RMC Announces New 'Focal Point'
The RMC committee announced a new informal "focal point" for leisure hours in the basement of the center. A juke box has been installed with a variety of music ranging from Bing Crosby to Al Jolson Jamal.

New Box
An oversight of the juke box company resulted in a 10¢ box, but this will soon be replaced with a 5¢ box. The basement is arranged to provide an area for dancing.

A new bulletin board will be provided for use of the students.

Food. "To Go" and for the hungry, candy vending machines and eventually a coffee machine will be provided. Food purchased in Sammy's "to go" can be taken to the basement. It is hoped that this area will become the new center for casual entertainment on campus. The RMC committee welcomes any suggestions for development of the lounge and invites you to use it, if you have time.

At The Student Senate
The Agora will meet Tuesday at noon in the basement of the Fondren Library. Discussion will center on a paper to be presented by the Finance Committee. The meeting is open to all interested students.

Forum Candidates
Neil Anderson, chairman of the Forum Committee, reported that there were two separate types of lists had been drawn up, one with names of key political figures, the other with less politically connected names. The senator expressed the opinion that not only would this group be less expensive, but also probably more relevant to situations at Rice.

The Senate decided not to pass out the Instructor Rating Sheets, due to the fact that the plan of the Thresher to start a course-rating program. The proposed action is to see how effective these turn out. Then, possibly next year, if the student body is not satisfied the old IR sheets will be distributed again.

Campus Copy Approved
Mike Bennett, chairman of the Publications Committee, reported that 50% of the Campus has been approved, and that 20 pages of the December election were released.

Food in Basement, Old Rules Discussed
George Clark, chairman of the RMC, Clay Williams, Allan Unrig, Danny Barron, Phil Morris, and Mary Lee Bannister drew up ticket sales for "Mata-Mua." 'Mata-Mua,' this year's Arch-Arts orgy, will transform Sylvan Beach into a South Sea island paradise tomorrow night, Saturday, at 8:00. Tickets are available for 25¢.

Preparations will include dense jungle, beach, and all the other comforts of a typical Polynesian island (who knows, maybe even a volcano). The decorations are planned accordingly, by any members of the Architectural Society.

Seniors, Beauties Named

Selections for Beauty, Favorites and Outstanding Seniors in the 1960 Campanile were released Tuesday by Sylvia Davia, Variety Fair Editor of the yearbook.

Ten Beauties
Beauties named by judges Harrison Johnson and Howard Wurtz.

Included Judy Cole, Mary Kay Kellogg, Mary Moore, Barbara Manter, Wanda Phares, Polly Philbrook, Pauline Pfeifer, Susan Shannon, Annette Wicker, and Mary Woodson.

All school Favorites chosen in the December election were Mary Ann Boone, Margo Garrett, Mary Lacey, and Mary Lou Sonderegger. Barbara Montgomery, Margie Moore, Wanda Phares, Charlotte Reeves, Bethie Rollins, Pat Shannon, Sue Sheppard, and Diana Thomas.

Twelve Girls This Year
"Only ten girls shall be elected as Favorites but twelve were chosen this year. Two of the girls (Mina Phares and Mina Shannon) pictures will be included in the Beauty section and as a girl's selection rate for second semester will only be included in one of the sections, the two additional choices were necessary," Dr. Camus stated.

Twenty-one seniors were nominated by the graduating class and each one of the top twenty-one judges the boys represented. Nominating Seniors were Neal Anderson, Mike Bennett, Bob Brown, Ray Davis, Hans Going, Mike Kahn, Mady Lacy, Bobbi Scott McKeltrick, Margie Moore, Harry Roosman, and Charlotte Reeves.

Campanile Due In May Pictures of all of the honorees will appear in the Campanile which is due to appear in early May.

WHAT'S THE ANSWER—Ask Joe Kruppa, Neil Anderson, Mary Woodson, and Sandy Graham—Members of the Rice team which will be challenging another college over national TV March 6, in the G-E College Bowl.

"College Bowl' Will Test Four Riceites
Four students from the Rice Institute are scheduled to appear on a nation-wide television program, the G-E College Bowl, in order to test the intelligence of young people.

College Bowl is an intercollegiate game designed to test the ability of college students to recall facts. Each week two college present teams of four members, who are asked questions drawn from such fields as American and European History, American, English, and European Literature, philosophy; science; current affairs; music; mythology, and the Bible.

The questions have announced point ratings, and the team with the greater number of points is declared the winner. The winning team will continue to appear on the show until defeated by another team.

Possibly Slippery Rock!
It is not definite whom the Rice team will be challenging, but it will be one of the schools playing prior to March 6, such as Cornell (who defeated Purdue last week), Braxt Max, or Dartmouth. The selection of these students by President Rice was an attempt to provide a well-balanced coverage of significant areas of knowledge," Dr. Lewisohn stated.

"This is the first time Rice has appeared on the program," the president added, "probably the first time the school has ever been recognized on a coast-to-coast television pro gram".

On KHOU
Originating 'live'-spontaneous and unannounced—from the CBS Television Network Studios in New York, the program will be seen in Houston from 1:30 to 5:00 over KHOU-TV.

The winning team receives for its school a $5000 scholarship grant, while the runner-up receives $300 for its scholarship fund. The students who participated in the College Bowl have been awarded a gift from General Electric.
On The Calendar

The calendar released to the Thresher Tuesday afternoon by Dr. J. R. Sima illustrates three major points which could be overlooked. In the January 16 issue of the Thresher, a poll was taken of the Rice student body and the results forwarded to President Houston. We are happy to say that every one of the students' requests were adopted by the committee which drew up the calendar.

The poll showed that the student body favored an extension of the Easter vacation, with the period to extend the week after Easter. Dr. Houston informed us that due to previous commitments the extension of the holiday week after Easter was not possible next year, but would be adhered to in the years to come.

In addition the students favored making up the vacation period by beginning the fall semester one week early. This request was complied with by the committee. And, there was no shortening of the mid-term vacation—a proposal which was not favored by the student body.

A Thresher suggestion of a one day reading period—which was also favored by the student body in the poll—was included in the new calendar.

We can only say that the students' wishes have been complied with by the administration, and speaking for the student body—the Thresher issues a sincere "Thank You."

The Thresher Way

Many times throughout the year we have been criticized for not griping enough, for not blasting the administration in fiery editorials, for supposedly siding with the Lovett Hall "bunch" on decisions and policies affecting the student body.

If the Thresher has not been a gripe sheet this year, we can honestly say that we are happy. It is our editorial policy not to gripe, but to suggest; not to blast but to lament; not to side with but to condone. It is our feeling that griping about everything will get nothing accomplished, but suggesting or even lamenting the lack of something which would benefit the student body will be received in a better light by everyone concerned. We follow the policy of hitting at the "major" issues where something can be accomplished while overlooking the insignificant ones where nothing is to be gained.

The latest Thresher coup is the addition of a one day reading period per semester which was suggested in our editorial in the January 16 issue. We of the Thresher are proud to say that we are helping to bridge the gap between the Rice administration and student body.

It is our hope that we may continue to serve you as your responsible voice on campus.

Neil Anderson

Parties Readied For 1960 Race

At the recent $100 a plate Presidential Campaign kickoff dinner in Washington the assembled Democratic party leaders displayed an amazing degree of unity on what apparently will be their central issue in the 1960 campaign—Richard Nixon.

Personal Abuse

We are frankly appalled at the way heated rhetoric is used and at the attention being given to every personal attack on another fellow on campus who, although he has chosen to remain anonymous, deserves recognition for his fight against that which he is fighting.

The Republicans may be taken to task however for isolating co-eds while being so interested in the policies of the GOP.

Paradoxical Policy

Even granting the lack of substance behind the peace and prosperity ad, one cannot quite see how in this atmosphere of total war the peace and prosperity ad is not completely out of place.

THRESHING-IT-OUT

Moore: "Change" Is A 'Quick Decision'

To the Editor:

After forty-eight years of the Rice Institute a quick decision has been made to change the name of this southern school to Rice University. When this intention was first disclosed, I expected to see in The Thresher a good bit of opinion representing both sides of the issue. Neglecting to find one side, I have taken this opportunity to present views which I feel are shared by a number of students.

It seems to me that the published advantages of this proposed change simply are not great enough to warrant a thing as sweeping as a name change. Of course, it is a wonderful thing to desire improvement, particularly in the humanities, but just exactly how much will this reform movement accomplish?

From personal observation, it appears that the Institute has done extremely well in securing additional professors and instructors in the Liberal Arts fields, particularly in the last three years. Apparently this interest in developing the reputation of Rice as far as this branch of study is concerned is fairly new. Under the name of Institute, great strides have been made in this direction. Perhaps we are expecting too much from less than five years of reorganization and effort.

With the present name-change movement underway, I cannot help thinking that something is being rushed into without adequate forethought. The Rice Institute in less than forty years of existence has distinguished its own name in a rather elegantly sweeping way. There is room for improvement and further development within these boundaries.

—Barry Moore

Silver Contest Offers Awards
To Rice Women

During the months of February and March, Reed & Barton, America's oldest major silversmiths, are conducting a "Silver Opinion Competition" in which valuable scholarship awards totaling $2050 are being offered to duly enrolled women students at a few selected colleges and universities.

Rice has been selected to enter this Competition in which the First Grand Award is a $500 cash scholarship, Second Grand Award is a $300 scholarship; Thrid Grand Award is a $250 scholarship; Fourth, Fifth, and Sixth Awards are $200 scholarships; and Seventh, Eighth, Ninth and Tenth are $100 scholarships.

In addition, there will be 100 other awards consisting of sterling silver, fine china and crystal worth approximately $50.00.

Mary Anne Boone is conducting the "Silver Opinion Competition" for Reed & Barton at Rice. Those interested in entering the Silver Opinion Competition should contact her at 328 Jones for entry blanks and for complete details concerning the Competition rules.

Arrow Oxford Buttondowns

Check your supply . . . the average college man owns at least ten shirts. He consistently buys Oxford cloth shirts with the Arrow label. Reason? Only Arrow offers the authentic, soft roll collar, luxurious "Sanforized" fabric. Ask for the "Dover" collar. $5.50.

A classroom to career case history

"The telephone company really helps you grow with your job"

John T. Bell majored in History and Economics at the University of Georgia. On graduating in June, 1957, he joined the Southern Bell Telephone Company.

Today—less than three years later—he is a Public Office Manager for the company at Orlando, Florida. His office serves 5,000 telephone accounts and handles more than a million dollars' worth of revenue every month.

John says: "I chose a telephone career over a number of others because I was impressed by the company's Management Training Program and the opportunities offered for rapid advancement. It was the best decision I ever made."

John got his initial training at Jacksonville and Daytona Beach, where rotational assignments familiarized him with all company operations. Then he transferred to Orlando, where he trained as a business office representative, attended an instructor's school, and then taught classes himself for several months.

Dealing with people—his "first love"—is John's main job as Public Office Manager. Besides handling personnel and other administrative duties in his office, he makes many customer contacts in and out of the office. "I'm kept busy giving talks about the company at meetings of business and civic groups," he says. "Also, I work closely with leading citizens on various civic projects. It's satisfying, and I feel it's making a better manager of me. The telephone company really helps you grow with your job."

Why not look into career opportunities for you in the Bell Telephone Companies? See the Bell interviewer when he visits your campus—and read the Bell Telephone booklet filed in your Placement Office.

Student Teachers Learn
In On The Job Training

All students who enter Rice planning to exit with a teaching certificate are faced with a span of student teaching their senior year. Under Texas requirements, the minimum length of time they must engage in this preparatory practice, the minimum length of time they must engage in this preparatory practice is sixteen weeks of half day periods. Not Until '50's

Until the early 1950's, senior educational students could not receive their practice teaching experience at Rice. They were therefore forced to wait for their certificate. The institution of a system which corrected this has been more convenient.

There is an extra work load involved in practice teaching, but it is generally considered rewarding. Here, the future teachers are offered first glimpses of school from behind the desk. They are actually responsible for teaching a class, which includes preparing lessons, grading papers and most important, disciplining students.

Personal Satisfaction
A great deal of personal satisfaction can be gained from the experience. One girl said the high point of her day was when her class welcomed her back each afternoon.

Dr. Hugh C. Black, Associate Professor of Education, commented on the excellent work done by Rice practice teachers. He seemed to feel that the quality of the students is demonstrated by the way in which they handle the extra, time consuming, work load.

Under the Secondary Education Program at Rice, students practice teaching in the city's high school. This program is expected to continue unchanged. However, the future status of the elementary educational program remains indefinite at the time.

Meet Baylor Saturday

Rice Invades Waco

Rice's embattled Owls, smothered by Texas A&M and cut down in the thick place, are expected to meet Baylor Saturday by SMU, escape from the cellar, and then struggle to keep within the title race, one week ago.

The Owls were destined to pull out of the basement Tuesday night, as they raced to a 35-28 halftime lead over SMU. With David Craig scoring 30 of the Owl's first 31 points and Steve Smith rebounding brilliantly, Rice scored 20% of their shots in the first half.

To Go

Then, slowly, the roof began to cave in. SMU wrestled the lead away on a free throw by Jan Loudermilk but Rice scored back on seven straight points by Mike Maroney to lead 48-42, as the clock showed 10:10.

In quick succession Max Williams hit a pair of jump shots, Loudermilk tipped a shot in, and Steve Strange hit a jump to tie the score at 58-all. Rice then scored, and the Horned Frogs countered.

Thus SMU was able to regain its share of the Southwest Conference lead it lost to Texas only three days before. The upset victory on Longhorns, deadly on the road and unbeatable at home, crushed the hopes of the Texas Aggies to move into a tie for the lead and the favorable position in the SWC.

The 78-62 victory left a decisive SMU-A&M match to eliminate the loser from the title picture. Texas has beaten both SMU and A&M in second round play.

After meeting Baylor, Rice returns home to face Arkansas Monday night. The Razorbacks, still in the title chase, trail by a half game.

Another Disappointment

Tuesday night proved to be another disappointing night for Johnnie Frankie's Rice Owls. Tailgating twelve points in a four and a half minute interval in the first half, while holding SMU scoreless, the Owls pulled away to a ten point margin.

However the Mustangs turned the tables in the second period when they hit for sixteen in a row to pull from a four point deficit to a ten point lead and crush any Owl hopes of an upset victory.

After playing outstanding ball in the first half, the Owls returned to their mediocrity form in the second period as they watched SMU hit 60% of their second period shots and score a soaring 47 points in the twenty minute interval.

Craig, Maroney Hit 48 of 58 Handicapping the Owls' scoring threat was the fact that SMU's 58 points, 48 of them came from the sure hands of Butch Craig and Mike Maroney. Craig, with his second highest production of the season, nailed another spike in his All-Conference hoop chart when twenty points in the first half and 29 for the night. The only other Owl to score more than two points was top rebounder of the evening, Steve Smith, with four.

The third reason for the Owls' second half defeat was the twelve fouls registered against Rice in the second period. Each team finished the first half with two starters charged with three violations, however three Owls fouled out of the game, while no Mustang failed to finish the game.

Anderson...

a football for the last twelve years at least. Mr. Nixon continues to cement the District-Republican coalition which blocks any direct action on this sphere. Mr. Rogers' smokescreen is at work. The present Senate debate is a good weather-vane to watch in this stormy sphere. Mr. Rogers' smokescreen is at work. The present Senate debate is a good weather-vane to watch in this stormy sphere.

Perhaps timidity only indicates sterility and we must look beyond the rise of a new set of political forces in our society. That the dawn of the 1960's is going to demand more than apathy in the American people and unimagination in their leaders if we are to survive, is one thing we can forecast for certain.

Hermann Prof. Building PARKER Just Across SHOP Main Street 419 MAIN JA 5-5811 WE SPECIALIZE IN FLATTOPS
Statistics Fail To Lie About Rice Quintet

With the Southwest Conference game schedule over half finished, Rice is still firmly entrenched in the conference standings. Not much better is the shooting percentage of .352, lowest in the conference. Most outstanding of these from the Owl's viewpoint is Rice's anemic field goal shooting percentage of .382, lowest in the conference. Most outstanding of these from the Owl's viewpoint is Rice's anemic field goal shooting percentage of .382, lowest in the conference. Not much better is the free throw percentage of .417, second from the bottom. Although the Owls' first eight conference games, they averaged only 55 points per game, 10.8 points lower than the next highest team, which surprisingly enough is defense-minded SMU. Rice does have a few bright spots in the individual departments, however. David "Buch" Craig still holds the third place in scoring, with a 17.9 average for the complete season. Sophomore Linda Ulbrich led all scorers with 12 while Sandy Smith had 8 for the losers.

Movers Move Winoo

Last week the Men's Basketball playoffs began. In the Game of the Week, the Movers defeated the Wee Winos 41-30. In the first quarter, the Winos drew first blood as Tom Broad converted on a 3 point play. But the sharpshooting Movers soon gained the lead and never lost it as Walter Moore and Johnny Bourg continually hit long shots. The first quarter ended with the Movers holding a one point advantage over the Winos. Led by Bourg and his deadly jump shot and Moore's ball-handling, the Movers easily gained a 10 point lead over the Winos in the second quarter. The Winos were cold and the Movers took advantage of the lag in scoring. Still Ahead

In the third quarter, the Winos again found the range as Broad and Neal Marcus continually hit from all corners of the court.

Statistics... come up with someone else to out of last place, the Owls must Maroney.

Maroney is also the Owls' rebounds with 142 for a 7.9 average. Maroney is seventh in second leading scorer with 11.2 (Continued from Page 7)

Five Vought Divisions Provide Engineers Greater Opportunity for Space-Age Advancement

Young engineers, particularly, will be interested in the broad range of opportunities present in Chance Vought's five divisions and two wholly owned subsidiaries. For every Vought employee, there is a division to make fullest use of his talents and to speed his personal advancement. And, of course, he is backed by the four other divisions whose balanced activities add security to his company and his future.

Vought's diversification, begun early in 1959, goals this 43-year-old aircraft firm for the opportunities of the age of space.

AERONAUTICS DIVISION
New generations of manned aircraft and atmospheric missiles, devices for antiballistic warfare, and many other types of weaponry will take shape here. Among this division's current contracts: a Navy order for development of an environmental protection and escape capsule for aircraft pilots. Other work includes production equipment for the three versions of Vought's single-engine aircraft, study contracts in submarine detection and classification, and contracts for military and commercial aircraft assemblies.

ASTRONAUTICS DIVISION
Vought is devoting 13 years' experiences in the missile field to obtain broader responsibilities in the case for peace. Concentration is on an advanced vehicles for space exploration, and on ballistic and antiballistic missile systems.

Currently, Vought is providing the four-stage Scud research rocket and its launcher for the National Aeronautics and Space Administration. In the future aspects of flight, Vought is taking the lead with its orbital flight simulator.

Company personnel are engineers experienced in the fields of electronics, computers, magnetic memory, and associated electro-mechanical devices. Vought Industries, Inc., formed late in 1959, is engaged in the design, manufacture and marketing of mobile homes, an industry with a great growth potential.

You live at a discount in Dallas

In Texas there is no state income tax and no local or state sales taxes. Low school and property levies add to your savings. Home construction costs—as well as house and apartment rentals—are below the national average. Fuel costs are negligible, and most groceries cost less.

Dallas has grown faster since 1959 than any other U.S. city. One reason is the city's wealth of entertainment and cultural centers. Another reason is the attractive cost of living.

Student engineers are invited to write for further information about new Vought activities, and how you can start your career with one of Vought's five divisions. Please address inquiries to: Professional Placement Office Dept. CN 26

THE THRESHER

Editor Decrees Chapel Service; Assigned Topic

By DICK VIEBIG

Thresher Religion Editor

Many of those who came to the chapel service last Thursday were highly disappointed to find that it was not a service but rather, in the words of the speaker himself, a meeting.

An excellent religious recital presented by the speaker was the chorus feature which seemed to justify holding this function in a chapel.

The speaker was assigned the topic of Roman Catholic Education, instead of being allowed to choose a subject on which he might have had something more interesting to say.

The speaker did a competent job of acquainting the audience with some of the facts and features, and even some of the shortcomings, concerning the Roman Catholic educational system in this country today. Unfortunately, the topic was one that left only itself slightly to an interesting or even inspirational Devotional Service.

By VICTOR KAYE

This week, the ever-diminishing part of the University crowd took to the student union to get away from the cold and listen. The General Union presented an orchestra with a few famous songs.

The combination of organs and voices, the orchestra and the voices, the orchestra alone, each in turn, presented the songs.

The orchestra was conducted by a student and the voices of the students were very much enjoyed.

Great Thanks

The song was sung by the students and was very much enjoyed.

The song was sung by the students and was very much enjoyed.
