THE RICE INSTITUTE
A university of liberal and technical learning founded by William Marsh Rice in the City of Houston, Texas, and dedicated by him to the advancement of Letters, Science, and Art
CONTENTS

VOLUME XXXI

No. 1. JANUARY, 1944

SHAKESPEARE AND THE NORMAL WORLD—A course of three public lectures delivered at the Rice Institute, December 7, 8, and 9, 1943, by HARDIN CRAIG, PH.D. (Princeton), Litt.D. (Centre), and Dott. dell' Università di Padova, Professor of English at the University of North Carolina.

Provision for this course was made by anonymous donors as a memorial to the late Stockton Axson, Professor of English Literature at the Rice Institute, 1913–1935.

Prefatory Note.

I. The Center of Probability ............. 1
II. The Range of Action .................. 15
III. The Depths of Understanding ......... 33

No. 2. APRIL, 1944

FIRST COMMISSIONING CEREMONY OF THE RICE INSTITUTE NAVAL RESERVE OFFICERS' TRAINING CORPS UNIT, PALMER MEMORIAL CHURCH, 9 A.M., FEBRUARY 26, 1944.

I. Program .................. 51
II. Address .................. 52
III. Presentation of Awards ............. 56
IV. Presentation of Commissions ........ 58
V. Members of the Unit Receiving Commissions .... 61
CONTENTS—Continued

I. Program .......................... 62
II. Baccalaureate Sermon ............ 63
III. Announcements and Awards .... 75
IV. Conferring of Degrees in Course .. 80
V. Message to the Class ............. 84

No. 3. JULY, 1944

PREFACE TO PEACE—Rockwell Lectures on Religious Subjects, delivered at the Rice Institute, April 25, 26, and 27, 1944, by RALPH W. SOCKMAN, D.D., LITT. D., LL.D., Minister of Christ Church, Methodist, New York City.

I. Barriers to Be Removed .......... 87
II. The Mind of the Peacemaker ... 111
III. Some Dynamics of Advance ..... 131

No. 4. OCTOBER, 1944

DIRICHLET SERIES—Lectures delivered at the Rice Institute during the academic year 1942–43 by S. MANDELBROJT, Docteur ès Sciences (Paris), Professor at the Collège de France, Visiting Professor of Mathematics at the Rice Institute.

I. General Properties of Convergence .... 159
II. Evaluation of the Coefficients .... 170
III. Arithmetical Properties of the Sequence of Exponents .... 173
IV. Fundamental Theorems on the Estimation of Coefficients .... 186
V. Estimation of the Sequence Associated with the Sequence of Exponents .... 201
VI. Theorems of Liouville, Picard Type in a Curvilinear Strip .... 207
CONTENTS—Continued

VII. Entire Functions Represented by Dirichlet Series . 216
VIII. Singularities of Functions Represented by Dirichlet
Series with Finite Upper Density . . . . . . . . 227
IX. Composition Theorems of Hadamard Type . . 231
X. Composition Theorems of Hurwitz Type . . . . 261
