Rice beauties had more dates than usual on their busy calendars this week with the preliminaries of the final 1960 Homecoming election. It was decided that the Sophomore class will elect its student council officers with the pre-election presidential primary on November 13. The freshmen will elect their class officers on the same day. These elections will be announced and presented during half-hour festivities at the Homecoming games with Texas A&M Saturday, November 12.

THE NOMINEES are: Elizabeth Emsley, Dana Holmen, Wanda Phears, Judy Poinsett, Charlotte Prescot, Pat Shannon, Sue Shepherd, Howard Thomas and Mary Woodson.

Ten of the following 20 girls will be chosen those at 3 p.m. in the Rice Grand Hall to appear in the final election regular election November 12. There were 138 who fell into this category; they too will vote for the candidates.

A place was also included for the student to denote his college. Nixon carried every college, but by varying majorities. In Hansford, he won 74%; in Jones, 91% in Baker, 65%; and in Wiss and Will Rice, 42%. Will Rice took the third-party route, backing Socialist Labour's Erle Harris. Graduate students, in the only close race of the day, split 53-47.

Seniors Gee Johnson, Carol Nixon and David Lodge are the Rice beauties who had more dates than usual on their busy calendars this week with the preliminaries of the final 1960 Homecoming election. As others see us... Monroe Doctrine is vague anachronism

by Sandy Shenk

Monroe Doctrine is a vague, anachronistic concept that is no longer relevant to the current realities of international relations. The Monroe Doctrine was formulated in 1823 by President James Monroe as a statement of American foreign policy, declaring that the Western Hemisphere was off-limits to European colonization and that European powers should not intervene in the affairs of the Americas. This doctrine was intended to serve as a deterrent to European expansion and to protect the Western Hemisphere from European interference.

The Monroe Doctrine has been interpreted and applied in various ways over the years. It has been used as a basis for U.S. interventions in Latin American countries, such as the ouster of Fulgencio Batista in Cuba in 1959. However, the doctrine has also been criticized for being an anachronistic concept that is no longer relevant to the current realities of international relations.

The Monroe Doctrine has been challenged by various political forces, including progressive movements and anti-imperialist groups. Some have argued that the doctrine is outdated and irrelevant to contemporary international relations, while others have used it as a basis for opposition to U.S. intervention in Latin American affairs.

The Monroe Doctrine has also been criticized for being a tool of U.S. imperialism, used to justify interference in the internal affairs of other countries. Some have argued that the doctrine is a justification for U.S. interventions in Latin America, including the overthrow of democratically elected governments.

As a result, the Monroe Doctrine has been subject to reinterpretation and modernization, with some scholars calling for its reform or abandonment. The doctrine has been criticized for being a tool of U.S. imperialist ambitions and for being a justification for U.S. interventions in Latin America.

In conclusion, the Monroe Doctrine is a concept that is no longer relevant to the current realities of international relations. It has been challenged by various political forces, including progressive movements and anti-imperialist groups. The doctrine has also been criticized for being a tool of U.S. imperialism, used to justify interference in the internal affairs of other countries. As such, the Monroe Doctrine is a concept that is no longer relevant to the current realities of international relations.

Three

debates on campus. He

owls, to deliver on campus

OWLS Directories May Finally Arrive

The 1961 OWLS Directories should be delivered on campus next week, according to the administration. The directories, which contain fairly complete listings of telephone numbers and addresses of faculty, students in the various departments, faculty, and other vital campus groups, will be delivered on their arrival to college residents who purchased them in advance. Non-residents may pick up purchased copies in the RHC lobby, where they will be available for the 15-cent, free distribution of the faculty section pointed in the delay in this year's publication. The registration office is located on the 1st floor of the Oskar Libby Literacy Society.
Traditional Listening Parties, Refreshments Dominate Weekend

We are happy to announce the final appointment of representatives to the college column. Baker College, is represented by Morley Tobey. The college will have its first listening party of the year this Saturday to be held at the home of Alex Greenwood, 3094 Cherry Chase.

James South reports that Hansen College is deep in plans for its major activity of the fall. November 11, at 7:15, Hamman Hall will ring with the voices and songs of the Black Edge Minstrel Company. THIS IS THE first stage production by any of the residential colleges, and judging by the enthusiasm of the performers, it should be an exciting addition to the Homecoming weekend. The college's first and only listening party of the year will be held this week to 'listen' to the Arkansas game. To facilitate late hour grinding, Hansen is building a basement study room. A contest is now under way for the best design to convert the old storage space. Entries are due by November 6. First prize is a blanket pass to all Hansen activities for the year.

AT WEISS College, according to Chuck Yingling, the college's Homecoming Queen nominees were honored at a Tuesday dinner, thus giving the freshmen and others a chance to meet fifteen of the finest representatives of Jones College, and aid in their selection of the five nominees to be submitted by Weiss for the all-school election.

Dr. and Mrs. Talmadge were hosts to a "no trick—just treat" party Halloween night at Weiss House. The members of the college enjoyed cakes and ice cream and ended the evening with a songfest around the piano.

THIS COMING Sunday is the data for the ground pole contest between Weiss frosh and upperclassmen. All members who wish to attend the buffet supper at the Galvez Hotel on November 12 are requested to reserve their tickets by Friday, November 11. All tickets must be purchased in advance; there will be no sale at the door.

Bill Pannill reports that Will Rice College, a little binary-oid after last week's 'Papaya Formal', calms down a little this weekend with a listening party the afternoon of the Arkansas game. Place is the usual... Hermann... and the refreshments the usual...
RELIGION ON CAMPUS...

Bishop Pike, Nationally Known Clergyman, Speaks This Week

By NEAL HOLIFIELD

One of the most distinctive members of the Episcopal clergy, Bishop James A. Pike will speak at the Chapel programs on November 10 and 11.

Bishop James A. Pike will speak at 7:15 p.m. each evening in the Memorial Chapel. Following at 8:05 p.m. Thursday in the Will Rice Common and Friday in the Baker Commons, Bishop Pike will lead discussions.

UNDoubtedly, many will wish to hear him, but it is emphasized that due to the limited seating capacity of the Chapel and the Commons, tickets will be distributed giving preference to the students and faculty. These will be available for the asking at the Chapel Reading Room. If possible, tickets should be obtained from the college Religious Council representatives: Margaret Richardson-Jones; Alan November; Scott Morris, Baker; Rufus King, Houston; Newton Burkhart, Will; Beer, and Jay Finkbeiner, Wynn.

Bishop Pike graduated in arts and law from the University of Southern California, and after admission to the California bar, received the degree of Doctor of Laws from the University Law School. He is a member of the Board of Regents of the University. He has served for three years as Chaplain of the Board of Regents of the University and is Head of its Alumni. He is a member of the Graduate Board of the Yale Law School Alumni Association.

In New York he was President of the New York Chapter of the America-Israel Society; a member of the Board of the Red Cross; the Seaman's Church Institute, and Trinity School. He is a member of the Graduate Board of The Yale Law School, and is President of the Northern California Chapter of the Yale Law School Alumni Association.

The Christian Science Organization is presenting a lecture November 7 at 7 p.m., "The Healing Prayer of Christian Science," to be given by Miss Lela May Aultman of Denver, Colorado, in the Fondren Library Lecture Lounge. Miss Aultman is a member of the Christian Science Board of Lectureship.

Players Offering Season Tickets: $1

It is now possible to buy a season ticket to all the Rice Players' productions. Throughout the year three, and possibly four, plays will be presented. The cost for each would be seventy-five cents per person, but with a season ticket, one may attend all for only $1.50.

The first play, or plays actually, are being presented November 3 and 4. This will be a series of three one-act plays "Aria da Capo" by Esma Saint Vincent Millay, "Something Unspoken" by Tennessee Williams, and "The Lesson" by Eugene Ionesco.

The plays offered later in the year will be "The Rainmaker" by Tennessee Williams, or Scott Morris, Baker; Rufus King, Houston; Newton Burkhart, Will; Beer, and Jay Finkbeiner, Wynn.

BISHOP JAMES A. PIKE

From California

Several by Bach, Dietrich Buxtehude, and Gardner Read.

Rice-Memorial and War Shipping Administration.

HE COMPLETED his theological Seminaries, graduating from the latter magna cum laude. He served for three years as Chaplain of Columbia and head of its Dept. of Religion.

BISHOP PIKE HAS received honorary degrees of Doctor of Sacred Theology; Doctor of Divinity; Doctor of Civil and Canon Law; and Doctor of Literature.

STU’S EXPLAINING HOW MACHINES WILL SOME DAY “OUTTALK” PEOPLE

“Stu” Smith graduated from Southern Cal with a powerful yen for excitement. His kind of excitement—Engineering.

He got what he bargained for (and a little more) when he joined Pacific Telephone. One of Stu’s early assignments was to find out how existing Long Distance networks could be used to pipeline high speed “conversations” between computers in distant cities.

Today, four years after starting his telephone career, Senior Engineer Stuart Smith heads a staff of people responsible for telegraph and data transmission engineering in the huge Los Angeles area. As a pioneer in this new data transmission field Stu predicts data processing machines will some day do more Long Distance “talking” than people.

Stu contacted 12 other companies before joining Pacific Telephone. “I don’t think there’s any limit to Where a man can go in the telephone business today. Of course, this isn’t the place for a guy looking for a soft touch. A man gets all the opportunity he can handle right from the start.”

If Stu’s talking about the kind of opportunity you’re looking for, just visit your Placement Office for literature and additional information.

**OWLOOK...**

Hogs Can “Cinch” Crown; Four-Way Tie Possible

By CHUCK YINGLING

As the SWC race enters the November stretch drive, the Arkansas Razorbacks face the prospect of having a share of the loop crown all but sewed up. A defeat of Rice would leave the Razorbacks with only one conference defeat and a cinch for a share of the title, provided they beat Texas Tech and SMU, which would be highly favored to do.

Likewise, a defeat by Arkansas would underline the Owls’ chances of a trip to the Cotton Bowl very slim indeed. If Rice won all of its remaining games, Arkansas would still be the host team for the Jan. 3 classic since the Texans haven’t been since 1955 and Rice’s last trip was in 1958.

In other words, this week’s outcome is a must for the Owls if they are to have more than an outside chance at the Cotton Bowl. Even if they win this week, and if Texas also beats Baylor, the possibility would still remain for TCU to win the title outright, or for even a four-way tie between Rice, Baylor, Arkansas, and A&M.

This would happen if Rice lost to A&M and Baylor beat TCU, and the other three schools went undefeated the rest of the season. This could happen since none of them will play each other after this week.

In this case, all four schools would end up with 5-2 records, and Baylor would go to the Cotton Bowl since they have never beaten TCU (T CU, with one loss and one tie so far, would have to win their remaining games outright, as they couldn’t possibly tie).

All of this just goes to show that the wild and woolly Southwest Conference has been made even wilder and woollier by the expansion to an eight-team title race.

Tiemenda Deception

In an international battle before some 200 people in Rice Stadium, the Rice lightweights were the victors of an exciting football game between the Rice Owls and the Monterrey Tech Monarchs.

Rice won the game, 28-6, and it was a highly entertaining contest. The Owls entered the game as heavy favorites, and the Monarchs were considered to be a team of five (all of which were seniors in high school). The Rice Owls played their regular Elkins and Greenie teams, while the Monarchs played their second string.

The Rice Owls, 2-0, are currently ranked as the fourth best team in the Southwest Conference, while the Monarchs, 1-1, have been inconsistent this season. The Owls have won 7 of 11 games played in the Southwest Conference.
Filters for flavor
--finest flavor by far!

Tareyton has the taste—
Dual Filter does it!

Here's how the DUAL FILTER DOES IT:
1. It combines a unique inner filter of ACTIVATED CHARCOAL...
