean initial assignments. Generally speaking, a graduate's first assignment is influenced by his previous training and his expressed interest in a particular type of work. Whenever possible, Don Pont assigns a man to the type of work he is trained for and wants to continue in.

River Bend: The new East Coast College of Engineering offers an unusual program of undergraduate and graduate education in Architecture, Civil Engineering, Chemical Engineering, Electrical Engineering, Mechanical Engineering, and Mining Engineering.

Modern college of engineering offers an unusual program of undergraduate and graduate education in Architecture, Civil Engineering, Chemical Engineering, Electrical Engineering, Mechanical Engineering, and Mining Engineering. Classroom, laboratory, library and other facilities are unexcelled in the Rocky Mountain region. Regular teaching staffs are supplemented by visiting lecturers from other institutions and industry. Special research projects and seminars offer opportunities for creative work. All courses offered by the College of Engineering run for six weeks.

UNIVERSITY OF colorado Rocky Mountains

Located in Boulder, with its mild climate and cool nights, as a view of snow-capped peaks, and within easy walking distance of mountain Turner and hostel, the Boulder area is ideal for outdoor sports enthusiasts, and the Campus is a home-like atmosphere. Things like throwing food against the wall doesn't get it. The reaction that sign was disheartening because the fellows took it as a joke, and the sign was even torn down several times.

Home Like Atmosphere

Now maybe some of those fellows don't know what home-like atmosphere means, but I can tell them that our Commons is just like that.

(Continued on Page 7)
Religious Activities Announced

By Jo-Anne Hickman

This Sunday the Methodist Student Fellowship will sponsor the second in a series of discussions of "Religious Dimensions in The Arts," beginning at 7 p.m. in the Methodist Hospital Staff Lounge. Prof. Thad Marsh will speak on "Religious Dimensions in Drama." A weekend at Camp Bagby is planned for March 19 and 20, for all interested students. All interested students are invited to attend these events which will all be held at the same time and place.

The Church of Christ Club will have an open discussion on religious topics next Monday afternoon at one o'clock at Autry House. On March 21 the group will hear a talk by A. C. Pullins of Nashville, Tenn., on "The Inescapable Question: Where are You?" Members will have Saturday at noon from Autry House.

The Canterbury Club will meet Sunday at 4 p.m. at Autry House. They will visit the Greek Orthodox Church. Dinner will be served, Communion and Coffee Club will be next Wednesday as usual.

The Lutheran Student Association will meet at the usual time next week for a Bible Study and discussion.

PLAYERS TO BEGINNING

By Mark Morris

The Rice Players production of Frank Wedekind's Earth-Spirit opens Sunday, March 20 in the Exam Room of the Fondren Library. The play will run three nights, with the curtain at eight for each performance.

Mark Morris is the director. He will also deliver the prologue to the play.

Second Act

As the second act opens Lulu has married Schumann, Dr. Schon (Har- dy Havens), whom she loves, is trying to break off with her to marry a respectable girl. She refuses to discuss their affair, so he tells Schumann how things stand. Schumann is quite sensitive, slits his throat with a razor when he comes to realize the truth in the situation.

Lulu is kind and personable, although scarcely the girl-next-door type. She is somewhat demanding. The play is told almost entirely in a comic tone. The tragedy is inherent: Schumann's character disintegration as he fails to free himself from the Earth-Spirit. Thus a good time is had by all.

Others in the cast are Don Gibb, Robert Morris, and the cast are Don Gibb, Robert Morris, and

He figures for the future

It's James Kirchoff's job to look ahead. As a Plant Engineer with Illinois Bell Telephone Company, he helps estimate telephone equipment needs years in advance. For example... when a new real estate development is in the planning stage, Jim figures how much telephone equipment it will need when it reaches its full growth. His estimate is based on his knowledge of the equipment's potential plus forecasts provided him of the area's rate of development. He then makes a complete report that becomes the basis of plans for the future.

Jim graduated from Northwestern University in 1952. His progress since then is typical of college men who have chosen telephone careers. If you'd be interested in a career in the opportunity, see your Placement Office for full details. There are also openings with other Bell telephone companies, with Bell Telephone Laboratories, or Western Electric and the Sandia Corporation.

CONVAIR NEEDS YOUR TALENTS TO DEVELOP TOMORROW'S AIRCRAFT

CONVAIR's expanding interests in the field of conventional, unconventional, and nuclear-powered aircraft offer exceptional opportunities for Engineering Graduates.

If it was impossible for us to meet you on our recent visit to your campus, please send us your resume. Prompt, personal attention will be given your reply.

Address all correspondence to M. L. Taylor, CONVAIR, Engineering Personnel Dept., 2 Fort Worth, Texas

"It's Toasted" to taste better. "It's Toasted"—the famous Lucky Strike process—tomes up Luckies' light, mild, good-tasting tobacco to make it taste even better.

SMOKING, ASIA TO BE NEXT FORUM TOPICS

Students interested in current controversies will be in for a real treat during the period March 17-24, when the Rice Forum and the Forensic Society debaters will do their best to air the pros—and cons—of some of these hot-burn League issues.

On March 16, at 8:00 in the Fondren Library Lounge, there will be a Forum on "Smoking, Big and Long Career." Dr. Wann of the Psychology Dept. will act as moderator.

Some expert scientific opinions on the subject will be given by Dr. James Daily, Houston lung specialist who has operated on cancer-patients who has operated on cancer-

On March 17, 8:00, am, the Rice Forum and the Forensic Society debaters will do their best to air the pros—and cons—of some of these hot-burn League issues.

During March 17, 23, 24, two groups of West Point cadet debaters will appear on the campus. One group will be here March 23, and will discuss, with Al Beerman and Rex Martin, "The Resurgent Position of Asia in World Politics." They will consider the possibilities of world power shifting to Asia, and what bearing our foreign policy has on this possibility. The other cadets will debate "Federal Aid to Higher Education." Brad Tompson and Joe Steele will represent Rice in this debate. The date of this debate is uncertain and will be announced later.

Engineer Tells How To Regret

Those of us who still regret know that regretting is time-consuming. "Ursula's business. Certainly life would be easier without the shadow of remorse. The benefactors of smokish, the good old engineers have done it again. They have wired up a machine that will do all your regretting.

More over it is estimated that it can regret ten times as fast as a human. So now you can do ten regrets in the wiring and with the furnished accessories, the device will relieve you of many other tiresome necessities.

This regrettor is about to be mass produced so that everyone can have one, but its details are described in the next issue of The Rice Engineer for those who would like to build this own. Of course, The Engineer has many other articles of lasting interest including an improved jep page.

Sklar, Reed Place In Fencing Tourney

Fred Sklar and Charles Reed, members of the Rice Fencing Team, competing in an individual sabre and epee tournament last Saturday at A&M, reached the finals in both sabre and epee.

Fred Sklar, in an excellent exhibition of epee skill placed second against entries from A&M, Texas, U. of H., and the U. S. Air Forces. Sklar also took fourth place in the epee.

Rice crow hunters should talk to Steve Sims if they are interested in learning to call crows.

Texas Southern Bowl last Sunday, but that was about all they could find in the Pan Olympic which promises to be one of the best ever assembled.

The Texas Aggies who have dominated the order in practically every sport ever since this writer can remember announced several months ago that their freshman football team of last year is to be the national champions of 1958. In an intra squad game the Maroon let a 7-0 victory slip away after the snap and they singled out the surplus of QBs which Rice has just that there has been a tendency for the last few years to do that they dropped a close decision to the University of St. Thomas 38-26. The two teams which matched the tall team of Zook, Boren, Rice, and Diddle lost 1-2 while the second team's O'Bryan, Martin, Wilson, and Chatham were winning 2-1. With the match tied 6-3, total pins decided the victors, and the Owls were 15-8.
